

ST ANTHONY'S CATHOLIC PRIMARY SCHOOL

Science Overview

Year A	Intent <ul style="list-style-type: none">▶ At St. Anthony's our intent is to make science fun and engaging by providing children with the opportunity to question, investigate and draw conclusions.▶ We want all children to become scientifically minded and enthused by the wonders of science and strive to equip them with the tools and confidence to become scientists of the future, setting them on a journey where they are constantly inspired by the world around them.▶ Starting with an understanding of the world, through practical exploration and valuable experiences, children will progress onto developing their ability to work scientifically and challenge ideas through questioning and investigation.		Implementation <ul style="list-style-type: none">▶ Children are engaged, inspired and challenge ideas.▶ Children have good, appropriate resources to select from.▶ Children have opportunities to be inquisitive and independently explore and investigate.▶ Work confidently and independently.▶ Enhance scientific enquiry through questioning.		Impact <ul style="list-style-type: none">▶ Children will record their knowledge of Science in various ways reflecting a good understanding of working scientifically.▶ They will be able to access any unit of science through applying learnt skills.▶ Work will be monitored and assessed at the end of each unit to ensure progress is made and to inform future planning.	
	 Autumn		 Spring		 Summer	
EYFS	My body - body parts and senses Autumn - Seasonal changes - observing what they see, feel and hear while outside		Winter - Understanding the effect of changing Seasons - interacting with natural processes	Spring - seasonal changes Science experiments Investigating cause and effect	Minibeasts and lifecycles Plants - observing changes over time STEM challenges	Growing - themselves and the natural world Shadows
			STEM - In the kitchen	STEM - Toys	STEM - Sorting Technology	STEM - Technology in Jobs
Year 1/2	Humans <ul style="list-style-type: none">• Identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.• Recognise that humans are animals.• Compare and describe the differences in their own features (eye, hair, skin colour etc.)• Recognise that humans have many similarities.	Humans <ul style="list-style-type: none">• Notice that humans have offspring which grow into adults.• Find out about and describe the basic needs of humans for survival.• Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene.• Medicines can be useful when we are ill.• Medicines can be harmful if not used properly.	Scientists and inventors <ul style="list-style-type: none">• Find out about the work of famous scientists (historical and modern day).• Use simple and appropriate secondary sources (such as books, photographs and videos) to find things out.• Ask people questions.	Working Scientifically <ul style="list-style-type: none">• Asking simple questions and recognising that they can be answered in different ways.• Observing closely, using simple equipment.• Performing simple tests.• Identifying and classifying.• Using their observations and ideas to suggest answers to questions.• Gathering and recording data to help in answering questions.	Plants <ul style="list-style-type: none">• Identify and name a variety of common wild and garden plants, including deciduous and evergreen trees.• Identify and describe the basic structure of a variety of common flowering plants, including trees.	Plants <ul style="list-style-type: none">• Observe and describe how seeds and bulbs grow into mature plants.• Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.• Plants are living and eventually die.
	Seasonal Changes to be covered across the year.					
Year 3/4	Animals including Humans <ul style="list-style-type: none">• identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat• identify that humans and some other animals have skeletons and muscles for support, protection and movement• describe the simple functions of the basic parts of the digestive system in humans• identify the different types of teeth in humans and their simple functions		States of Matter <ul style="list-style-type: none">• compare and group materials together, according to whether they are solids, liquids or gases• observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this	Forces and Magnets <ul style="list-style-type: none">• compare how things move on different surfaces• notice that some forces need contact between 2 objects, but magnetic forces can act at a distance• observe how magnets attract or repel each other and attract some materials and not others	Plants <ul style="list-style-type: none">• identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers• explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant	STEM

	<ul style="list-style-type: none">construct and interpret a variety of food chains, identifying producers, predators and prey		<p>happens in degrees Celsius (°C)</p> <ul style="list-style-type: none">identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature	<ul style="list-style-type: none">compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materialsdescribe magnets as having 2 polespredict whether 2 magnets will attract or repel each other, depending on which poles are facing	<ul style="list-style-type: none">investigate the way in which water is transported within plantsexplore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal	
Year 5/6	<p>Earth and Space</p> <ul style="list-style-type: none">describe the movement of the Earth and other planets relative to the sun in the solar systemdescribe the movement of the moon relative to the Earthdescribe the sun, Earth and moon as approximately spherical bodiesuse the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky.	<p>Light</p> <ul style="list-style-type: none">that light appears to travel in straight linesuse the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyeexplain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyesuse the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them	<p>Working Scientifically</p> <ul style="list-style-type: none">Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary.Taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate.Recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphsUsing test results to make predictions to set up further comparative and fair tests.Reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations.Identifying scientific evidence that has been used to support or refute ideas or arguments.	<p>Forces and Magnets</p> <ul style="list-style-type: none">explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling objectidentify the effects of air resistance, water resistance and friction, that act between moving surfacesrecognise that some mechanisms including levers, pulleys and gears allow a smaller force to have a greater effect	<p>Electricity</p> <ul style="list-style-type: none">associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuitcompare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switchesuse recognised symbols when representing a simple circuit in a diagram	<p>STEM</p>

ST ANTHONY'S CATHOLIC PRIMARY SCHOOL

Science Overview

Year B	Intent <ul style="list-style-type: none">▶ At St. Anthony's our intent is to make science fun and engaging by providing children with the opportunity to question, investigate and draw conclusions.▶ We want all children to become scientifically minded and enthused by the wonders of science and strive to equip them with the tools and confidence to become scientists of the future, setting them on a journey where they are constantly inspired by the world around them.▶ Starting with an understanding of the world, through practical exploration and valuable experiences, children will progress onto developing their ability to work scientifically and challenge ideas through questioning and investigation.		Implementation <ul style="list-style-type: none">▶ Children are engaged, inspired and challenge ideas.▶ Children have good, appropriate resources to select from.▶ Children have opportunities to be inquisitive and independently explore and investigate.▶ Work confidently and independently.▶ Enhance scientific enquiry through questioning.		Impact <ul style="list-style-type: none">▶ Children will record their knowledge of Science in various ways reflecting a good understanding of working scientifically.▶ They will be able to access any unit of science through applying learnt skills.▶ Work will be monitored and assessed at the end of each unit to ensure progress is made and to inform future planning.	
	 Autumn		 Spring		 Summer	
EYFS	My body - body parts and senses Autumn - Seasonal changes - observing what they see, feel and hear while outside		Winter - Understanding the effect of changing Seasons - interacting with natural processes	Spring - seasonal changes Science experiments Investigating cause and effect	Minibeasts and lifecycles Plants - observing changes over time STEM challenges	Growing - themselves and the natural world Shadows
			STEM - In the kitchen	STEM - Toys	STEM - Sorting Technology	STEM - Technology in Jobs
Year 1/2	Seasonal Changes <ul style="list-style-type: none">• Observe changes across the four seasons.• Observe and describe weather associated with the seasons and how day length varies.	Living things and their habitats <ul style="list-style-type: none">• explore and compare the differences between things that are living, dead, and things that have never been alive.• identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.• identify and name a variety of plants and animals in their habitats, including micro-habitats.• describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.	Everyday Materials <ul style="list-style-type: none">• distinguish between an object and the material from which it is made• identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock• describe the simple physical properties of a variety of everyday materials• compare and group together a variety of everyday materials on the basis of their simple physical properties	Uses of everyday Materials <ul style="list-style-type: none">• identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses.• find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching	Animals <ul style="list-style-type: none">• identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals.• identify and name a variety of common animals that are carnivores, herbivores and omnivores.• describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets).• Find out and describe how animals look different to one another.• Group animals together according to their different features.• Recognise similarities between animals.• Animals have senses to explore the world around them and to help them survive.• Recognise that animals need to be treated with care and sensitivity to keep them alive and healthy.• Animals are alive; they move, feed, grow, use their senses and reproduce.	Animals <ul style="list-style-type: none">• Notice that animals have offspring which grow into adults.• Find out about and describe the basic needs of animals for survival (water, food and air).

Year 3/4	Electricity <ul style="list-style-type: none">• identify common appliances that run on electricity• construct a simple series electrical circuit, identifying and naming its basic parts, including: cells, wires, bulbs, switches and buzzers• identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery• recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit• recognise some common conductors and insulators, and associate metals with being good conductors	Light <ul style="list-style-type: none">• Recognise that they need light in order to see things and that dark is the absence of light• notice that light is reflected from surfaces• recognise that light from the sun can be dangerous and that there are ways to protect their eyes• recognise that shadows are formed when the light from a light source is blocked by an opaque object• find patterns in the way that the size of shadows change	Rocks <ul style="list-style-type: none">• compare and group together different kinds of rocks on the basis of their appearance and simple physical properties• describe in simple terms how fossils are formed when things that have lived are trapped within rock• recognise that soils are made from rocks and organic matter	Living things in their Habitat <ul style="list-style-type: none">• identify that living things can be grouped in a variety of ways• explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment• recognise that environments can change and that this can sometimes pose dangers to living things	Sound <ul style="list-style-type: none">• identify how sounds are made, associating some of them with something vibrating• recognise that vibrations from sounds travel through a medium to the ear• find patterns between the pitch of a sound and features of the object that produced it• find patterns between the volume of a sound and the strength of the vibrations that produced it• recognise that sounds get fainter as the distance from the sound source increases	STEM
Year 5/6	Evolution and Inheritance <ul style="list-style-type: none">• that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago• recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents• identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution	Animals including Humans <ul style="list-style-type: none">• describe the changes as humans develop to old age• identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood• recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function• describe the ways in which nutrients and water are transported within animals, including humans		Living Things in their Habitat <ul style="list-style-type: none">• describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird• describe the life process of reproduction in some plants and animals• describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals• give reasons for classifying plants and animals based on specific characteristics	Properties of Materials <ul style="list-style-type: none">• compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets• know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution• use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating• give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic• demonstrate that dissolving, mixing and changes of state are reversible changes• explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda
