

## St John the Evangelist Science Curriculum End Points

Year Group	Scientific Progression Thread	Curriculum End Points
<b>EYFS</b>	Curiosity and observation	<ul style="list-style-type: none"><li>• Explore the natural world through observation and play.</li><li>• Draw simple pictures of animals and plants.</li><li>• Recognise similarities and differences between environments.</li><li>• Understand basic processes and changes in the natural world (seasons, weather, changing states of matter).</li><li>• Begin to use simple scientific vocabulary in talk and play</li></ul>
<b>Year 1</b>	Naming, identifying and simple grouping	<ul style="list-style-type: none"><li>• Identify and name common animals, including carnivores, herbivores, and omnivores.</li><li>• Describe and compare the structure of common animals.</li><li>• Identify, name, and describe basic parts of the human body.</li><li>• Distinguish between an object and the material it is made from.</li><li>• Identify and describe everyday materials and their properties.</li><li>• Observe seasonal changes and describe weather associated with seasons.</li><li>• Begin to recognise day and night as linked to Earth's rotation.</li></ul>
<b>Year 2</b>	Naming, identifying and simple grouping	<ul style="list-style-type: none"><li>• Describe the importance of exercise, hygiene, and diet for humans.</li><li>• Identify and compare living things in habitats; describe simple food chains.</li><li>• Explore plant growth, requirements for survival, and life cycles.</li><li>• Group materials by properties and suitability for uses.</li><li>• Observe changes when materials are heated or cooled (link to water cycle).</li><li>• Begin to recognise simple forces (push/pull) and magnetism.</li><li>• Observe the movement of the sun and moon; describe day length variation.</li></ul>
<b>Year 3</b>	Systems, processes and cause-effect relationships	<ul style="list-style-type: none"><li>• Identify and describe the functions of plant parts (roots, stem, leaves, flowers).</li><li>• Explore life cycles of flowering plants, including pollination and seed dispersal.</li><li>• Describe the simple functions of the human digestive system.</li><li>• Recognise skeletons and muscles in animals and humans.</li><li>• Compare and group rocks; describe fossil formation and soil types.</li><li>• Recognise states of matter (solid, liquid, gas) and changes of state.</li><li>• Explore light: reflection, shadows, and how we see things.</li><li>• Investigate sound: how sounds are made, pitch, and volume.</li><li>• Construct simple electrical circuits; identify conductors and insulators.</li></ul>

## St John the Evangelist Science Curriculum End Points

<b>Year 4</b>	Systems, processes and cause-effect relationships	<ul style="list-style-type: none"><li>• Classify living things in local and wider environments.</li><li>• Recognise that environments can change and pose dangers to living things.</li><li>• Describe the simple functions of the human circulatory and respiratory systems.</li><li>• Explore nutrition and the impact of lifestyle choices.</li><li>• Investigate evaporation, condensation, and the water cycle.</li><li>• Explore forces: contact and non-contact, including magnetism.</li><li>• Investigate levers, pulleys, and gears in everyday contexts.</li><li>• Explore Earth and space: movement of planets, moon phases, and day/night.</li></ul>
<b>Year 5</b>	Abstract concepts (energy, forces, particle theory, evolution) and independent enquiry	<ul style="list-style-type: none"><li>• Describe life cycles of plants and animals, including reproduction (sexual and asexual).</li><li>• Explore changes in humans as they develop to old age.</li><li>• Investigate properties of materials: hardness, solubility, transparency, conductivity.</li><li>• Explore reversible and irreversible changes (mixing, dissolving, burning).</li><li>• Investigate forces: gravity, air resistance, water resistance, friction.</li><li>• Explore Earth and space: movement of Earth and other planets relative to the sun.</li><li>• Describe the movement of the moon relative to Earth.</li><li>• Investigate light: how it travels, reflection, refraction, and shadows.</li><li>• Explore electricity: series circuits, components, and symbols.</li></ul>
<b>Year 6</b>	Abstract concepts (energy, forces, particle theory, evolution) and independent enquiry	<ul style="list-style-type: none"><li>• Classify living things using standard systems; explore micro-organisms.</li><li>• Describe the main parts of the human circulatory system and their functions.</li><li>• Recognise the impact of diet, exercise, drugs, and lifestyle on health.</li><li>• Explore evolution and inheritance: variation, adaptation, fossils, and classification.</li><li>• Investigate the particle model and chemical changes.</li><li>• Explore more complex forces and their effects in everyday contexts.</li><li>• Apply knowledge of energy transfer across topics (light, sound, electricity, space).</li><li>• Explain the movement of the Earth, planets, and moon using scientific models.</li><li>• Use scientific vocabulary, diagrams, and explanations with increasing precision.</li><li>• Plan and carry out fair tests independently, drawing conclusions with evidence.</li></ul>
