

Year 5 Summer 2

Create a scrap book of special memories that you have.

Learn a new times table and corresponding division facts, answer questions about it and be able to recite this to the class teacher.

Design your own kite, and see if you can make it fly!

Play balloon ball— hit a balloon back and forth with either your hands or a racket.

Choose some songs from your favourite film and sing along to them.

Make a television or radio advert that persuades people to buy your favourite toy.

Create a portrait of a family member or a pet.

Complete a mini-project on your favourite time in History. Who were the main people that lived then? What did their homes look like? How did they have fun?

Challenge—Try to build a house of cards.

D- DAY

The 6th June is the anniversary of D - Day.

Create a power point to explain what happened during the D-Day landings.

Ocean Day

Can you create a placard or poster to highlight the importance of taking care of our oceans? Think of an interesting or clever slogan. Also, remember to make it big, bright and bold.

Healthy Eating

Design a meal for an athlete that will give them lots of energy to allow them to do their very best. Explain why you have chosen each of the different foods. Also, you could create a meal for an athlete that would slow him/her down. Good luck!

Purple Mash

This is an online resource that children use for their computing lessons, but it also provide resources to support other subjects in the curriculum.

Web address:

<https://www.purplemash.com/stjohnts23>

Children all have an individual login card with a username and password.

Once logged on, children can access activities and tools for all subjects. They can use the 'search' tool at the top to search for specific topics e.g. Egyptians, or World War 1.

'Serial Mash' contains a huge range of online stories with linked resources.

'Tools' - this contains many different tools that the children can explore and use. In school, we have used 2Code and 2Animate.

Topic - Victorian Schools

Complete some online research about the Victorian school system. What was a Victorian day at school like? How does it compare to a modern school? What were the children in Victorian schools being prepared for? Display your findings on a Power point or poster.

When you have done this please take a photograph and share it via our school's Twitter or Facebook

Maths

This week we have a Maths Bingo board for you to complete. Please take the time to challenge yourself, and remember that the Mathematical journey is more important than the answer!

Complete this 5 a day—then make 5 of your own as often as you can:

=

1. $986,345 - 23,328 =$

2. $10 \text{ cubed} + 6 \text{ cubed} =$

3. $645 \times 34 =$

4. $8972 \div 3 =$

5. If Sammy has 47,000 grams of salt.

How many KG of salt does he own?
