

When the farm visited,  
We also made models and pots out of newspaper so that we could plant different types of beans.  
We made sandwiches and painted fantastic pictures.  
It was a great day.

### Forest School

Huge slimy slugs, super-fast beetles and millipedes were found under the logs

The trees were great for climbing and made deep dark places to explore.

Using grass and leaves and things which make us sneeze.....we created lotions and potions and magic spells.

Plants were cut and observed and tools were handled with care.

Just some of the things we chose to do!
