

MEAN

'The mean is the total of the numbers divided by how many numbers there are.'

The mean average is not always a whole number.

To work out the mean:

Add up all the numbers.

$$7 + 9 + 11 + 6 + 13 + 6 + 6 + 3 + 11 = 72$$

Divide the answer by how many numbers there are.

There are 9 numbers.

$$72 \div 9 = 8$$

So the mean value is 8.

1) 8, 1, 10, 1

mean =

2) 12, 8, 6, 3, 7, 4

mean =

3) 12, 8

mean =

4) 9, 3, 9

mean =

5) 10, 4, 5, 2, 3

mean =

6) 15, 10, 10, 5, 10

mean =

7) 8, 4, 12, 8, 8

mean =

8) 40, 30, 20,

mean =

9) 5, 2, 4, 1, 2, 4

mean =

10) 4, 8, 5, 9, 9

mean =
