Why recycle?

25

X

=

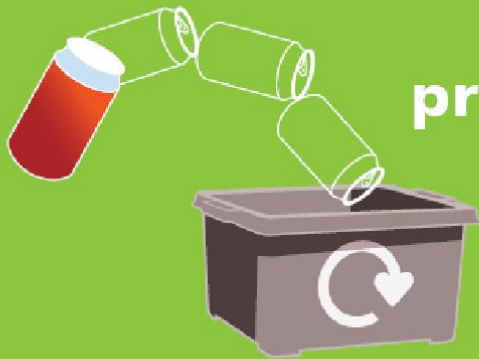

FLEECE

Recycling transforms things:

25 plastic bottles can be recycled to make one new fleece jacket.

Why recycle?

protects

Recycling helps conserve natural resources:

Recycling aluminium cans helps to protect tropical rainforests by reducing the need to mine bauxite, the raw material used to make aluminium.

Why recycle?

Recycling saves energy:

Recycling one glass bottle or jar saves enough energy to run a Nintendo Wii for 5 hours!

Why recycle?

Recycling helps tackle climate change:

Recycling 1 tonne of paper saves 1.32 tonnes of CO²
– the equivalent of not driving 3700 miles.

What can **you** do?

Rescue your recyclables!

Shampers

Give your shampoo and conditioner bottles a quick rinse and pop them in your recycling so they can see out their next life as a soap dispenser or even a plastic garden chair.

Rolly

Don't forget your toilet roll tubes! They don't belong in general waste. Recycle them so they can go on to be another loo roll, an egg carton, or even a notebook.

Deo

Your aerosols have worked overtime to keep you fresh and dry. Don't let them end up in the general waste bin, they could be recycled into part of a bike!

Spritz

Your perfume and aftershave bottles have been with you through a lot. Recycle them, so they can come back as a bottle of bubbly for your next celebration. Separate the spray

We Care for
God's Creation!

Reflection

Think about all the rubbish we create in the world.

What can we reuse instead of throwing it away?

Can we help our families think more about what we can recycle, and about recycled products that we can buy and use?

Let Us Pray

Thank you, Lord God, for the beautiful world you made for us to live in.

Please help us to take care of it and think about the things we can reuse.

Help us to look after the world for the people who will live in it after us.

Amen.

Remember... your actions make a difference
