# School is closed

Our school is closed for a while. This is because we all need to keep a bigger distance apart from each other at the moment.
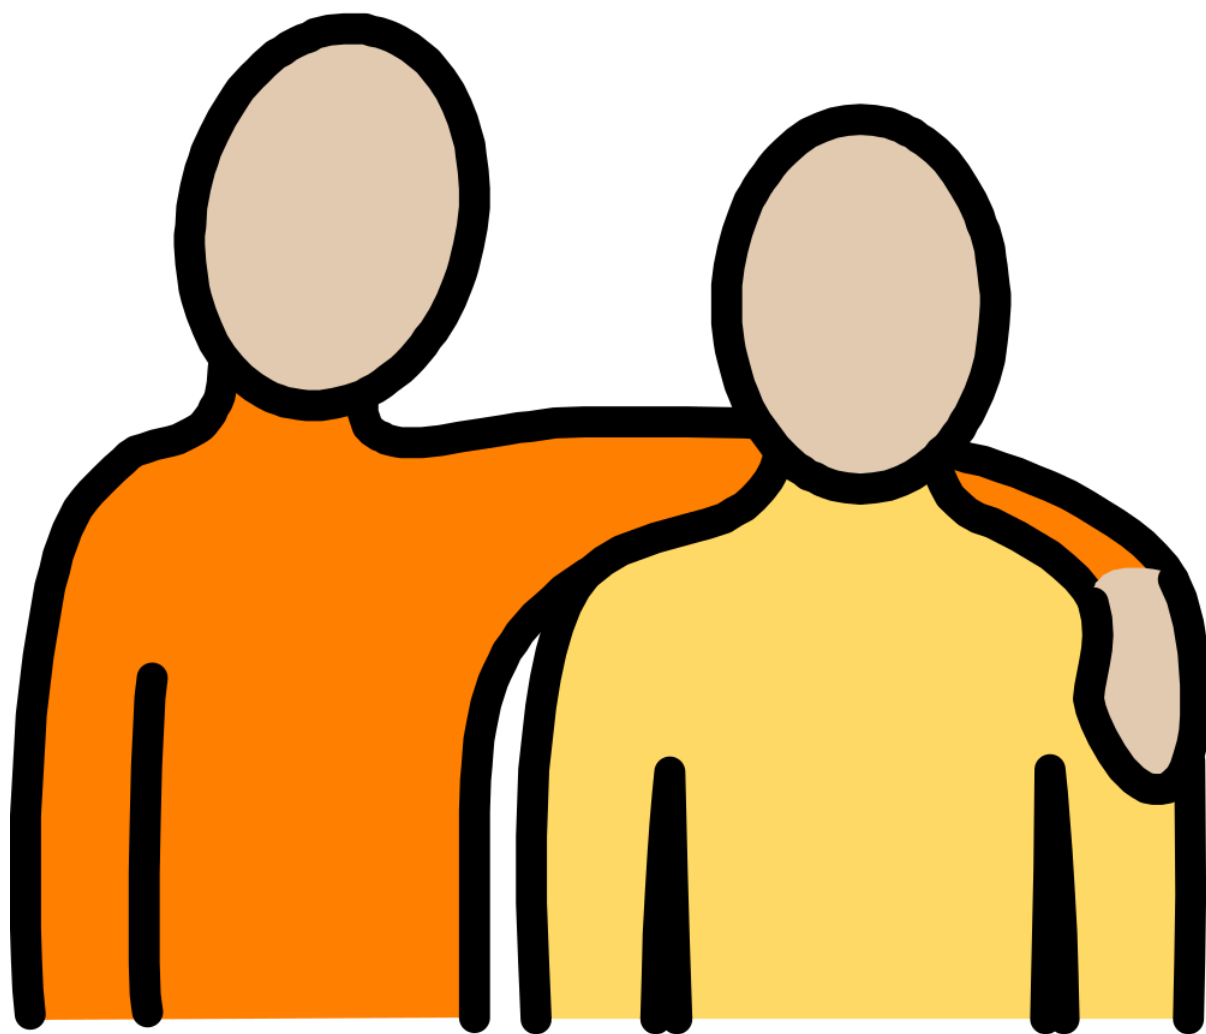

The Coronavirus, or COVID-19 as it is also known, spreads quickly between people, just like a cold does. If we are further apart then we can help to stop it spreading.
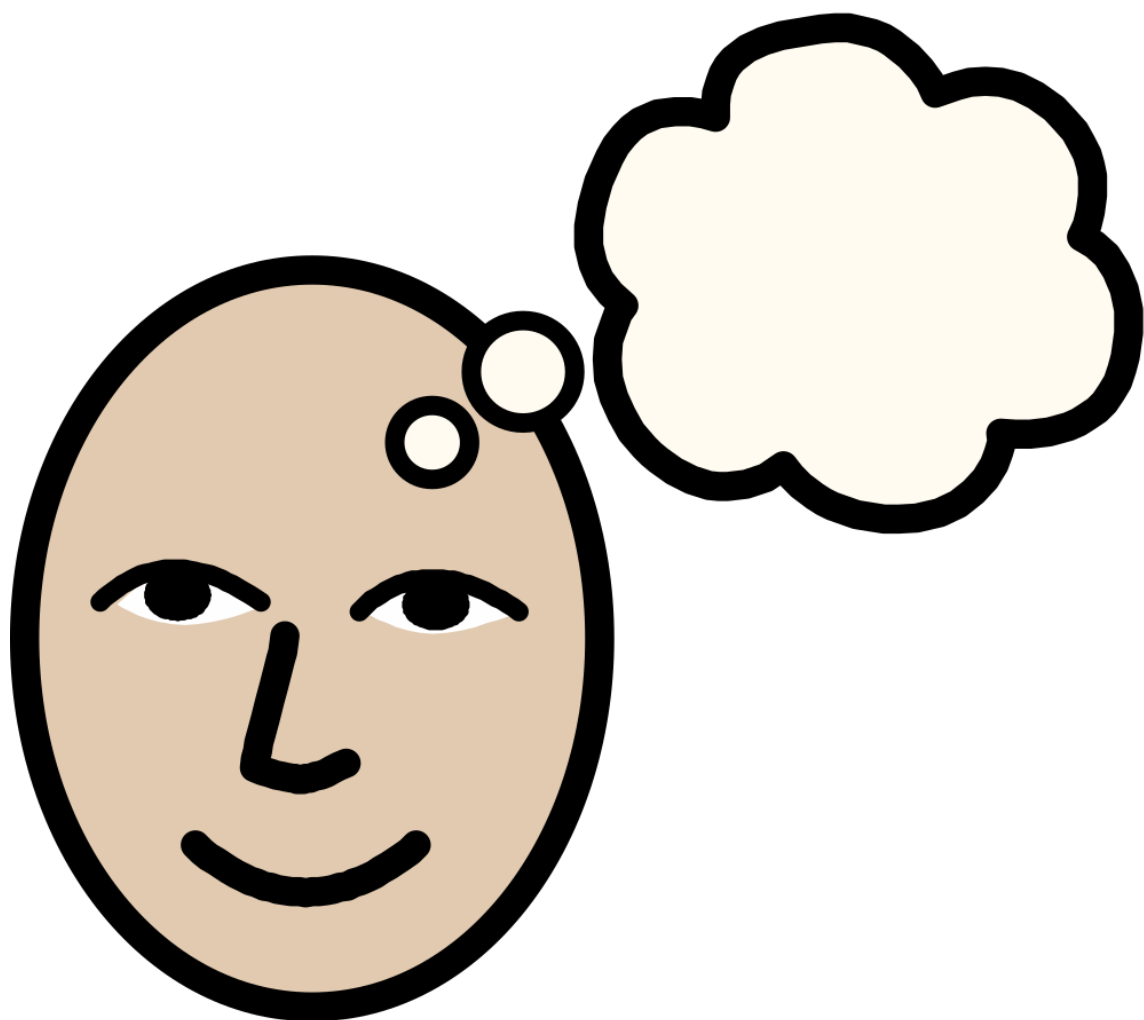

When I stay at home it can stop the Coronavirus spreading to other people and my family. This is good.

My teachers might set me some work that I can do at home.

I will be staying home and be looked after by my family.

Whilst I am at home, my teachers will be thinking of me. They are still my teachers and we can contact school if we need to.

I will try to do my work when my family ask me to. If I do then my family and teachers will be happy.
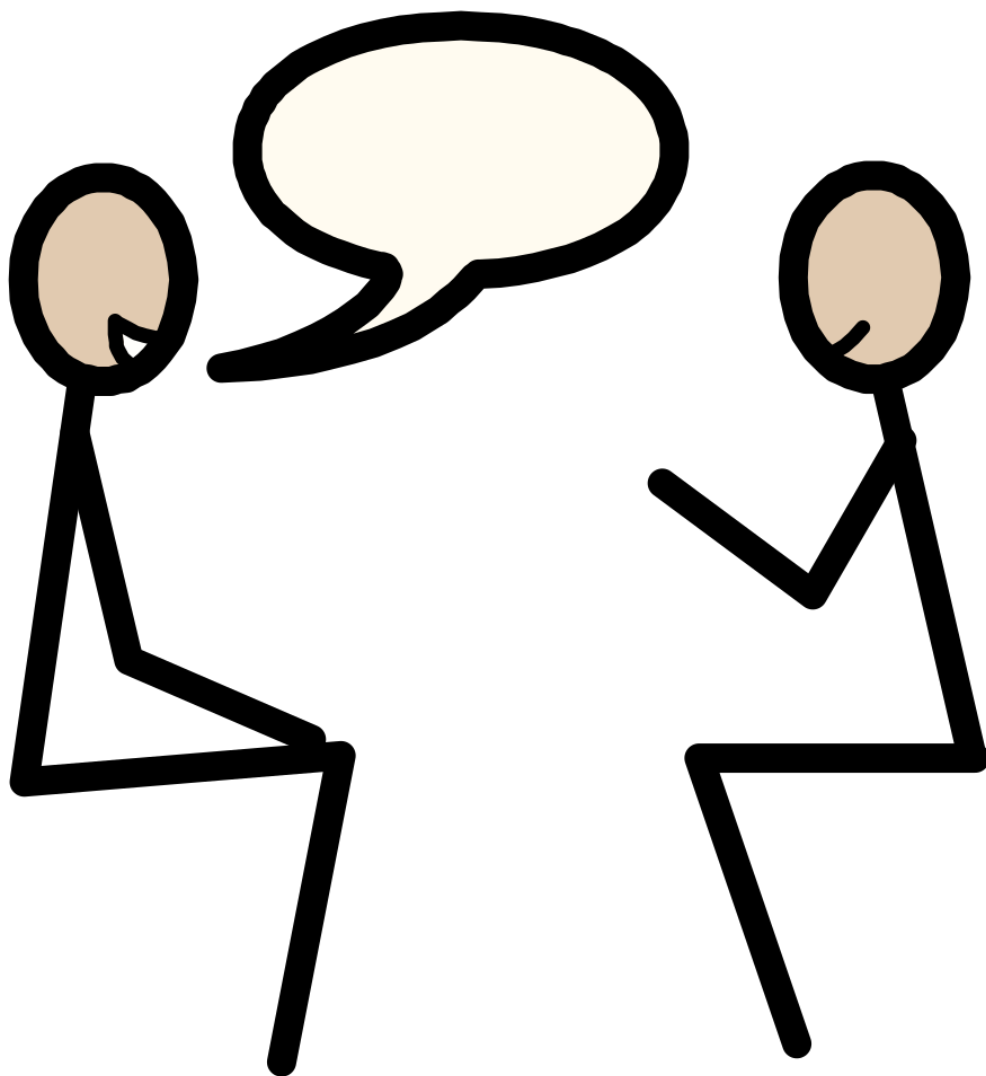

A small number of children are still going to school. This is because their parents are doing jobs that are trying to help stop spread Coronavirus or help people with their daily needs.

We will be at home for some time. Nobody knows how long at the moment, but when the virus stops spreading then I will go back to school. School will tell us when it is time to go back.

If I have any questions of worries then I should talk to my family. They can contact school to ask any questions too.
