

Year 3 - Summer 1

Learning Question: What is life like in the Amazon Basin?

What is the Amazon Basin?

The Amazon basin is an area of land in South America from which all the water that falls to the ground as rain or snow flows to the Amazon River and its surrounding tributaries.

The Amazon basin is the largest in the world. The largest source of the water going to the Amazon River comes from the Andes Mountains.

Bolivia, Brazil,
Columbia, Ecuador,
Guyana, Peru,
Suriname,
Venezuela

What do plants need to grow?

- water
- nutrients from the soil
- light
- air
- room to grow
