

St Bridget's C of E Primary School Calculation Policy

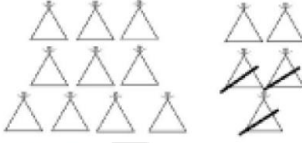

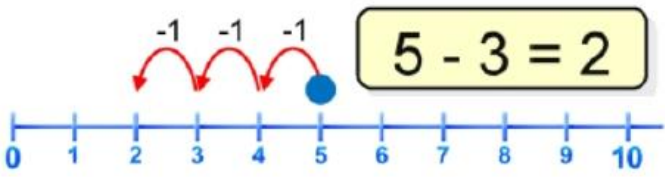

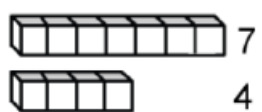

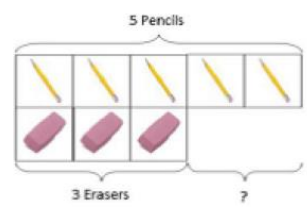

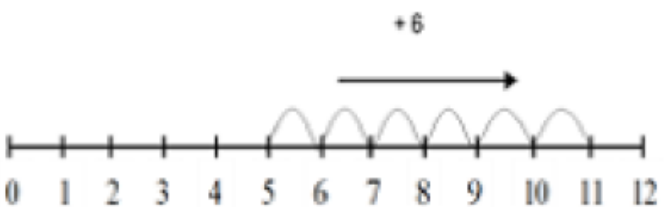

Year 1 Addition	Strategy	Concrete	Pictorial	Abstract
	Combining two parts to make a whole: part-whole model	Use cubes to add two numbers as a group or a bar. 	Use pictures to add two numbers together as a group or in a bar. 	Use the part-whole model to move onto abstract. 
		Use part-whole models. 	Use part-whole models to support. 	
	Starting at the larger number and accounting on	Start with the larger number on the bead string and then count on the smaller number 1 by 1 to find the answer. $12 + 5 = 17$ 	Start with the larger number on the number line and then count on the smaller number 1 by 1 or in one jump to find the answer. $12 + 5 = 17$ 	Place the larger number in your head and count on the smaller number, using fingers if necessary. $12 + 5 = 17$ 
	Regrouping to make 10	$9 + 3 =$ $10 + 2 = 12$ 	Regroup or partition using a diagram. $3 + 9 =$ 	$7 + 4 = 11$ 
		Use ten frames. Start with the larger number and use the smaller number to make 10. 	Regroup or partition using a number line. $9 + 5 = 14$ 	
	Represent and use number bonds and related subtraction facts within 20	2 more than 5 	Use number lines 	Emphasis should be on the language '1 more than 5 is equal to 6.' '2 more than 5 is 7.' '8 is 3 more than 5.'
			Use pictures $5 + 2$ 	

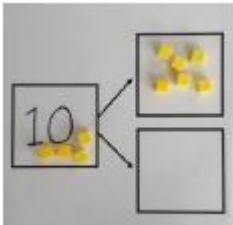

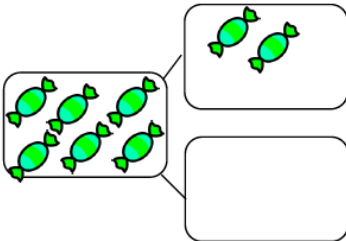

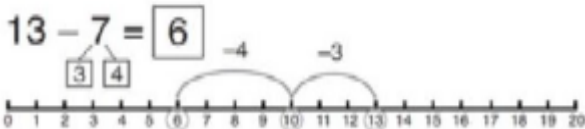

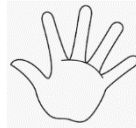

Year 2 Addition	Strategy	Concrete	Pictorial	Abstract
	Adding multiples of 10	$20 + 30 = 50$ Model using base 10 and bead strings 	$3 \text{ tens} + 5 \text{ tens} = 8 \text{ tens}$ $30 + 50 = 80$ 	$20 + 30 = 50$ $70 = 50 + 20$ $40 + \underline{\quad} = 60$
	Use known number facts Part-whole model	Children explore different ways of making numbers within 20 using cubes within part-whole models. $13 + 7 = 20$ 	Children explore different ways of making numbers within 20 using numbers within part-whole models. 	Children explore different ways of making numbers within 20 using mental strategies. $\square + 1 = 16$ $1 + \square = 16$ $16 - 1 = \square$ $16 - \square = 1$
	Use known facts Base 10	Children to explore related facts. $3 + 3 = 6$ $30 + 30 = 60$ 	Children to explore related facts by drawing base 10. $3 + 4 = 7$ $30 + 40 = 70$ $300 + 400 = 700$ 	Use known facts: $3 + 4 = 7$ So $30 + 40 = 70$ So $300 + 400 = 700$
	Bar model	$3 + 4 = 7$ – use real-life objects arranged in bar 	$7 + 3 = 10$ Use drawings arranged in a bar. 	$23 + 25 = 48$ 

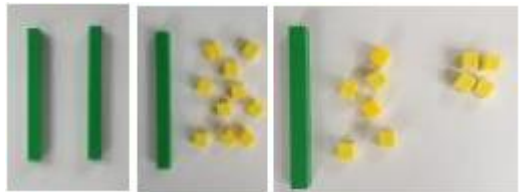

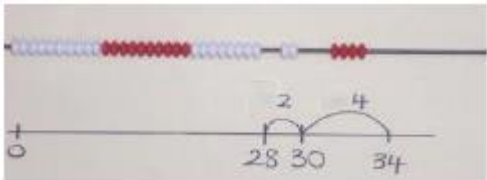

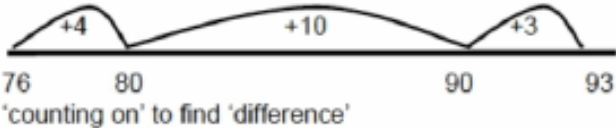

Year 2 Addition	Strategy	Concrete	Pictorial	Abstract
	Add a two-digit number and ones	Use ten frame to make 'magic ten' Children to explore patterns $17 + 5 = 22$ $27 + 5 = 32$ 	Use number line 	Explore fact families $17 + 5 = 22$ $5 + 17 = 22$ $22 - 17 = 5$ $22 - 5 = 17$ 
	Add a two-digit number and tens	Base 10 $25 + 10 = 35$ 	Use number line 	Mental strategies $27 + 10 = 37$ $27 + 20 = 47$ $27 + \underline{\quad} = 57$
	Add two two-digit numbers	Base 10 $25 + 46 = 71$ (Recap exchanging) 	Use number line; bridge ten using part whole if necessary. 	Partitioning  $20 + 40 = 60$ $5 + 7 = 12$ $60 + 12 = 72$
	Add three one-digit numbers	Cubes Use number bonds if possible to make 10 first. $4 + 3 + 6 = (4 + 6) + 3 = 13$ 	Regroup and draw representation. $3 + 5 + 7$ $10 + 5 = 15$ 	Combine the two numbers that make/bridge 10, then add the third. 

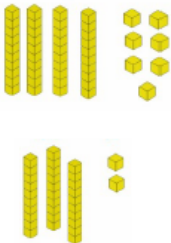

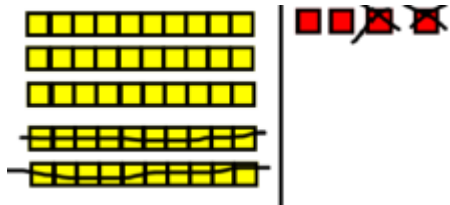

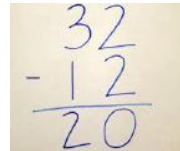

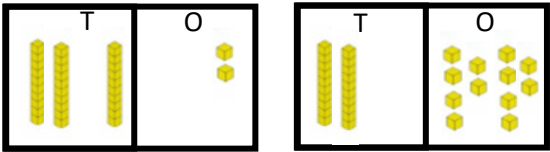

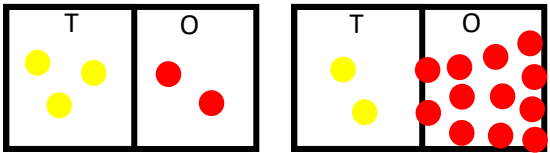

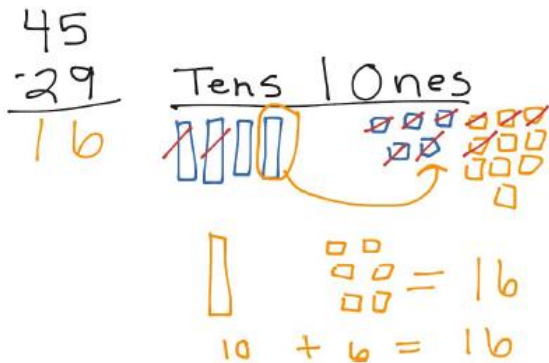

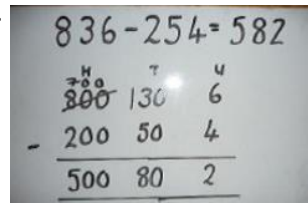

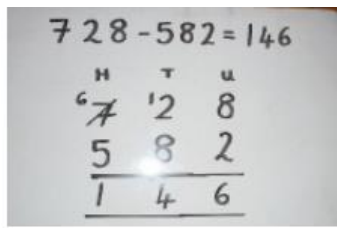

Year 3 Addition	Strategy	Concrete	Pictorial	Abstract
	Column addition – no regrouping	Use base 10 in columns $24 + 15 = 39$	Children to move onto drawing the counters using a tens and one frame.	Add the ones, then the tens, then the hundreds.
	Add two or three 2 or 3-digit numbers	Move onto using place value counters $44 + 15 = 59$	$35 + 23 = 58$	
	Column addition with regrouping	Use place value counters in a column. Exchange ten ones for a ten.	Children to draw a Representation of the grid to further support their understanding, carrying the ten <u>underneath</u> the line.	Start by partitioning the number before formal column method to show the exchange.
		$46 + 27$		$20 + 5$ $40 + 8$ $60 + 13 = 73$
		$43 + 20 + 10 = 73$		Add the ones, exchanging for ten and carrying it <u>underneath</u> the line.
				536 $+ 85$ 621 11

	Strategy	Concrete	Pictorial	Abstract
Year 4 Addition	Add numbers with up to 4 digits	<p>Children continue to use base 10 or place value counters to add, exchanging ten ones for a ten etc.</p> <p>$268 + 157 = 425$</p> 	<p>Draw representations using place value grid. Exchanged tens to be carried <u>underneath</u> the Line.</p> 	<p>Continue from previous work, carrying hundreds as well as tens.</p> 
Year 5 Addition	Add numbers with more than 4 digits	As Year 4	As Year 4	
	Add decimals with 2 decimal places, including money.	<p>Introduce decimal place value counters</p> 	<p>As Year 4, but using decimal place. Emphasise how the decimal point must be lined up within the calculation.</p>	
Year 6 Addition	Add several numbers of increasing complexity including money, measure and decimals with different numbers of decimal places.	As Y5	As Y5	<p>Insert zeros for placeholders where necessary.</p> 

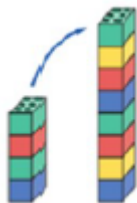

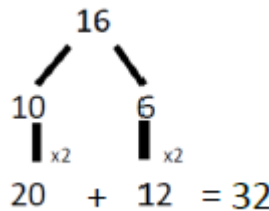

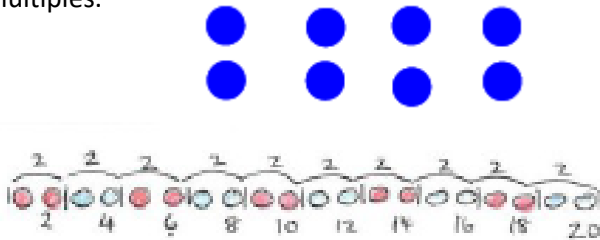

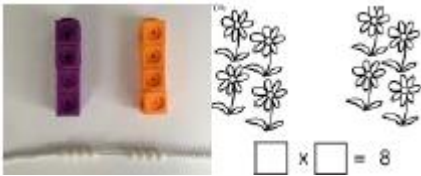

Year 1 Subtraction	Strategy	Concrete	Pictorial	Abstract
	Taking away ones	Use physical objects, counters, cubes etc to show how objects can be taken away. <div>  $4 - 2 = 2$ </div>	Cross out the objects to show what has been taken away <div>  $15 - 3 = 12$ </div>	$7 - 4 = 3$ $16 - 9 = 7$
	Counting back	Move objects away from the group, counting backwards. <div>  $7, 6, 5$ $7 - 2 = 5$ </div> Move the beads along the string as you count backwards. <div>  </div>	Count back in ones using a number line <div>  $5 - 3 = 2$ </div>	Put 13 in your head, count back 4. What number are you at?
	Find the difference	Compare objects and amounts. <div>  7 is 3 more than 4 4 I am 3 years older than my sister </div> Lay objects to represent a bar model <div>  </div>	Count on using a number line to find the difference <div>  </div>	Hannah has 12 sweets and her sister has 5. How many more does Hannah have than her sister?

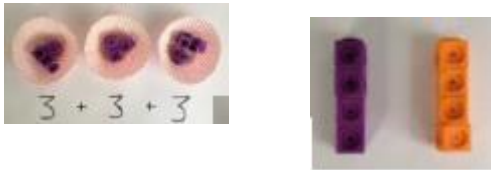

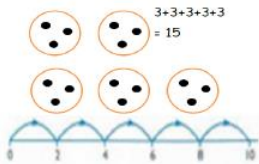

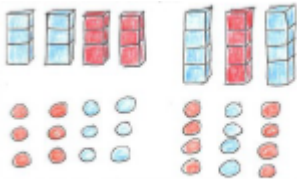

Year 1 Subtraction	Strategy	Concrete	Pictorial	Abstract
	Represent and use number bonds and related subtraction facts within 20. Part-whole model.	<p>Link to addition. Use part-whole model to show the inverse.</p> <p>If 10 is the whole and 6 is one of the parts, what is the other part?</p> <p>$10 - 6 = 4$</p> 	<p>Use pictures to represent the part-whole model</p> <p>$6 - 2 = 4$</p> 	<p>Use numbers in part-whole model</p> 
	Make 10	<p>$14 - 5 = 9$</p> <p>Make 14 on the 10 frame. Take 4 away to make ten, then take one more away so that you have taken 5.</p> 	<p>Count down 3 first to ten, then another 4 to 7.</p> <p>$13 - 7 = 6$</p> 	<p>$16 - 8$</p> <p>How many do we take off to get to 10? How many left to take off?</p> <p>Count on fingers if necessary</p> 
	Bar model	<p>Use objects in a line, separate</p>  <p>$5 - 3 = 2$</p>	<p>$10 - 2 = 8$</p> 	 <p> $10 = 8 + 2$ $10 = 2 + 8$ $10 - 2 = 8$ $10 - 8 = 2$ </p>

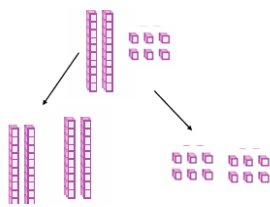

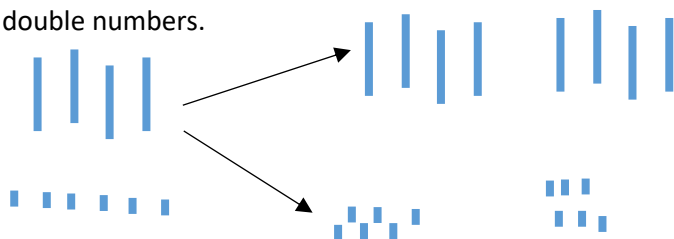

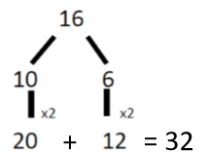

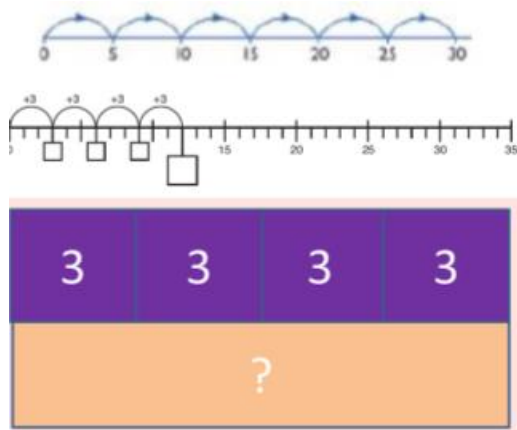

Year 2 Subtraction	Strategy	Concrete	Pictorial	Abstract
	Regroup a ten into ten ones.	Use a place value chart to show how to change a ten into ten ones. 	Draw pictorial representations and cross them off. $20 - 4 =$ 	Mental strategies $20 - 4 = 16$
	Partitioning to subtract without regrouping.	Use Base 10 to show how to partition the number when subtracting without regrouping. $34 - 13 = 21$ 	Draw representations of Base 10 and cross off. $43 - 21 = 22$ 	Mental strategies $43 - 21 = 22$
	Make ten strategy – counting on	Use a bead bar or bead strings to model counting to next ten and the rest. $34 - 28 =$ 	Use a number line to count on to the next ten and then the rest.  'counting on' to find 'difference'	Mental strategies $93 - 76 = 17$

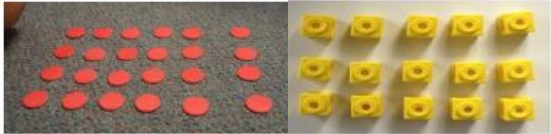

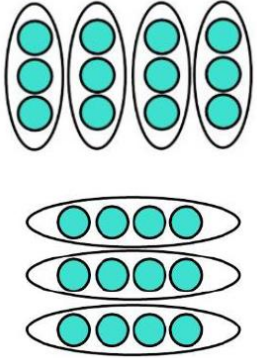

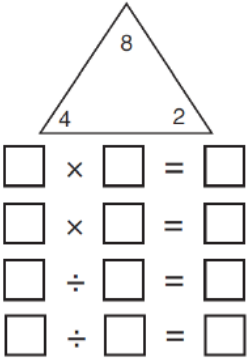

Year 3 Subtraction	Strategy	Concrete	Pictorial	Abstract
	Column subtraction without regrouping	<p>Use base 10 to model</p>  <p>$47 - 15 = 32$</p>	<p>Draw representations to support understanding.</p> <p>$54 - 22 = 32$</p> 	<p>Begin by partitioning into place value</p> $47 - 24 = 23$ $\begin{array}{r} 40 + 7 \\ - 20 + 4 \\ \hline 20 + 3 \end{array}$ <p>Then use formal methods.</p> 
	Column subtraction with regrouping	<p>Use base 10. $32 - 9$</p>  <p>Move to place value counters, modelling the exchange of a ten into ten ones.</p> 	<p>Draw base 10 or place value counters and cross off.</p> 	<p>Begin by partitioning into place value columns.</p>  <p>Then move onto formal methods.</p> 

	Strategy	Concrete	Pictorial	Abstract
Year 4 Subtraction	Subtract with up to 4 digits	234-179 Model process of exchange using base 10 and then place value counters (as Y3) 	Children to draw place value counters and show their exchange – as Year 3.	Exchange tens for ten ones by crossing out and carrying. 
Year 5 Subtraction	Subtract with at least 4 digits, including money and measures.	As Year 4	As Year 3	Use zeroes for placeholders.  
Year 6 Subtraction	Subtract with increasingly large and more complex numbers and decimal values.	As Year 4	As Year 3	 

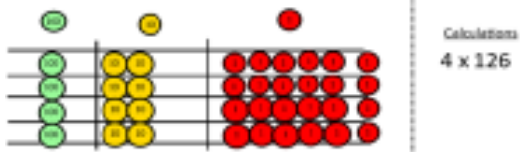

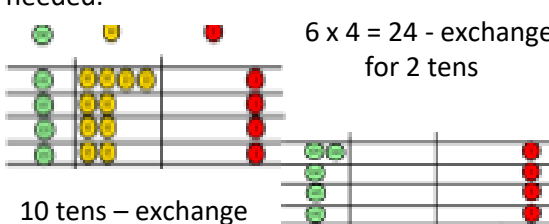

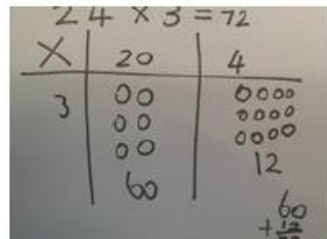

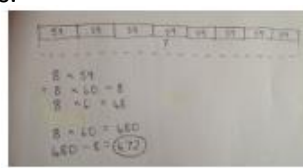

Year 1 Multiplication	Strategy	Concrete	Pictorial	Abstract
	Doubling	<p>Use practical activities using manipulatives including cubes to demonstrate doubling.</p> <p>Double 4 is 8</p> 	<p>Draw pictures to show how to double numbers.</p> <p>Double 4 is 8</p> 	<p>Partition a number and then double each part before recombining it.</p> 
	Counting in multiples	<p>Count the groups as children are skip counting. Children may use their fingers as they are skip counting.</p> 	<p>Children draw representations to show counting in multiples.</p> 	<p>Count in multiples of a number aloud. Write sequences with multiples of numbers.</p> <p>2, 4, 6, 8, 10</p>
	Making equal groups and counting the total	<p>Use manipulatives to make equal groups.</p> 	<p>Draw representations to show equal groups.</p> <p>Draw  to show 2 x 3</p> 	<p>2 x 4 = 8</p>

Year 1 Multiplication	Strategy	Concrete	Pictorial	Abstract
	Repeated addition	<p>Use different objects to add equal groups.</p> 	<p>Use pictorial number lines to solve problems.</p> <p>There are 3 sweets in each bag. There are 5 bags. How many sweets are there altogether?</p> 	<p>Write addition sentences to describe objects and pictures.</p>  <p> $2 + 2 + 2 + 2 + 2 = 10$ $2 \times 5 = 10$ </p>
	Understanding arrays	<p>Use objects laid out in arrays to find the answers to 2 lots of 5, 3 lots of 2 etc.</p> 	<p>Draw representations of arrays to show understanding.</p> 	<p> $3 \times 2 = 6$ $2 \times 5 = 10$ </p>

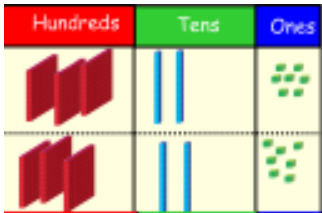

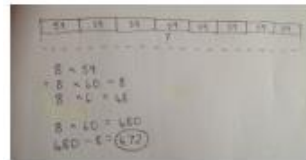

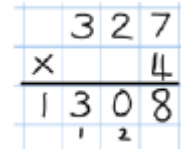

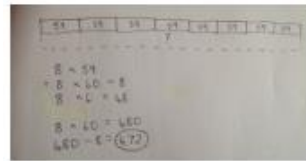

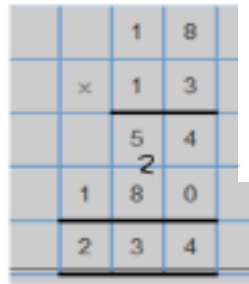

Year 2 Multiplication	Strategy	Concrete	Pictorial	Abstract
	Doubling	<p>Model doubling using base 10 and place value counters.</p> <p>Double 26 is double 20 and double 6</p>  <p>$40 + 12 = 52$</p>	<p>Draw pictures and representations to show how to double numbers.</p> 	<p>Partition a number and then double each part before recombining.</p>  <p>$20 + 12 = 32$</p>
	<p>Counting in multiples of 2, 3, 4, 5, 10 from 0</p> <p>Repeated addition</p>	<p>Count the groups as children are skip counting; children may use their fingers.</p>  <p>$5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40$</p>  <p>Use bar models.</p> 	<p>Number lines, counting sticks and bar models should be used to show representation of counting in multiples.</p> 	<p>Count in multiples of a number aloud.</p> <p>Write sequences with multiples of numbers.</p> <p>0, 2, 4, 6, 8, 10 0, 3, 6, 9, 12, 15 0, 5, 10, 15, 20, 25</p> <p>$4 \times 3 = 12$</p>

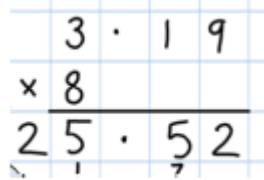

Year 2 Multiplication	Strategy	Concrete	Pictorial	Abstract
	Multiplication is commutative	<p>Create arrays using counters and cubes.</p>  <p>Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer.</p> 	<p>Use representations of arrays to show different calculations and explore commutativity.</p> 	<p>$12 = 3 \times 4$ $12 = 4 \times 3$</p> <p>Use arrays to write multiplication sentences and reinforce repeated addition.</p> <p>$5 + 5 + 5 = 15$ $3 + 3 + 3 + 3 + 3 = 15$</p> <p>$5 \times 3 = 15$ $3 \times 5 = 15$</p> 
	Using the inverse (This should be taught alongside division, so pupils learn how they work alongside each other.)	<p>Use cubes or counters to identify the inverse.</p> <p>4 lots of 2 = 8 8 split into groups of 2 = 4</p> 	<p>Explore fact families using a triangle model.</p> 	<p>Identify all related fact family sentences.</p> <p>$2 \times 4 = 8$ $4 \times 2 = 8$ $8 \div 4 = 2$ $8 \div 2 = 4$</p> <p>$8 = 2 \times 4$ $8 = 4 \times 2$ $2 = 8 \div 4$ $4 = 8 \div 2$</p>

Year 3 Multiplication	Strategy	Concrete	Pictorial	Abstract																		
	Grid Method	<p>Show links with arrays to first introduce the grid method.</p> <div><table><tr><td>x</td><td>10</td><td>3</td></tr><tr><td>4</td><td></td><td></td></tr></table><p>4 rows of 10 4 rows of 3</p></div> <p>Move onto base 10 to move towards a more compact method.</p> <div><table><tr><td>x</td><td>T</td><td>U</td></tr><tr><td>4</td><td></td><td></td></tr></table><p>4 rows of 13</p></div>	x	10	3	4			x	T	U	4			<p>Children can represent their work with place value counters in a way that they understand.</p> <p>They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.</p>	<p>Start with multiplying by one digit numbers and showing the clear addition alongside the grid.</p> <table><tr><td>x</td><td>30</td><td>5</td></tr><tr><td>7</td><td>210</td><td>35</td></tr></table> <p>210 + 35 = 245</p>	x	30	5	7	210	35

Column multiplication.	<p>Manipulatives may still be used with the corresponding long multiplication modelled alongside.</p>	<p>Bar modelling and number lines can support learners when solving problems with multiplication alongside the formal written methods.</p> 	 <div> <div>1234</div> <div>x 16</div> </div> <div> <div>7404 (1234 x 6)</div> <div>12340 (1234 x 10)</div> <div>19744</div> </div> <p>When exchanging, place carried numbers underneath the next digit.</p> <p>Add the zero as a placeholder.</p>								

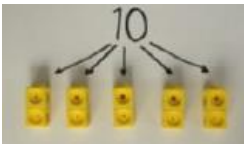

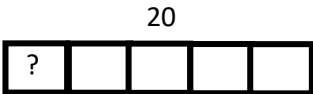

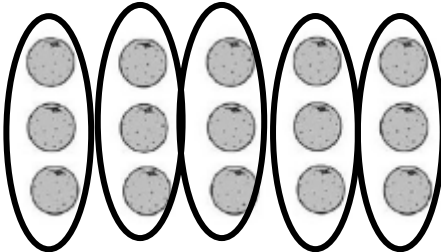

Year 6 Multiplication	Strategy	Concrete	Pictorial	Abstract
	Multiply decimals up to 2 decimal places by a single digit.	As Y5	As Y5	<p>Remind children of place value and the importance of lining up the decimal points. Multiplications still start from the digit furthest to the right.</p> 

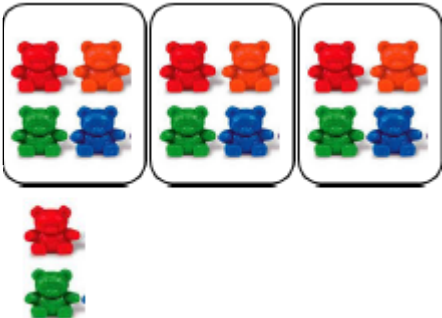

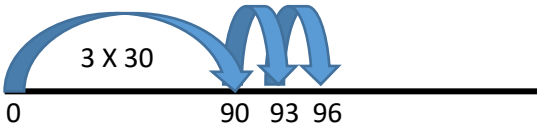

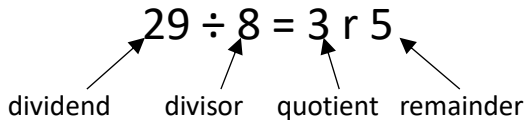

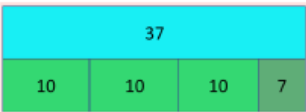

Multiplication tables

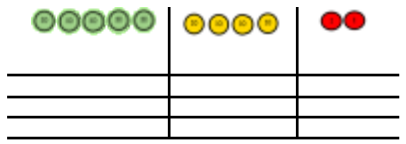

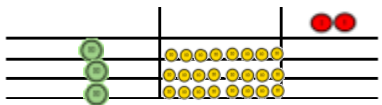

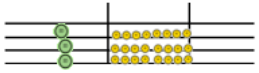

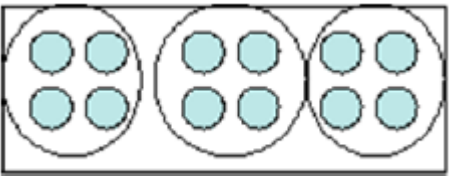

Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
	2, 3, 4, 5, 10	<p>Starting in Year 3, children are given a Times Table Rockstars login. They work through the full programme every year to improve their speed and keep practising. By the time they do their Year 4 tables test, they will have been through the programme twice. Extra interventions will be given as needed to ensure that all children are up to age related expectations.</p>			

Year 1 Division	Strategy	Concrete	Pictorial	Abstract
	Division as sharing	<p>Use cubes and objects.</p> 	<p>Children use pictures or shapes to share quantities.</p> <p>8 shared into two groups = 4</p>  <p>12 shared between 3 is 4</p>	12 shared between 3 is 4.

Year 2 Division	Strategy	Concrete	Pictorial	Abstract
	Division as sharing	<p>I have 10 cubes. Can you share them equally in 2 groups?</p> 	<p>Children use pictures or shapes to share quantities.</p> 	<p>$12 \div 3 = 4$</p> <p>Share 12 between 3 people – how many do they each have?</p>
			<p>Children use bar modelling to show and support understanding.</p> 	
	Division as grouping	<p>Divide quantities into equal groups.</p>  <p>Use cubes, counters or other objects to aid understanding.</p> 	<p>Use number lines for grouping.</p>  <p>Use a bar model. Think of the bar as a whole. Split into the number of groups you are dividing by and work out how many would be within each group.</p> <p>20</p>  <p>20 split into 5 groups =</p>	<p>$20 \div 5 = 4$</p> <p>Divide 20 into 5 groups – how many are in each group?</p>

Year 3 Division	Strategy	Concrete	Pictorial	Abstract
	Division as grouping	<p>Use cubes, objects or counters to aid understanding.</p> 	<p>Continue to use bar models to aid understanding and problem solving.</p> 	<p>How many groups of 6 in 24?</p> $24 \div 6 = 4$
	Division with arrays	<p>Divide larger numbers using base 10 or place value counters.</p> $96 \div 3 = 32$ 	<p>Draw an array and circle to split the array into groups to make fact families.</p> <p>Eg</p> $15 \div 5 = 3$ $15 \div 3 = 5$ $5 \times 3 = 15$ $3 \times 5 = 15$ 	<p>Find the inverse of multiplication and division sentences by creating eight linking number sentences.</p> $7 \times 4 = 28$ $4 \times 7 = 28$ $28 \div 7 = 4$ $28 \div 4 = 7$ $28 = 7 \times 4$ $28 = 4 \times 7$ $4 = 28 \div 7$ $7 = 28 \div 4$

Year 3 Division	Strategy	Concrete	Pictorial	Abstract
	Division with remainders.	<p>Divide objects between groups and see how much is left over.</p> <p>$14 \div 3 =$</p> 	<p>Jump forward in equal jumps on a number line then see how many more you need to jump to find a remainder.</p> <p>$13 \div 4$ 3 remainder 1</p>  <p>For larger numbers, when it becomes inefficient to count in single multiples, larger jumps can be recorded using known facts.</p> <p>$96 \div 3 = 32$</p> 	<p>Complete written divisions and show the remainder using 'r'</p> <p>Use appropriate vocabulary</p> <p>$29 \div 8 = 3 \text{ r } 5$</p> 
			<p>Draw dots and group them to divide an amount and clearly show a remainder.</p>  <p>$14 \div 3$ 4 remainder 2</p>	
			<p>Use a bar model to show division with remainders.</p>  <p>$37 \div 10$ 3 remainder 7</p>	

Year 4-6 Division	Strategy	Concrete	Pictorial	Abstract
	<p>Division at least 3 digit numbers by 1 digit</p> <p>Short division</p>	<p>Use place value counters to divide using the bus stop method alongside.</p> <p>$542 \div 3$</p>  <p>In contrast to the column method, we start with the largest place value.</p> <p>If you divide 5 hundreds by 3, you can place 1 hundred in each row with 2 left over.</p>  <p>You can now exchange the 2 remaining hundreds for 20 tens.</p>  <p>24 tens can be divided evenly into 3 rows, therefore no more exchanging needs to take place.</p> <p>2 ones cannot be divided equally into 3 rows, so they are moved into the remainders column.</p> 	<p>Pupils can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups.</p>  <p>$12 \div 4 = 3$</p> <p>They should be encouraged to develop more efficient methods.</p>	<p>Begin with divisions that divide equally with no remainder.</p> $\begin{array}{r} 218 \\ 4 \overline{) 8732} \end{array}$ <p>Move onto divisions with a remainder.</p> $\begin{array}{r} 86 \text{ r } 2 \\ 5 \overline{) 4332} \end{array}$ <p>Move onto decimal places to divide accurately.</p> $\begin{array}{r} 21.8 \\ 4 \overline{) 87.32} \end{array}$ $\begin{array}{r} 0663 \text{ r } 5 \\ 8 \overline{) 53309} \end{array}$

Year 6 Division	Strategy	Concrete	Pictorial	Abstract																																																																					
	Long division	Concrete methods would be inefficient here.	Pictorial methods would be inefficient here.	<div> $432 \div 12$ </div> <div> Step 1. List multiples of the divisor up to 100. <div> $12 \times 1 = 12$ $12 \times 2 = 24$ $12 \times 3 = 36$ $12 \times 4 = 48$ $12 \times 5 = 60$ $12 \times 6 = 72$ $12 \times 7 = 84$ $12 \times 8 = 96$ </div> </div> <div> Step 2. Set out as bus stop method and start with the greatest place value. <div> <table border="1"> <tr><td></td><td></td><td>0</td><td></td><td></td></tr> <tr><td>1</td><td>2</td><td>4</td><td>3</td><td>2</td></tr> </table> </div> $4 \div 12 = 0 \text{ r } 4$ </div> <div> Step 3. Combine the first two digits to create a dividend. <div> <table border="1"> <tr><td></td><td></td><td>0</td><td></td><td></td></tr> <tr><td>1</td><td>2</td><td>4</td><td>3</td><td>2</td></tr> </table> </div> $12 \times 3 = 36$ so $43 \div 12 = 3 \text{ r } 7$ <div> Place the quotient below the dividend and add a placeholder. Subtract it from the full dividend to create a new dividend. <table border="1"> <tr><td></td><td></td><td>0</td><td>3</td><td></td></tr> <tr><td>1</td><td>2</td><td>4</td><td>3</td><td>2</td></tr> <tr><td></td><td>–</td><td>3</td><td>6</td><td>0</td></tr> <tr><td></td><td></td><td></td><td>7</td><td>2</td></tr> </table> </div> </div> <div> Step 4. Divide the new dividend by the divisor. <div> $12 \times 6 = 72$ $72 \div 12 = 6$ </div> <div> Place the quotient below the dividend. Subtract it from the full dividend to see if there are any remainders. <table border="1"> <tr><td></td><td></td><td>0</td><td>3</td><td>6</td></tr> <tr><td>1</td><td>2</td><td>4</td><td>3</td><td>2</td></tr> <tr><td></td><td>–</td><td>3</td><td>6</td><td>0</td></tr> <tr><td></td><td></td><td></td><td>7</td><td>2</td></tr> <tr><td></td><td>–</td><td></td><td>7</td><td>2</td></tr> <tr><td></td><td></td><td></td><td></td><td>0</td></tr> </table> </div> </div>			0			1	2	4	3	2			0			1	2	4	3	2			0	3		1	2	4	3	2		–	3	6	0				7	2			0	3	6	1	2	4	3	2		–	3	6	0				7	2		–		7	2
