

Key concepts that will be covered

Numbers to 1 000 000

We will be looking at numbers and their place value to 1 000 000. We will learn to read and write numbers to 100 000, quickly moving onto numbers to 1 000 000. We will use concrete materials to represent numbers to 1 000 000, including number discs and place-value charts. We will learn to compare numbers to 1 000 000 using our knowledge of place value. We will explore number patterns and learn to round numbers to the nearest 10, 1000, 10 000 and 100 000.

Show 59 725 using number discs.

ten thousands	thousands	hundreds	tens	ones
5	9	7	2	5

I can't just use  .
I need to use    and  as well.

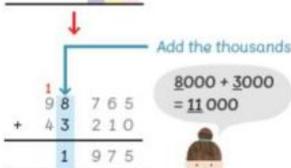

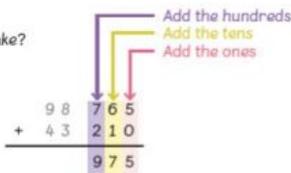

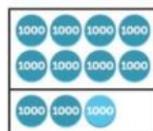

Whole Numbers: Addition and Subtraction

We will be exploring addition and subtraction of numbers to 1 000 000. We will learn to use simple strategies to add and subtract, such as counting on and counting back. We will then focus on adding within 1 000 000 and subtracting within 1 000 000. We will learn to use a range of methods, such as the column method and number bonds to add and subtract numbers. We will use concrete materials to improve our visualisation and mental skills.

 makes $\begin{array}{|c|c|c|c|c|} \hline 9 & 8 & 7 & 6 & 5 \\ \hline \end{array}$.

Is this the largest total we can make?

Arithmetic

Counting

Count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000.

Count on from 34 642 in hundreds.

What four numbers would come next in this counting sequence? 422 734, 412 734...

Count forwards or backwards in decimal steps.

Continue this count: 4.4, 3.8, 3.2...

What four numbers would come next in this counting sequence? 2.16, 2.27, 3.38...

Find 0.01, 0.1, 1, 10, 100, 1000 and other powers of 10 more or less than a given number.

$$154\ 041 - 100 \quad 474\ 985 + 1\ 000$$

$$202\ 883 - 10\ 000 \quad 23.47 + 0.1 \quad 6.07 - 0.1$$

$$31.09 + 0.01$$

Number Facts

Recall addition and subtraction facts for 1 and 10 (with numbers to one decimal place).

$$0.6 + 0.4 = \underline{\quad} \quad 0.2 + \underline{\quad} = 1 \quad 1 = \underline{\quad} + 0.5 \quad 1$$

$$- 0.3 = \underline{\quad} \quad 1 - \underline{\quad} = 0.1 \quad 0.7 = 1 - \underline{\quad}$$

Recall related tables facts for multiples of 10

$$70 \times 6 \quad 8 \times 40 \quad 90 \times 6$$

Recall prime numbers up to 19

Instantly know the prime numbers 2, 3, 5, 7, 11, 13, 17 and 19

Recall square (2) numbers up to 12×12

Instantly know the square of all numbers to 12:

$$1^2 = 1, 2^2 = 4, 3^2 = 9, 4^2 = 16, 5^2 = 25, 6^2 = 36, 7^2 = 49, 8^2 = 64, 9^2 = 81, 10^2 = 100, 11^2 = 121 \text{ and } 12^2 = 144$$

Key concepts that will be covered

Arithmetic

Whole Numbers: Multiplication and Division

We will be learning to multiply and divide 3-digit and 4-digit numbers by single-digit and double-digit numbers. We will be finding and defining multiples, factors and common factors. We will begin to work with prime numbers and determine what makes a number prime or composite. We will then learn about square and cube numbers before moving on to multiplying and dividing by 10, 100 and 1000. We will be using a variety of methods, including: number bonds, column methods and the grid method.

Find the factors of 9 and 12.

$$9 = \textcircled{1} \times 9$$

$$9 = \textcircled{3} \times 3$$

$$12 = \textcircled{1} \times 12$$

$$12 = 2 \times 6$$

$$12 = \textcircled{3} \times 4$$

The common factors of 9 and 12 are 1 and 3.

3 is a factor of 9 and 12.

3 is a common factor of 9 and 12.

..... or 

.....
.....
.....

.....
.....
.....

Whole Numbers: Word Problems

We will be challenging ourselves to apply our learning of all four operations to solve multiple step word problems. We will be using the bar model and other visual representations to help visualise word problems.

made 12 batches of

She packed all the cupcakes into bags.

What if each bag has 20 cupcakes? How many bags did she need?

What if each bag has 35 cupcakes? How many bags did she need?

What if each bag has 55 cupcakes? How many bags did she need?

Mental Calculation Strategies – Addition and Subtraction

Derive and use addition and subtraction facts for 1 (with decimal numbers to two decimal places)

$$0.45 + \underline{\quad} = 1 \quad \underline{\quad} + 0.27 = 1 \quad 1 = 0.39 + \underline{\quad}$$

$$1 = \underline{\quad} + 0.78 \quad 1 - 0.08 = \underline{\quad}$$

Partition and combine multiples of thousands, hundreds, tens and ones.

$$4300 + 1400 \quad 4300 \text{ add } 1000 = 5300 \text{ then add } 400 = 5700$$

$$364 + 250 \quad 364 \text{ add } 200 = 564 \text{ then add } 50 = 614$$

$$3600 - 1200 \quad 3600 \text{ subtract } 1000 = 2600 \text{ then subtract } 200 = 2400$$

Partition and combine multiples of ones and tenths.

$$5.4 + 3.2 \quad 5.4 \text{ add } 3 = 7.4 \text{ then add } 0.2 = 7.6$$

$$4.7 - 2.5 \quad 4.7 \text{ subtract } 2 = 2.7 \text{ then subtract } 0.5 = 2.2$$

Identify and use knowledge of number bonds within a calculation and identify related facts, e.g. $1.5 + 2.7$ from $15 + 27$

$$1.2 + 0.8 \quad \text{using knowledge of } 12 + 8 = 20$$

$$2.5 + 1.3 \quad \text{using knowledge of } 25 + 13 = 38$$

$$3.8 + 4.5 \quad \text{using knowledge of } 38 + 45 = 83$$

Bridge through 10 when adding or subtracting a single digit number (partitioning, e.g. $58 + 5 = 58 + 2 + 3$ or $76 - 8 = 76 - 6 - 2$)

$$1995 + 278 \quad \text{as } 1995 + 5 + 273 = 2000 + 273$$

$$703 - 128 \quad \text{as } 703 - 3 - 125 = 700 - 125$$

Find differences by counting up through the next multiple of 1, 10, 100 or 1000

$$604 - 289 \quad 289 + 11 = 300 + 300 = 600 + 4 = 604 \text{ so the difference is } 315$$

$$523 - 160 \quad 160 + 40 = 200 + 300 = 500 + 23 = 523 \text{ so the difference is } 363$$

Add or subtract a multiple of 10 and adjust (for those numbers close to multiples of 10)

$$325 + 298 \quad \text{as } 325 + 300 - 2 = 625 - 2$$

$$764 - 88 \quad \text{as } 764 - 90 + 2 = 674 + 2$$

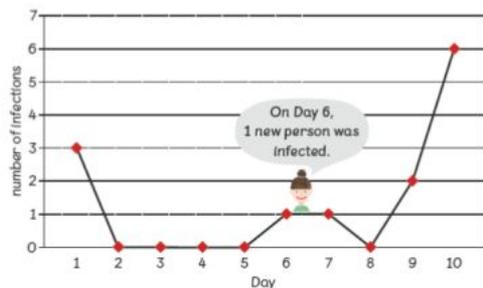

Key concepts that will be covered

Arithmetic

Graphs

We will be learning to read and interpret information in tables and in line graphs. We will be deepening our understanding of time as we read increasingly complex timetables. We will be comparing line graphs and bar graphs.

How many people had been infected by Day 10?

Day	1	2	3	4	5	6	7	8	9	10
Cases	3	0	0	0	0	1	1	0	2	6

Fractions

We will be learning to use more diverse problems involving fractions, including dividing and multiplying fractions by whole numbers. We will be supporting our learning with concrete apparatus and diagrams to help visualise fractions. We will learn to add and subtract fractions with different denominators and fractions represented with mixed numbers and improper fractions. We will begin to multiply fractions by whole numbers and multiply mixed numbers by whole numbers. We will solve problems involving fractions using the bar model.

$\frac{1}{9}$

$\frac{1}{3}$

$\frac{1}{3} = \frac{3}{9}$

$\frac{1}{9} + \frac{1}{3} = \frac{1}{9} + \frac{3}{9} = \frac{4}{9}$

1 ninth + 1 third is not 2 ninths or 2 thirds!

We need to make both the same 'type' of fractions before adding.

1 ninth + 3 ninths = 4 ninths

Mental Calculation Strategies – Multiplication and Division
Multiply/divide whole numbers and decimals by 10, 100 and 1000

$$75.91 \times 10 \quad 874 \div 10 \quad 5.07 \times 10 \quad 60.1 \div 10$$

$$670.4 \times 100 \quad 7043 \div 100 \quad 360 \times 1000 \quad 48\,750 \div 1000$$

Use related facts to multiply Th000 by a one-digit number and

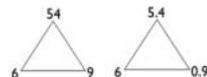

divide a ThH00 by a one-digit number

$$3000 \times 3 \text{ related to } 3 \times 3 = 9$$

This should be understood as 'three thousand threes'.

As the number of 3s is 1000x greater than three threes, so the product is 1000x greater.

Use related facts to multiply 0.t by a one-digit number

$$0.3 \times 7 \text{ related } 3 \times 7 = 21$$

The number of 7s is 10x less, so the product will be 10x less.

$$0.6 \times 9 \quad 0.5 \times 4$$

Use factor pairs to multiply T0 x T0

30 x 60 becomes $3 \times 10 \times 6 \times 10$ reordered as $3 \times 6 \times 10 \times 10$

70 x 80 becomes $7 \times 10 \times 8 \times 10$ reordered as $7 \times 8 \times 10 \times 10$

Use compensation to multiply H99 by a one-digit number

599 x 4 considered as $600 \times 4 - 1 \times 4$ (read as 'six hundred fours subtract one four')

399 x 6 considered as $400 \times 6 - 1 \times 6$ (read as 'four hundred sixes subtract one six')

699 x 9 considered as $700 \times 9 - 1 \times 9$ (read as 'seven hundred nines subtract one nine')

Key concepts that will be covered

Decimals

We will be learning to read and write decimals to thousandths, using concrete apparatus to support our learning. We will order decimals using our understanding of place value. We will explore the link between hundredths and thousandths written as fractions and decimals. We will apply our understanding of addition and subtraction to add and subtract decimals.

Write 0.4 as a fraction.

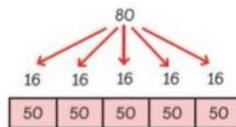

0.4 is also 40 hundredths.

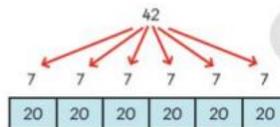

Percentage

We will learn to link hundredths to other equivalent fractions. We will then understand how other fractions can be shown as 'out of 100' and write this as both a decimal and percentage. We will then calculate percentages.

For every 50 pupils, 16 got an A. For every 100 pupils, 32 got an A.

32%

For every 20 pupils, 7 got an A. For every 100 pupils, 35 got an A.

35%

I think Gamma School did the best.

Arithmetic

Mental Calculation Strategies – Multiplication and Division

Use partitioning to multiply U.t by a one-digit number

6.7×4 becomes $6 \times 4 + 0.7 \times 4$

3.2×7 becomes $3 \times 7 + 0.2 \times 7$

8.5×6 becomes $8 \times 6 + 0.5 \times 6$

Use partitioning to double or halve numbers including those with two decimal places

Double 56.7

Find half of 4.62

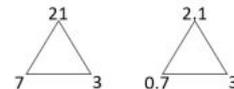

Double 485.6

Find half of 18.46

Use related facts to divide U.t by a one-digit number

e.g. $21 \div 7 = 3$ then $2.1 \div 7 = 0.3$

Use related facts to divide U.t by a 0.t

$2.1 \div 0.7$ related to $21 \div 7 = 3$

This should be understood as 'how many 0.7s in 2.1? Compared to how many sevens in 21?'

Use partitioning to divide HTU by a one-digit number

$756 \div 9$ By partitioning into 720 and 36 (two multiples of 9 totalling 756)

$765 \div 5$ By partitioning into 500 and 250 and 15 (three multiples of 5 totalling 765)

$861 \div 7$ By partitioning into 700 and 140 and 21 (three multiples of 7 totalling 861)

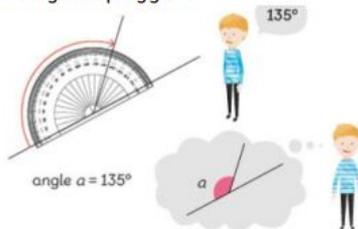

Key concepts that will be covered

Arithmetic

Geometry

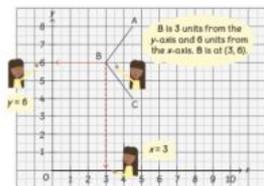

We will be learning how to measure angles in degrees using a protractor. We will explore the angles that make 180° or a straight line and those that make a full turn. We will practice drawing lines and angles accurately and use this to create accurate drawings of 2D shapes. We will apply our understanding of angles to solve problems involving angles. We will learn what a polygon is and be able to name regular polygons.

Position and Movement

We will be embedding our understanding of writing co-ordinates of points. We will understand how to translate and reflect shapes on a grid. We will be able to solve problems involving translations and reflections of shapes.

What are the coordinates of A, B and C?

Measurement

We will embed our understanding of how to convert between different units of length, mass and time. We will learn to use negative numbers when reading scales, such as thermometers. We will solve problems involving measurements.

3 years 8 months = months

1 year = 12 months

3 years = 3×12 months

= 36 months

3 years 8 months = 36 months + 8 months

= 44 months

's baby brother is older by 6 months.

38 months = years months

Method 1

Progression Towards Written Calculation Strategies – Addition

$5 + 8 = 13$, put 3 down and carry the 10 (written as a 1 in the tens column)

$20 + 40 + 10$ that was carried over = 70 (7 written in the tens column)

$600 + 0 = 600$ (6 written in the hundreds column)

Children will be expected to use this method for adding numbers with up to seven digits, numbers involving decimals and adding any number of amounts together.

HTU			321	
625	367	+	7	£3.48
+ 48	+ 85	+	48	+ £0.78
<u>673</u>	<u>452</u>	<u>376</u>	<u>£4.26</u>	
1	11	1	11	

Progression Towards Written Calculation Strategies – Subtraction

Children will be expected to use this method for subtracting numbers with up to seven digits and numbers involving decimals.

The example shown would be explained as follows:

We are subtracting 86 from 754. Start with the least significant place value column.

Are there enough hundredths to subtract 3 hundredths?

No – so let's exchange a tenth from the tenths column for ten hundredths. 2 tenths and 0 hundredths becomes 41 tenth and 10 hundredths.

10 hundredths subtract 3 hundredths = 8 hundredths

Are there enough tenths to subtract 8 tenths?

No – so let's exchange a one from the ones column for ten tenths.

1 one and 1 tenth becomes 0 ones and 1 tenths.

11 tenths subtract 8 tenths = 3 tenths.

Are there enough ones to subtract 4 ones?

No – so let's exchange a ten from the tens column for ten ones. 5 tens and 0 ones becomes

4 tens and 10 ones $10 - 4 = 6$

4 tens (40) – 0 tens = 4 tens (40)

Answer 46.37

$$\begin{array}{r} 4 \quad 10 \quad 11 \quad 1 \\ 51.20 \\ - 4.83 \\ \hline 46.37 \end{array}$$

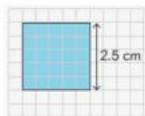

Key concepts that will be covered

Arithmetic

Area and Perimeter

We will embed our understanding of how to calculate area and perimeter of shapes. We will be learning how to use scale diagrams to find the area and perimeter of figures. We will understand how to estimate area and when this might be useful.

I drew this.

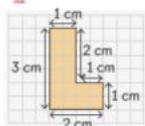

$$2.5 + 2.5 + 2.5 + 2.5 = 10$$

Perimeter = 10 cm

$$4 \times 2.5$$

I drew this.

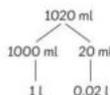

$$3 + 2 + 1 + 1 + 2 + 1 = 10$$

Perimeter = 10 cm

Volume

We will be learning how to find the volume of solid shapes. We will explore how we can find and compare the capacity of cuboids. We will understand how to convert between units of measurement for volume, estimate volume and solve word problems involving volume.

Write the volume in litres. Use decimals.

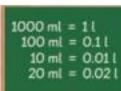

$$1020 \text{ ml} = 1.02 \text{ l}$$

$$1\frac{2}{5} = 1 + \frac{4}{10} = 1.4$$

$$1\frac{2}{5} \text{ l} = 1.4 \text{ l}$$

$$1.02 \text{ l} < 1.2 \text{ l} < 1.4 \text{ l}$$

$$1 \text{ l} = 1000 \text{ ml}$$

Roman Numerals

We will be learning to read and write Roman numerals up to 1000 and writing years in this way.

Roman numerals are based on seven symbols.

I = 1	X = 10
V = 5	C = 100
L = 50	D = 500
	M = 1000

How do we write all multiples of 100 less than 1000?

Progression Towards Written Calculation Strategies – Multiplication

As the grid method for multiplication supports children's number sense and appreciation of the values of each digit, schools can decide if this is the final stage of written multiplication.

4.92 × 3

$$\begin{array}{r} \times \quad 4 \quad 0.9 \quad 0.02 \\ 3 \quad \boxed{12} \quad \boxed{2.7} \quad \boxed{0.06} \end{array}$$

$$\begin{array}{r} 12 \\ + 2.7 \\ + 0.06 \\ \hline 14.76 \end{array}$$

72 × 38

$$\begin{array}{r} \times \quad 70 \quad 2 \\ 30 \quad \boxed{2100} \quad \boxed{60} \\ 8 \quad \boxed{560} \quad \boxed{16} \end{array}$$

$$\begin{array}{r} 2100 \\ + 560 \\ + 60 \\ + 16 \\ \hline 2736 \end{array}$$

Progression Towards Written Calculation Strategies – Division

$$\begin{array}{r} 32 \text{ r}4 \\ 6 \overline{) 196} \\ \underline{- 180} \quad 30x \\ 16 \\ \underline{- 12} \quad 2x \\ 4 \end{array}$$

$$\begin{array}{l} 1x = 6 \\ 2x = 12 \\ 5x = 30 \\ 10x = 60 \\ 20x = 120 \end{array}$$

$$\begin{array}{r} 640 \text{ r}2 \\ 8 \overline{) 5122} \\ \underline{- 4800} \quad 600x \\ 322 \\ \underline{- 320} \quad 40x \\ 2 \end{array}$$
