St Bartholomew's C of E Primary School

COVID-19 Catch-up Premium expenditure 2020-2021

Many children at St Bartholomew's C of E Primary, as well as nationally, have experienced unprecedented disruption to their education as a result of the COVID-19 pandemic. Due to high numbers of children from vulnerable and disadvantages backgrounds, many children have been negatively impacted by the lost time in education. This document highlights how school leaders have used the COVID-19 Catch-up premium funding to support children in our school. The funding will be used towards our prioritised areas, with the school contributing the rest of the expenditure from our budget.

Academic year: 2020/21	Total number of eligible pupils: 631
Funding allocation per pupil: £80	Funding allocation for whole school: £50480

The school's catch-up priorities are:

- Ensuring children in EYFS make a good start to their formal education, and that any missed time in Nursery doesn't put them at a disadvantage.
- Continue to raise attainment in phonics and reading across school, so that children can access learning in all curricular areas.
- To provide targeted support to individuals and groups who have been negatively affected by school closures.
- To provide targeted support to pupils with SEND.

The overall aims of our Catch-up premium funding use are:

- To reduce the attainment gap between disadvantaged pupils and their peers.
- To raise the attainment of all pupils and close the gap created by COVID-19 school closures.

Bar	riers to learning at St Bartholomew's:						
In s	In school barriers (issues to be addressed in school)						
A	Cognitive: The majority of children enter school significantly below age related expectations Some children require further support with their knowledge and understanding of basic skills in reading, writing and maths. Gaps in learning mean that some children need to be targeted for individual/ small group support to help them catch up. These gaps have been widened by school closures for some children.						
В	Social/ emotional/behaviour issues: Children require support to develop and manage their self-confidence, emotional well-being, self-control and independence due to a variety of factors. Individual children have had their mental health negatively impacted by the amount of time they spent away from school in 2020. The school's non exclusion policy helps integrate children with significant behavioural issues into main stream education, however these children require individualised support to help them access learning.						
С	Oral language: Spoken language skills of children in Reception and KS1 are lower for children eligible for PP than other children. This has an impact upon reading and writing attainment. Many children throughout school have specific needs with their language and communication, which require additional targeted support.						
D	Mobility: Although the school has rectified some historical mobility issues, the legacy of this still currently impacts upon learners across school. Lots of children across school started their educational journey with us after Reception.						
Exte	ernal barriers:						
E	Financial/ home life implications: A number of families live in landlord housing and often move from house to house due to rent arrears. Many children have less access to cultural and social experiences, which would enhance their skills, knowledge and understanding of the wider world and help develop their imagination. Numerous families struggle to provide a sustained healthy diet for their children which can result in children being distracted as they are coming to school hungry. Some families find it difficult to ensure their children are 'school ready' - many children come to school without appropriate uniform, PE kit and equipment such as glasses and hearing aids. Several children in Early Years and Key Stage 1 are not yet toilet trained.						
F	Attendance: Some families have low attendance/ poor punctuality due to issues arising from home. Due to lack of school places in some areas, children often travel from out of catchment and require support with travelling arrangements so they can attend school every day
