

## Science Skills & Vocabulary Coverage and Progression

### Nursery and Early Years skills coverage and progression

30-50 Months	40-60 Months	Early Learning Goals
The principle focus in Nursery and Reception is to provide a secure foundation of science through learning and development opportunities which are planned around the interests of each individual child.		
<b>Communication and language</b>		
Understand 'why' questions, like: "Why do you think the caterpillar got so fat?"	Learn new vocabulary.  Ask questions to find out more and to check what has been said to them.  Articulate their ideas and thoughts in well-formed sentences.  Describe events in some detail.  Use talk to work out problems and organise thinking and activities. Explain how things work and why they might happen.  Use new vocabulary in different contexts.	<b><u>Listening, Attention and Understanding</u></b>  Make comments about what they have heard and ask questions to clarify their understanding.
<b>Physical development</b>		<b>Personal, Social and Emotional Development</b>
Make healthy choices about food, drink, activity and toothbrushing.	Know and talk about the different factors that support their overall health and wellbeing: - regular physical activity - healthy eating - toothbrushing - sensible amounts of 'screen time' - having a good sleep routine - being a safe pedestrian	<b><u>Managing Self</u></b>  Manage their own basic hygiene and personal needs, including dressing, going to the toilet and understanding the importance of healthy food choices.
<b>Understanding the world</b>		

## Science Skills & Vocabulary Coverage and Progression

Use all their senses in hands-on exploration of natural materials.  Explore collections of materials with similar and/or different properties.  Talk about what they see, using a wide vocabulary.  Begin to make sense of their own life-story and family's history.  Explore how things work.  Plant seeds and care for growing plants.  Understand the key features of the life cycle of a plant and an animal.  Begin to understand the need to respect and care for the natural environment and all living things.  Explore and talk about different forces they can feel.  Talk about the differences between materials and changes they notice.	Explore the natural world around them.  Describe what they see, hear and feel while they are outside.  Recognise some environments that are different to the one in which they live.  Understand the effect of changing seasons on the natural world around them.	<b><u>The Natural World</u></b>  Explore the natural world around them, making observations and drawing pictures of animals and plants.  Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class.  Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter.
--	---	---

## Science Skills & Vocabulary Coverage and Progression

### Key Stage 1 and 2 skills coverage and progression

	Years 1 & 2	Years 3 & 4	Years 5 & 6
	The principal focus of science teaching in key stage 1 is to enable pupils to experience and observe phenomena, looking more closely at the natural and humanly constructed world around them. They should be encouraged to be curious, ask questions about what they notice and develop their understanding of scientific ideas by using different types of scientific enquiry to answer their own questions.	The principal focus of science teaching in lower key stage 2 is to enable pupils to broaden their scientific view of the world around them. They should do this through exploring, talking about, testing and developing ideas about everyday phenomena and the relationships between living things and familiar environments, and by beginning to develop their ideas about functions, relationships and interactions.	The principal focus of science teaching in upper key stage 2 is to enable pupils to develop a deeper understanding of a wide range of scientific ideas. They should do this through exploring and talking about their ideas; asking their own questions about scientific phenomena; and analysing functions, relationships and interactions more systematically.
<b>Plan</b>	<b>Ask questions and plan enquiries</b>		
	Ask simple questions and recognise that they can be answered in different ways ( <i>types of enquiry including observing changes over time, noticing patterns, grouping and classifying, comparative and fair tests, using secondary sources</i> ).	Ask relevant questions and use different types ( <i>types of enquiry including observing changes over time, noticing patterns, grouping and classifying, comparative and fair tests, using secondary sources</i> ) of scientific enquiries to answer them.	Plan different types ( <i>types of enquiry including observing changes over time, noticing patterns, grouping and classifying, comparative and fair tests, using secondary sources</i> ) of scientific enquiries to answer questions, including recognising and controlling variables where necessary.
	<b>Set up enquires</b>		
	Perform simple tests.	Setting up simple practical enquiries, comparative and fair tests	Use test results to make predictions to set up further comparative and fair tests.
<b>Do</b>	<b>Observe and measure</b>		
	Observe closely, using simple equipment.  Identify and classify.	Make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers	Take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.
	<b>Record</b>		
	Gather and record data to help in answering questions.	Gather, record, classify and present data in a variety of ways to help in answering the questions.	Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs.

## Science Skills & Vocabulary Coverage and Progression

		Record findings using simple scientific language, drawings, labelled diagrams, bar charts, and tables.	
<b>Review</b>	<b>Interpret and report</b>		
	Identify and classify.  Use appropriate scientific language to communicate ideas.	Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions.  Identify differences, similarities or changes related to simple scientific ideas and processes.	Report and present findings from enquiries, including conclusions, causal relationships, in oral and written forms such as displays and other presentations, using appropriate scientific language.
	<b>Evaluate</b>		
	Use their observations and ideas to suggest answers to questions.	Use straightforward scientific evidence to answer questions or to support their findings.  Use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions.	Explain degree of trust in results.  Identify and evaluate scientific evidence (their own and others') that has been used to support or refute ideas or arguments.

## Science Skills & Vocabulary Coverage and Progression

### Key Stage 1 and 2 vocabulary coverage and progression

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>Plants</b>	Leaf, flower, blossom, petal, fruit, berry, root, seed, trunk, branch, stem, bark, stalk, bud  Names of trees in the local area  Names of garden and wild flowering plants in the local area	As for Year 1 plus light, shade, sun, warm, cool, water, grow, healthy	Photosynthesis, pollen, insect/wind pollination, seed formation, seed dispersal (wind dispersal, animal dispersal, water dispersal)			
<b>Animals, including humans</b>	Head, body, eyes, ears, mouth, teeth, leg, tail, wing, claw, fin, scales, feathers, fur, beak, paws, hooves Names of animals experienced first-hand from each vertebrate group  Parts of the body including those linked to PSHE teaching (see joint document produced by the ASE and PSHE Association)  Senses – touch, see, smell, taste, hear, fingers (skin), eyes, nose, ear and tongue	Offspring, reproduction, growth, child, young/old stages (examples - chick/hen, baby/child/adult, caterpillar/butterfly), exercise, heartbeat, breathing, hygiene, germs, disease, food types (examples – meat, fish, vegetables, bread, rice, pasta)	Nutrition, nutrients, carbohydrates, sugars, protein, vitamins, minerals, fibre, fat, water, skeleton, bones, muscles, joints, support, protect, move, skull, ribs, spine	Digestive system, digestion, mouth, teeth, saliva, oesophagus, stomach, small intestine, nutrients, large intestine, rectum, anus, teeth, incisor, canine, molar, premolars, herbivore, carnivore, omnivore, producer, predator, prey, food chain	Puberty – the vocabulary to describe sexual characteristics	Heart, pulse, rate, pumps, blood, blood vessels, transported, lungs, oxygen, carbon dioxide, nutrients, water, muscles, cycle, circulatory system, diet, exercise, drugs, lifestyle

## Science Skills & Vocabulary Coverage and Progression

<b>Materials</b>	Object, material, wood, plastic, glass, metal, water, rock, brick, paper, fabric, elastic, foil, card/cardboard, rubber, wool, clay, hard, soft, stretchy, stiff, bendy, floppy, waterproof, absorbent, breaks/tears, rough, smooth, shiny, dull, see-through, not see-through	Names of materials – wood, metal, plastic, glass, brick, rock, paper, cardboard  Properties of materials – as for Year 1 plus opaque, transparent and translucent, reflective, non-reflective, flexible, rigid  Shape, push/pushing, pull/pulling, twist/twisting, squash/squashing, bend/bending, stretch/stretching		Solid, liquid, gas, state change, melting, freezing, melting point, boiling point, evaporation, temperature, water cycle	Thermal/electrical insulator/conductor, change of state, mixture, dissolve, solution, soluble, insoluble, filter, sieve, reversible/non-reversible change, burning, rusting, new material	
<b>Seasonal changes</b>	Weather (sunny, rainy, windy, snowy etc.)  Seasons (winter, summer, spring, autumn)  Sun, sunrise, sunset, day length					
<b>Living things and their habitats</b>		Living, dead, never been alive, suited, suitable, basic needs, food, food chain, shelter, move, feed  Names of local habitats e.g. pond, woodland etc.  Names of micro-habitats e.g. under logs, in bushes etc.		Classification, classification keys, environment, habitat, human impact, positive, negative, migrate, hibernate	Life cycle, reproduce, sexual, sperm, fertilises, egg, live young, metamorphosis, asexual, plantlets, runners, bulbs, cuttings	Vertebrates, fish, amphibians, reptiles, birds, mammals, invertebrates, insects, spiders, snails, worms, flowering, non-flowering

### Science Skills & Vocabulary Coverage and Progression

<b>Rocks</b>			Rock, stone, pebble, boulder, grain, crystals, layers, hard, soft, texture, absorb water, soil, fossil, marble, chalk, granite, sandstone, slate, soil, peat, sandy/chalk/clay soil			
<b>Light</b>			Light, light source, dark, absence of light, transparent, translucent, opaque, shiny, matt, surface, shadow, reflect, mirror, sunlight, dangerous			As for Year 3 - Light, plus straight lines, light rays
<b>Forces</b>			Force, push, pull, twist, contact force, non-contact force, magnetic force, magnet, strength, bar magnet, ring magnet, button magnet, horseshoe magnet, attract, repel, magnetic material, metal, iron, steel, poles, north pole, south pole		Force, gravity, Earth, air resistance, water resistance, friction, mechanisms, simple machines, levers, pulleys, gears	

### Science Skills & Vocabulary Coverage and Progression

<b>Electricity</b>				Electricity, electrical appliance/device, mains, plug, electrical circuit, complete circuit, component, cell, battery, positive, negative, connect/connections, loose connection, short circuit, crocodile clip, bulb, switch, buzzer, motor, conductor, insulator, metal, non-metal, symbol		Circuit, complete circuit, circuit diagram, circuit symbol, cell, battery, bulb, buzzer, motor, switch, voltage
<b>Earth and space</b>					Earth, Sun, Moon, (Mercury, Jupiter, Saturn, Venus, Mars, Uranus, Neptune), spherical, solar system, rotates, star, orbit, planets	
<b>Evolution and inheritance</b>						Offspring, sexual reproduction, vary, characteristics, suited, adapted, environment, inherited, species, fossils
