

Growing Plants

Today we will be...

Observing and describing how a plant changes as it matures.

I grew some sunflower sprouting seeds!
How have they changed?
Are they fully grown yet?

Think,
pair,
share
your
ideas

Day 1

Day 5

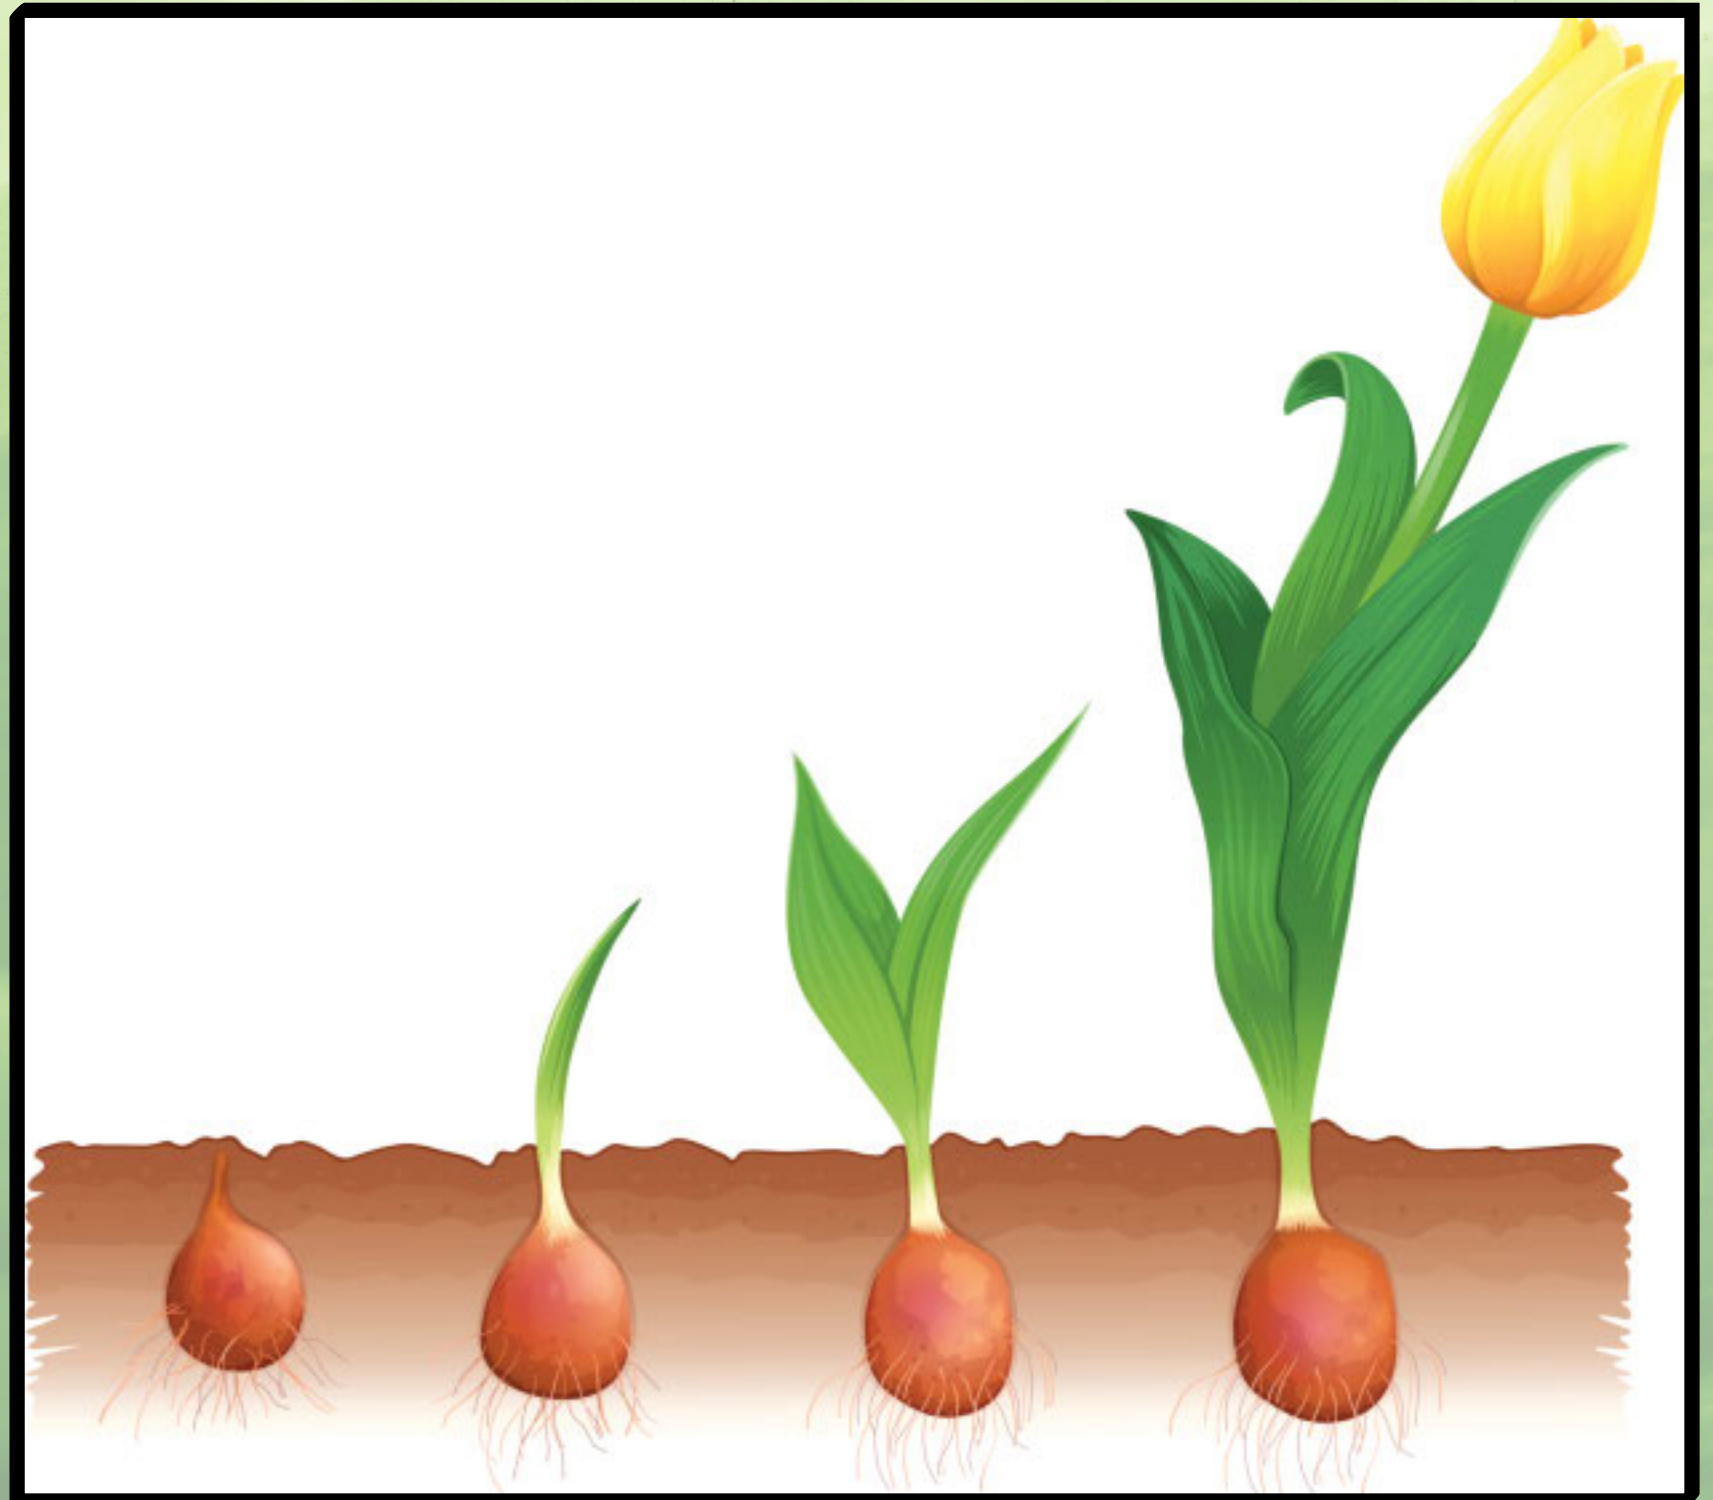

Look at the seeds or the
bulbs you have grown.
How have they changed?

Think, pair, share your ideas

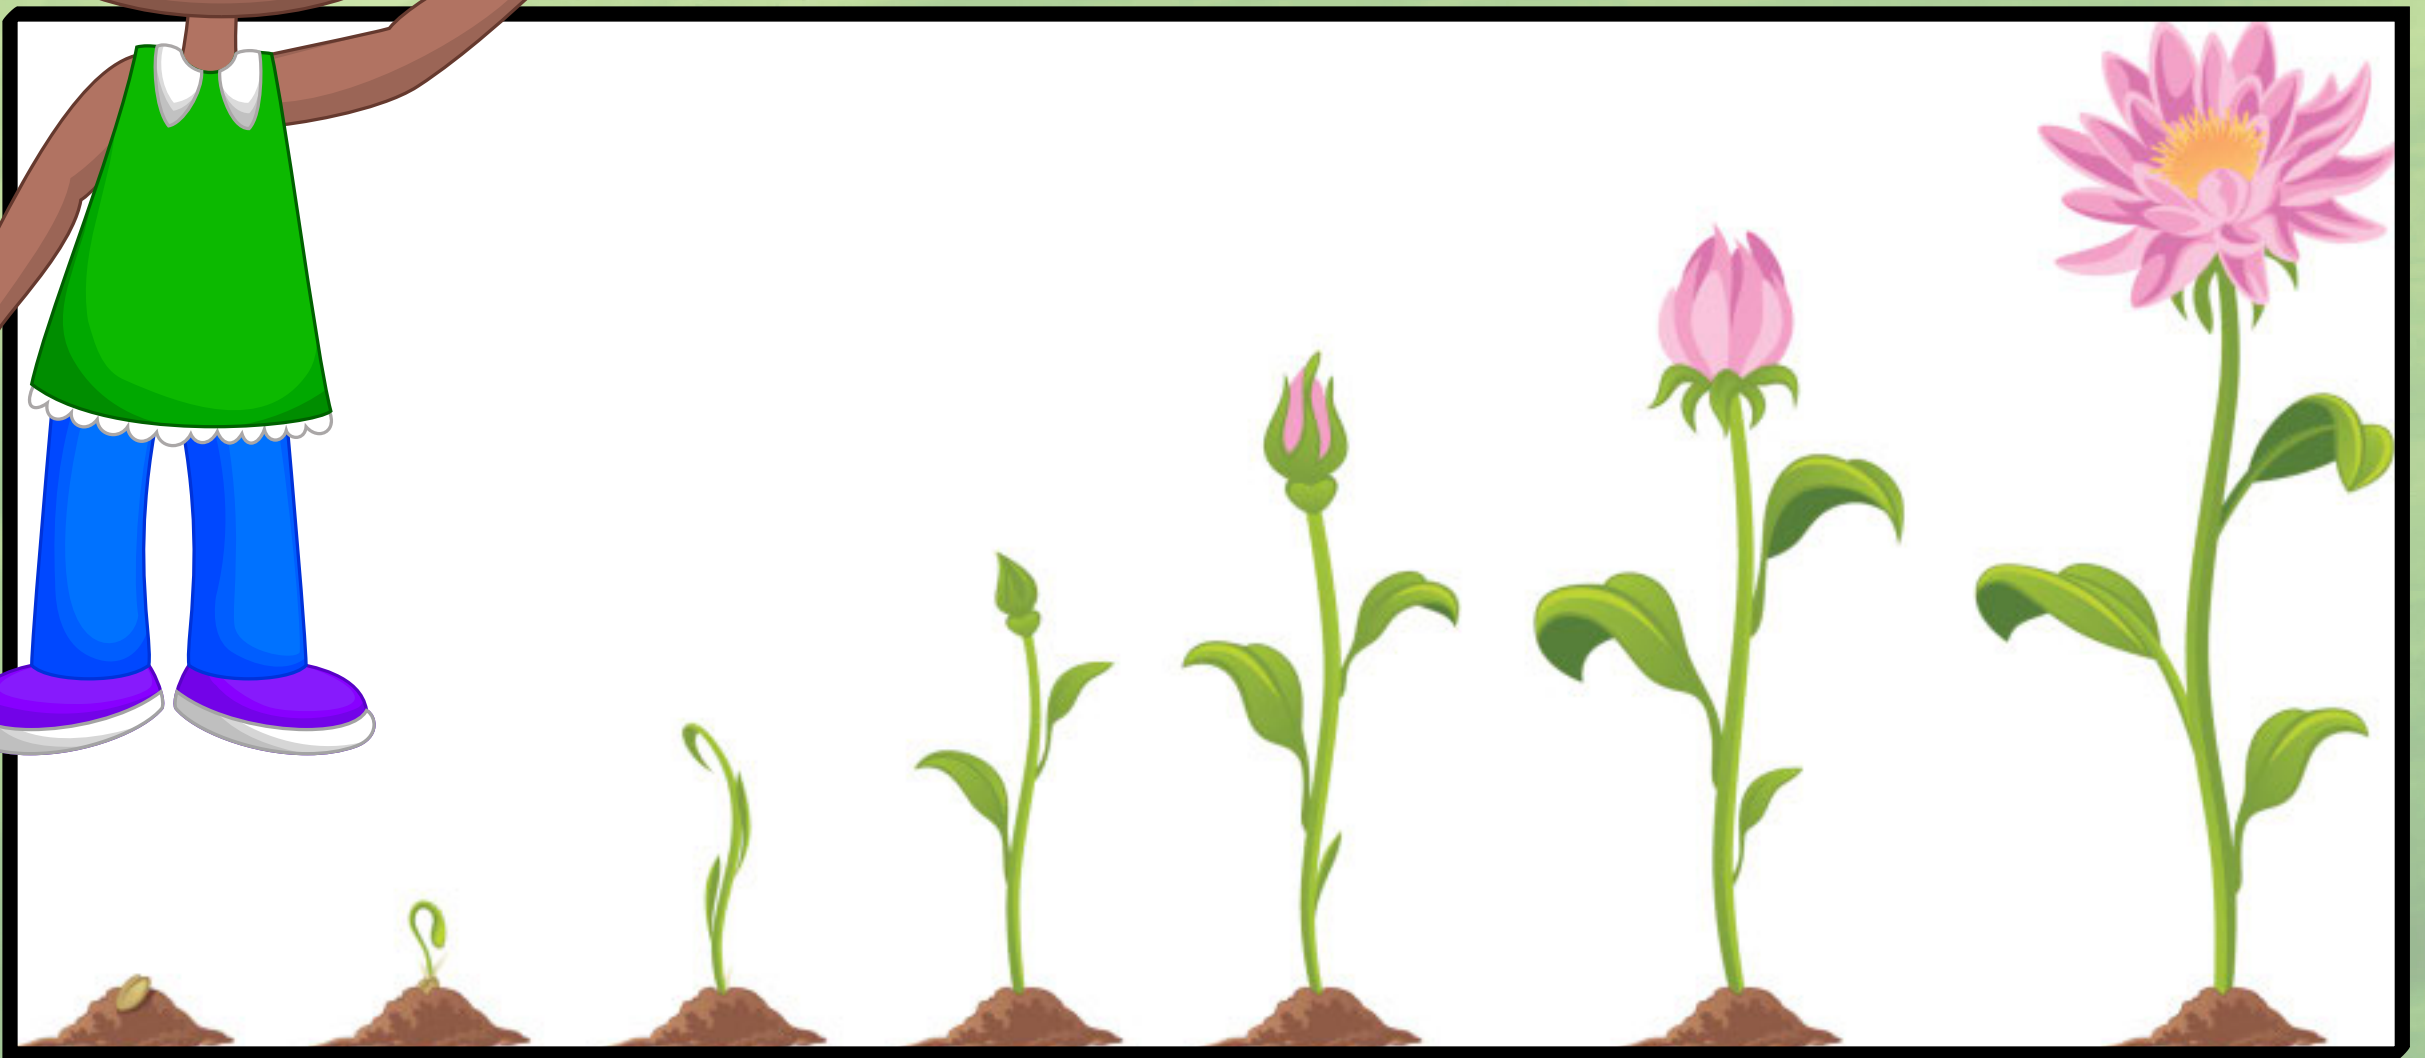

Has this plant grown from a seed or a bulb?
Can you explain how it has changed?

Think, pair,
share your
ideas

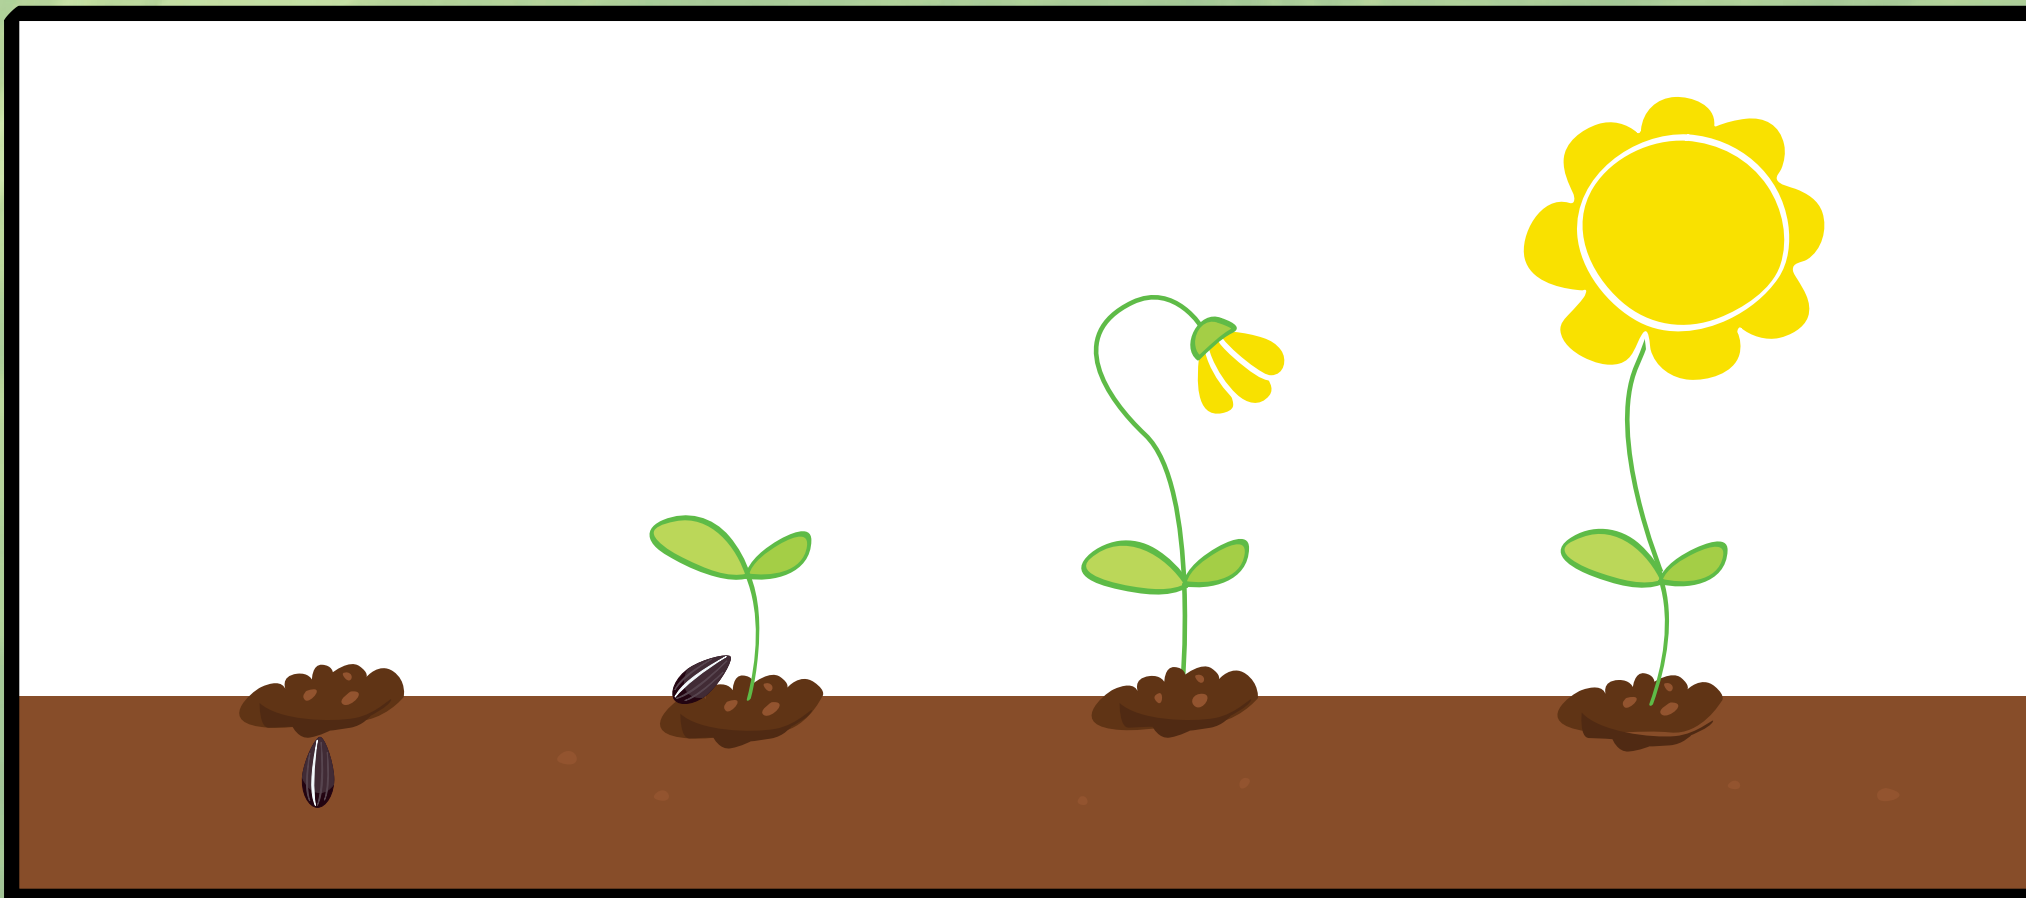

Has this plant grown from a seed
or a bulb?
Can you explain how it has
changed?

Think, pair, share your ideas

Has this plant grown from a
seed or a bulb?
Can you explain how it has
changed?

Think, pair, share your ideas

Watch the Time Lapse Video.

This video has been speeded up so that it is easier to see the plants growing. Our plants will have been growing, just like these plants. Can you describe and explain what is happening?

Go outside to look at the plants.
See if you can name any of them.

Do you think the
plants grew from a
seed or a bulb?

How long ago do you
think the plants were
seeds? Have they finished
growing now?
