

Choose a Strategy

- Look at the following calculations.
- Choose the ones which require a formal written method and calculate the answers.

NB – children’s decisions will be based on their own expertise and confidence. Therefore, the same calculation may be tackled in a different way by different children. However, all children should have at least one mental method they are confident in to complement the written method.

$48 \div 4 =$	$3567 \div 3 =$	$942 \div 6 =$
$714 \div 7 =$	$675 \div 4 =$	$7608 \div 8 =$
$3864 \div 4 =$	$48 \div 3 =$	$6542 \div 7 =$
$165 \div 5 =$	$876 \div 5 =$	$765 \div 5 =$
$6321 \div 3 =$	$2835 \div 7 =$	$96 \div 4 =$

- Choose an appropriate strategy for the calculations that are left.
