

Fraction Find

- Children play in pairs.
- Each player scoops up a cupful of cubes. These are tipped out and counted.
- If the number of cubes can be halved exactly, they score two points.
 - *Children may need to share the cubes onto a shape split into two equal pieces.*
- If the number can be divided exactly into quarters they score four points.
- They keep a tally of their score.
- The winner is the first person to 20 points.
