

## Pupil and Parent apps

Everyone shows their feelings in different ways and to different people. Young people are no different. Some pupils will reach out to staff for support while others show they are struggling with subtle changes to their mood and behaviour. Some pupils never let their guard down while in school so staff would not always be able to tell there's a problem.

Through the Class Charts Pupil and Parent apps, pupils and parents can also report wellbeing concerns giving staff a fuller picture of what pupils are dealing with and for continued tracking.
