

## St. Andrew's CE Primary School - Pupil Newsletter

Issue 6: Summer Term 2 2018

To all the pupils of St. Andrew's CE Primary School,

This newsletter is for you! It is run by some year 6 pupils and school councillors. If you would like something to feature in the newsletter please email:

[scou3182@st-andrews.oxon.sch.uk](mailto:scou3182@st-andrews.oxon.sch.uk)

We can't guarantee to print everything but we will try our best!

Welcome to the St Andrew's Term 3 school newsletter.

As we are sure you'll know, the art show is coming up and we are expecting great works of art. Let those creative juices flow! The theme this year is 'underwater'. We look forward to seeing you at the Craft Day!

Here is a sneak peak of what you will see on Craft Day at the Art Exhibition...

This term Foundation Stage have been busy! They have been listening to and learning about the fabulous classic tale of The Three Little Pigs. In addition to this, they had fun building straw and stick houses fit to live in (if you were small!). To match the houses, they made lovely tally charts of the houses they live in.

To protect the wild animals, they came out of the classroom to take part in Forest School where they made animal homes. How lovely!

Which will be the best 'cement'?

Mashed potato, beans, spaghetti hoops or shaving foam.

Argh, me hearties! Year 1 have been learning a lot about the legend of the great people who stole gold and silver on the Seven Seas. You guessed it...Pirates! They have had a lot of fun doing pirate activities, such as colouring great sunken maps. They even made a pirate ship!

Can you complete our pirate puzzle?

## St. Andrew's CE Primary School - Pupil Newsletter

This term Year 3 have been having great fun learning how to country dance. The children have also been making soup out of healthy vegetables. The class enjoyed chopping up the vegetables and frying them, before adding stock. Most of the class loved trying the soup, which was lovely and warming. In science, we put tablets in film canisters and added water. Some of them exploded and flew into the air. It was very exciting.

There have been some strange and 'fishy' goings on in Year 5 this term. They have been studying Earth in Space in science and shedding some light onto the causes of night and day.

The children are getting ready for the art show, too. Here they are turning unwanted plastics into fabulous fish, and scrap fabrics into a large and a lovely wall hanging.

Year 6 took part in an RE inspired session discussing personal responses to death and the process of grief. They considered the Christian perspective on life and death and thought about how life on earth can be seen as only part of a journey.

They have also designed and made their own delicious quiches to take home for their families to devour and evaluate!

In science the children have been studying evolution and inheritance. They researched Charles Darwin and looked at characteristics they have inherited from their family members.

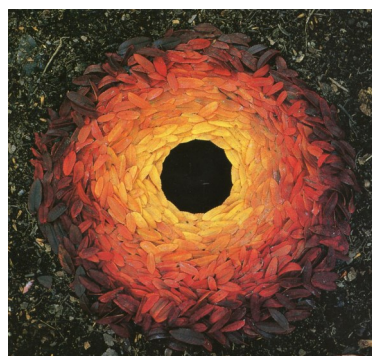

In Year 4, the children have been learning about animals (including Humans) in Science. They have been studying the digestive systems and diets of different groups of animals and conducted a scientific investigation with eggs - on how different drinks effect our teeth.

For their R.E. topic of Judaism, Year 4 had an exciting visit from a Jewish Rabbi. He taught them about the importance of two Jewish festivals: Shabbat and Passover. The children's favourite part was trying the variety of foods eaten at these celebrations!

Year 2 have made rain gauges as part of their Science unit on seasons and weather.

The children have also been doing art in the outdoor environment inspired by Andy Goldsworthy.
