

St Aidan's Catholic Primary School

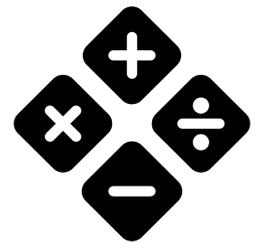

School Development Plan

2024 - 2025

Maths

We are consistently implementing a common approach to the teaching of maths across all our year groups, so that all our children are achieving their full potential. Our pupils are fully engaged in their maths lessons. Our staff are highly confident in the maths scheme's systematic coverage of our maths curriculum. Our teachers and leaders are highly skilled in the impact of assessment and feedback to further improve every child's attainment in maths.

Pedagogy

We are clear in our shared understanding and use of pedagogical strategies. Our children benefit from a range of teaching strategies that secure their learning. Our staff apply our defined strategies for teaching throughout lessons, making choices that are informed by our aim to help our children know more and remember more. Our teachers and leaders support each other to make sure our school's approach to teaching and learning is coherent, consistent and effective.

Coaching

We are a school where we are all learners. Our children review their learning and respond to feedback from our staff demonstrating excellent learning behaviours. Our staff engage in professional development, learning scrutiny and academic reviews that support all of us to grow as practitioners. Our teachers and leaders sustain the conditions necessary for every individual to flourish.
