

Dear Parent/Carer

Date

During this current part of the pandemic, dentists in England are open to see patients with urgent problems.

If your son or daughter does have a dentist we recommend that you make an appointment if you think they are experiencing problems with their teeth.

Your child may be eligible for treatment within the Community Special Care Dental Service which provides care for many people of all ages with certain special needs.

If you think your child needs an urgent dental assessment at a Community Special Care Dental Clinic please fill in the form below, and return it to Mrs Alison Beard at the above address.

You can find details of local dentists online at www.nhs.uk, then click Services near you (dentists) or call the new national NHS number: 111.

Yours sincerely,

Dr Rob Hale
Consultant in Special Care Dentistry
Clinical Director – Dental Care Group
