

## Stickers

The twins collected some animal stickers.  
They each had the same total number.

Winston had 3 full sheets and 4 loose stickers.  
Wendy had 2 full sheets and 12 loose stickers.

Every full sheet has the same number of stickers.  
How many stickers are there in a full sheet?

42

### Teaching objectives

Solve mathematical problems or puzzles.  
Know multiplication facts.  
Explain methods and reasoning.
