

English

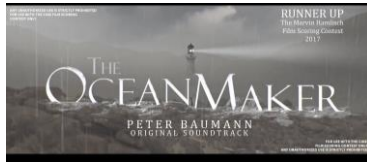

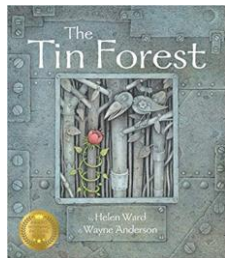

Read and analyse a modern fable,
The Tin Forest by Helen Ward and Wayne Anderson

Write our own modern fables.

Read and analyse explanation texts.

Watch and analyse The Ocean Maker.

Write an explanation text for a machine
that can create rain.

Summer 2

Class 4

**What are biomes and how
are they distributed around
the world?**

Geography

What is a biome?

Where are biomes located in relation to the
Equator and Tropics of Cancer and Capricorn?

How does climate help create biomes?

What plants and animals live in the different
biomes?

5 main biomes:

- Tundra
- Forest – boreal (Taiga), temperate and rainforest
- Grasslands – tropical and temperate
- Deserts – hot and cold
- Aquatic – freshwater and saltwater

Why are biomes important?

What are the threats to biomes?

Science

Living things and their habitats

What makes an organism living?

Group living organisms

Learn about the scientist Carl Linnaeus.

Learn how classification keys work and use them to classify
vertebrates, invertebrates and plants.

Find out about negative impacts on habitats – the decline of
the Weedy sea dragon.

Find out about positive impacts on habitats – Fylde Coast Sand
Dune Project.
