COMMUNITY

Let's look at this week's story

Schools in parts of Turkey and Syria have been reopening in the weeks since devastating earthquakes hit, many in form of makeshift tents. Teachers in the effort of making certain children's education continue in difficult circumstances. Many school buildings were destroyed in the earthquakes at the start of February, educational institutions nationwide being closed for weeks. Although many learning centres have been set up, lessons have had to also continue in tents and temporary structures. Volunteers and authorities in the worst affected areas are working to help.
