

Making Paper snow flakes

50 things #46 Fantastic paper folding

A fun easy activity younger children may need help with using the scissors from an adult.

Fold a square piece of paper into a triangle (if using A4 fold edge to edge and cut away excess paper along the bottom first)

Fold it again into a smaller triangle

Fold the right side into the middle of the triangle

Turn over the paper and fold again

Cut the excess paper off across the top

Cut small patterns into the side of the paper don't cut right across as this will break it

Open out your snowflake and decorate if you want to
