

## Translation Measure 2

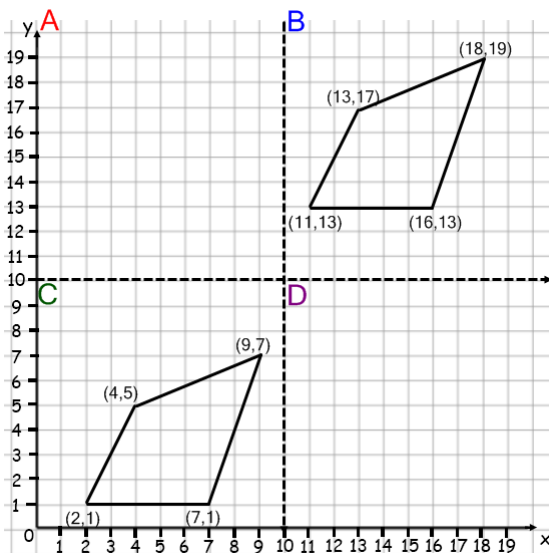

**Need:** Coordinates grid split into four areas (see below), pencils, rulers

- Working in pairs, a child draws a 2D polygon in one of the four areas on the coordinates grid – A, B, C, D and writes the coordinates of the corners.

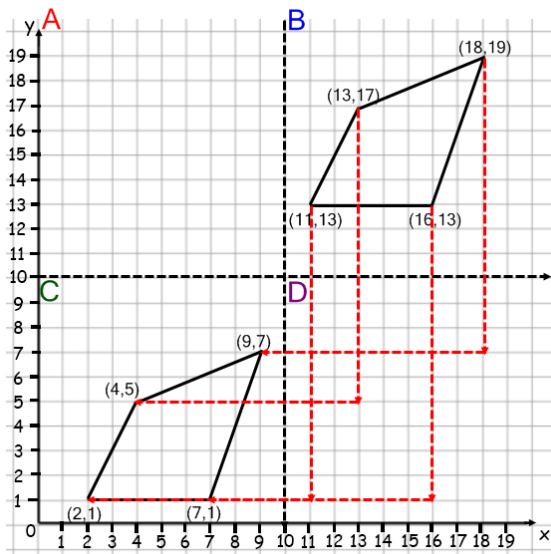

- Their partner then copies the polygon into another area on the coordinates grid and writes the coordinates of the corners.

- Together they work out the translation instruction.

## Translation Measure 2

- Translation is Down 12, Left 9.
- Repeat, but swapping roles.
