

Make Your Own Calendar

- Children can make their own 12 page calendar that they can personalise with events that are meaningful to them, for example, their birthday, birthdays of family member, religious festivals and so on.
- This could be created in school or could be a task for the child to complete with some support from home.
- Approaches could include:
 - Copying each month on to separate sheets so the children have to put them in the correct order themselves.
 - Putting grids on the month pages, so the children can number the days (they are likely to need help knowing how many days there are in each month as this is Year 2 learning).
 - Matching pictures of events to certain months.
- Some templates are available below.

January
