

Y3 Geography Spring 2

Is there a pattern to where volcanoes, mountains, earthquakes are found in the world?  
 Earth Systems, Space

"Let's Remember" Earth Systems, Space!

What are the seven continents, five oceans and their locations?

Where are the equator and poles located?

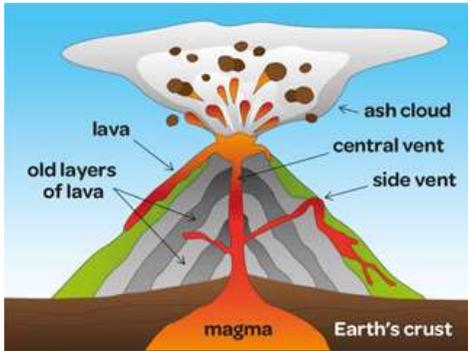

Where are the Tropic of Cancer and Tropic of Capricorn located?

Where is the Arctic circle?

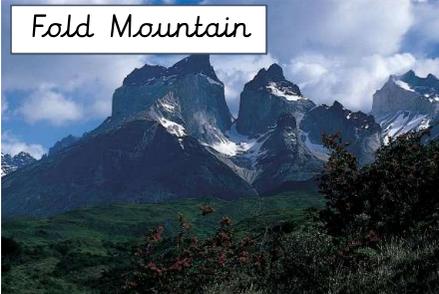

Key Learning

- What are the layers of the Earth?
- Where are tectonic plates? What is the correlation between a map of tectonic plates and a map of Earthquakes?
- How are mountains formed and what are their key features?
- What are the features of a volcano? How do they erupt and is there a pattern?

Assessment Writing Task  
 Is there a pattern to where volcanoes, mountains and earthquakes are found in the world?

Features of a Volcano

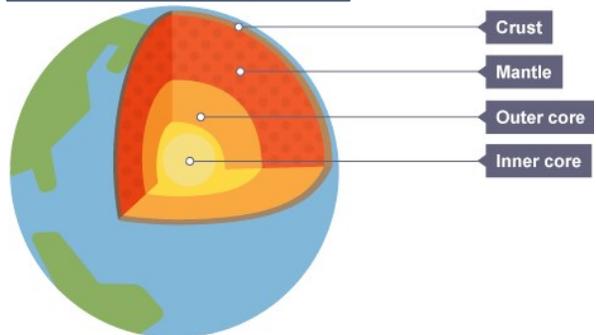

Fold Mountain

Key Vocabulary

Crust	Lava
Mantle	Ash Cloud
Outer Core	Central
Inner Core	Vent
Tectonic	Side Vent
Plate	Magma
Earthquake	Layer
Richter	Erupt
Scale	
Fold	
Mountain	
Himalayas	
Andes	
Alps	

Layers of the Earth

Tectonic Plates
