At St. Ignatius we have a flexible approach to the curriculum. These topics act as a guide, however we respond to children's interests and needs. Therefore, the content of each topic is subject to change, and many other topics may be covered too, in line with children's interests.

Mathematics and Literacy are an integral part of every day in EYFS. They are taught throughout our topics, and children have opportunities to develop their skills and knowledge during their child-initiated learning time. In Literacy we focus on storytelling, letter formation, blending and segmenting for reading and writing.
