

Bridging – Addition and Subtraction

- Sometimes it is more efficient to add or subtract by mentally bridging through a multiple of 10 or 100 rather than using a written method.
- Use bridging to calculate the following.
 - For example: $594 + 170 =$

1. $493 + 150 =$
2. $394 + 278 =$
3. $1995 + 356 =$
4. $703 - 128 =$
5. $3002 - 87 =$
6. $914 - 174 =$
7. $4.8 + 3.6 =$
8. $6.12 - 5.87 =$
