## Milestones and Learning Outcomes

## Key Events and Experiences

### Year 11

#### I Apply:

In year 11 all pupils will have a 1 to1 guidance interview to discuss their post 16 and career plans.

The interactions and experiences they have had over 5 years should have equipped them to make a well informed destination choice.

All pupils to have an intended destination by Easter.

### Year 10

#### I Plan:

Year 10 gives our pupil the opportunity for a week in a work place.

The visits and encounters are designed to support planning for post 16 options so they are well informed to make final choices in Yr.11

### Year 9

#### I Focus

Yr.9 is the first time pupils choose some options towards their future.

Experiences and input across this year supports making well considered choices. Having an understanding of the local labour market and focusing in on areas of interest for the future.

### Year 8

#### I Explore

Year 8 builds on the work in year 7 to continue exploring the options available for the future. Critically thinking about jobs and the different skills needed to be successful in the future.

### Year 7

#### I Embark

The start of your careers journey you will learn about the different skills for the future and ways to develop them. Careers sessions will support exploration and awareness of future options.
