

## Researching Planets

Choose one of the planets in our solar system. Use books or the Internet to do your own research and find out some interesting facts about that planet.

Alternatively, you may have heard about a dwarf planet called Pluto. Can you find out what Pluto is like, and why it is no longer classed as a planet?

Draw a picture here of

	the planet
You should find out:	the planet.
• the planet's name	
• the planet's diameter (its width)	
• what the planet is made of	
• the length of a day	
• the length of a year	
• if the planet has any moons	
Can you find out any other interesting facts about the planet?
