

Dear Parents (and children),

I will be setting your home learning work for the rest of this term.

I have included Maths work from the same programme that the children were following before half term. There is, as there was before, a parent guide to support you and your child in completing this work.

The English work for this fortnight is covered by the other home learning tasks set.

The other elements of the home learning tasks are based on different themes and this week for, Year 5, the theme is 'Water, Water Everywhere. There are lots of fun and interesting tasks to complete and you will get to know the value water has to humans and our world.

Any links that are needed are included on the bottom of the home learning task page. I am so looking forward to seeing your work again!

If you require any support with any of the work set, please do not hesitate to contact me via the school email address. I am always happy to discuss any issues that may come up.

Don't forget to share your achievements on twitter, Facebook or again, via school email.

I do hope this letter finds you all well, physically and mentally. This has been a challenging time for all and I can't wait until we can all be back together in our school again. Until then, please continue to enjoy spending time with one another, doing things that we never usually get the chance to do.

Very best Wishes,

Mrs Nelson x
