

Maths Ambassadors

"Mathematics is not about numbers, equations, computations, or algorithms: it is about understanding."

— William Paul Thurston

Who Are They?

Each class has a Maths Ambassador and they work together as a team with the Maths Staff Team. The Ambassadors each have a fabulous attitude to maths and are so keen to help others to improve their own maths skills, knowledge and understanding.

What They Do?

During Parent Consultations and Curriculum Café sessions, our amazing Maths Ambassadors, share some great activities to engage children and parents from across the school in maths activities. This includes games, puzzles and the use of online resources. They help children and parents to better understand areas of maths that they had previously found difficult.

How They Make A Difference?

As part of their role they:

- Celebrate maths achievements across school.
- Introduce competitions and new ideas.
- Raise the profile of maths in school
- Lead activities relating to maths.
- Give other pupils a voice and help them to share their ideas.
- Support other members of our school community in maths.

Striving for Excellence, Inspired by Gospel Values
