

We are reaching out with some good news: having read through the self-assessment and evidence submitted for your educational establishment via the Computing Quality Framework, we are delighted to confirm that St Andrew's Church of England Primary School, Chinnor has demonstrated the required level of attainment and can therefore be awarded the NCCE Computing Quality Mark for excellence in computing curriculum delivery.

Once again, congratulations on achieving the CQM!

Kind Regards,

The Computing Quality Framework Team

National Centre for Computing Education (NCCE)
