

Mathematics Progression Map

This progression document aims to give guidance on the progression of Mathematics knowledge and skills across St. Joseph's Catholic Primary School. It can be used by teachers to differentiate work & expectations appropriately for pupils working above and below age-related expectations. Pupils should also be encouraged to access mathematical problems presented in a wide range of different, complex ways, ask their own mathematical questions and follow their own lines of enquiry when exploring an open-ended maths problem. Pupils' use of mathematical language, fluency in the fundamentals, reasoning mathematically following a line of enquiry and solving problem by applying their mathematical skills should be evident in their mathematics books'

St Joseph's Mathematical Vision

- ~ A positive attitude to mathematics as an interesting and valuable subject;
- ~ A range of learning strategies: working both cooperatively, collaboratively and independently;
- ~ Confidence and competence with numbers and the number system;
- ~ Be able to explore features of shape and space, and develop measuring skills in a range of contexts;
- ~ An understanding of the importance of mathematics in everyday life;
- ~ To ensure pupils become fluent in the fundamentals of mathematics;
- ~ Develop conceptual knowledge and an ability to recall and apply knowledge rapidly and accurately;
- ~ Ensure that pupils can reason mathematically and solve problems;
- ~ For our children to develop a 'can do' attitude and perceive themselves as mathematicians.

Key features of our Maths Mastery curriculum:

- ❖ High expectations for every child;
- ❖ Fewer topics, greater depth;
- ❖ Number sense and place value come first;
- ❖ Focus on mathematical thinking and language;
- ❖ Problem solving is central;
- ❖ Calculate with confidence– understand why it works.

Mathematics Progression Map

EYFS

KS1

KS2

Number and Place Value

Counting

EYFS Three and four year olds Reception ELG	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<p>Recite numbers past 5. • Say one number name for each item in order: 1, 2, 3, 4, 5. • Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').</p> <p>Count objects, actions and sounds.</p> <p>Count beyond ten. Verbally count beyond 20, recognising the pattern of the counting system.</p>	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero
	count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1 000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000	
	given a number, identify one more and one less					

Comparing Numbers

<p>Compare quantities using language: 'more than', 'fewer than'.</p> <p>Compare numbers.</p> <p>Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.</p>	<p>use the language of: equal to, more than, less than (fewer), most, least</p>	<p>compare and order numbers from 0 up to 100; use <, > and = signs</p>	<p>compare and order numbers up to 1 000</p>	<p>order and compare numbers beyond 1 000</p>	<p>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)</p>	<p>read, write, order and compare numbers up to 10 000000 and determine the value of each digit (appears also in Reading and Writing Numbers)</p>
				<p><i>compare numbers with the same number of decimal places up to two decimal places (Also in fractions)</i></p>		

Identifying, Representing and Estimating Numbers

<p>Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').</p> <p>Show 'finger numbers' up to 5.</p> <p>Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5.</p>	<p>identify and represent numbers using objects and pictorial representations including the number line</p>	<p>identify, represent and estimate numbers using different representations, including the number line</p>	<p>identify, represent and estimate numbers using different representations</p>	<p>identify, represent and estimate numbers using different representations</p>		
---	---	--	---	---	--	--

Experiment with their own symbols and marks as well as numerals.						
--	--	--	--	--	--	--

<p>Subitise.</p> <p>Link the number symbol (numeral) with its cardinal number value.</p> <p>Subitise (recognising quantities without counting) up to 5.</p>						
---	--	--	--	--	--	--

Reading and Writing Numbers (including Roman Numerals)

<p>Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5.</p> <p>Experiment with their own symbols and marks as well as numerals.</p> <p>Link the number symbol (numeral) with its cardinal number value.</p>	read and write numbers from 1 to 20 in numerals and words.	read and write numbers to at least 100 in numerals and in words	<p>read and write numbers up to 1 000 in numerals and in words</p> <p><i>tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks</i> (Also in Measurement)</p>	<p>read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.</p>	<p>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Comparing Numbers)</p> <p>read Roman numerals to 1 000 (M) and recognise years written in Roman numerals.</p>	<p>read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Understanding Place Value)</p>
---	--	---	---	--	--	--

Understanding Place Value

<p>Understand the 'one more than/one less than' relationship between consecutive numbers. Explore the composition of numbers to 10.</p> <p>Have a deep understanding of numbers to 10, including the composition of each number.</p>		<p>recognise the place value of each digit in a two-digit number (tens, ones)</p>	<p>recognise the place value of each digit in a three-digit number (hundreds, tens, ones)</p>	<p>recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)</p> <p><i>find the effect of dividing a one- or two-digit number</i></p>	<p>read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)</p>	<p>read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers)</p> <p><i>identify the value of</i></p>
--	--	---	---	--	---	--

				<p><i>by 10 and 100, identifying the value of the digits in the answer as units, tenths and hundredths (copied from Fractions)</i></p>	<p><i>recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (copied from Fractions)</i></p>	<p><i>each digit to three decimal places and multiply and divide numbers by 10, 100 and 1 000 where the answers are up to three decimal places (copied from Fractions)</i></p>
--	--	--	--	--	---	--

Rounding

				<p>round any number to the nearest 10, 100 or 1 000</p>	<p>round any number up to 1 000 000 to the nearest 10, 100, 1 000, 10 000 and 100 000</p>	<p>round any whole number to a required degree of accuracy</p>
--	--	--	--	---	---	--

				round decimals with one decimal place to the nearest whole number (copied from Fractions)	round decimals with two decimal places to the nearest whole number and to one decimal place (copied from Fractions)	solve problems which require answers to be rounded to specified degrees of accuracy (copied from Fractions)
--	--	--	--	---	---	---

Problem Solving

Solve real world mathematical problems with numbers up to 5.		use place value and number facts to solve problems	solve number problems and practical problems involving these ideas.	solve number and practical problems that involve all of the above and with increasingly large positive numbers	solve number problems and practical problems that involve all of the above	solve number and practical problems that involve all of the above
--	--	--	---	--	--	---

Number: Addition and Subtraction

Number Bonds

Automatically recall number bonds for numbers 0-5 and some to 10. Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.	represent and use number bonds and related subtraction facts within 20	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100				
---	--	--	--	--	--	--

Mental Calculation

<p>Repeated as above for mental calculation. Automatically recall number bonds for numbers 0-5 and some to 10. Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</p>	<p>add and subtract onedigit and two-digit numbers to 20, including zero</p>	<p>add and subtract numbers using concrete objects, pictorial representations, and mentally, including:</p> <ul style="list-style-type: none"> * a two-digit number and ones * a two-digit number and tens * two two-digit numbers <p>adding three one-digit numbers</p>	<p>add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds 		<p>add and subtract numbers mentally with increasingly large numbers</p>	<p>perform mental calculations, including with mixed operations and large numbers</p>
---	--	---	--	--	--	---

<p>read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written Methods)</p>	<p>show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot</p>				<p>use their knowledge of the order of operations to carry out calculations involving the four operations</p>
---	---	--	--	--	---

Written Methods

read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)

add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction

add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate

add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)

Inverse Operations, Estimating and Checking Answers

recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

estimate the answer to a calculation and use inverse operations to check answers

estimate and use inverse operations to check answers to a calculation

use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy

use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

Problem Solving

<p>Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.</p>	<p>solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square + 9$</p>	<p>solve problems with addition and subtraction: * using concrete objects and pictorial representations, including those involving numbers, quantities and measures <i>applying their increasing knowledge of mental and written methods solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change (copied from Measurement)</i></p>	<p>solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction</p>	<p>solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why</p>	<p>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</p>	<p>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</p> <p>Solve problems involving addition, subtraction, multiplication and division</p>
---	--	---	--	---	---	--

Number: Multiplication and Division

Multiplication and Division

<p>count in multiples of twos, fives and tens (copied from Number and Place Value)</p>	<p>count in steps of 2, 3, and 5 from 0, and in tens from any number, forward or backward (copied from Number and Place Value)</p>	<p>count from 0 in multiples of 4, 8, 50 and 100 (copied from Number and Place Value)</p>	<p>count in multiples of 6, 7, 9, 25 and 1 000 (copied from Number and Place Value)</p>	<p>count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 (copied from Number and Place Value)</p>
--	--	---	---	---

	<i>recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers</i>	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	recall multiplication and division facts for multiplication tables up to 12×12		
--	---	---	---	--	--

Mental Calculation

			write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times onedigit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers	multiply and divide numbers mentally drawing upon known facts	perform mental calculations, including with mixed operations and large numbers
--	--	--	--	--	---	--

		show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot		recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	<i>associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$) (copied from Fractions)</i>
--	--	---	--	---	--	---

Written Calculation						
		calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times onedigit numbers, using mental and progressing to formal written methods (appears also in Mental Methods)	multiply two-digit and three-digit numbers by a onedigit number using formal written layout	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication

					<p>divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context</p>	<p>divide numbers up to 4 digits by a two-digit whole number using the formal written method of short division where appropriate for the context divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context</p>
--	--	--	--	--	---	---

						<p><i>use written division methods in cases where the answer has up to two decimal places (copied from Fractions (including decimals))</i></p>
--	--	--	--	--	--	--

Properties of numbers: prime, square, cube, factors and multiples.

				<p>recognise and use factor pairs and commutativity in mental calculations (repeated)</p>	<p>identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers.</p> <p><i>know and use the vocabulary of prime numbers, prime factors and composite (nonprime) numbers</i></p> <p><i>establish whether a number up to 100 is prime and recall prime numbers up to 19</i></p>	<p>identify common factors, common multiples and prime numbers</p> <p><i>use common factors to simplify fractions; use common multiples to express fractions in the same denomination (copied from Fractions)</i></p>
					<p>recognise and use square numbers and cube numbers, and the notation for $\text{ }^2\text{ squared ()}$ and cubed $\text{ }^3\text{ ()}$</p>	<p><i>calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm³) and cubic metres (m³), and extending to other units such as mm³ and km³ (copied from Measures)</i></p>

Order of operations

						use their knowledge of the order of operations to carry out calculations involving the four operations
--	--	--	--	--	--	--

Inverse Operations, Estimating and Checking Answers

			estimate the answer to a calculation and use inverse operations to check answers (copied from Addition and Subtraction)	<i>estimate and use inverse operations to check answers to a calculation</i> (copied from Addition and Subtraction)		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy
--	--	--	---	---	--	--

Problem Solving

	solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects	solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes solve problems involving addition, subtraction, multiplication and a	solve problems involving addition, subtraction, multiplication and division solve problems involving similar shapes where the scale factor is known or can be found (copied from Ratio and Proportion)
--	---	---	---	---	---	---

				objects are connected to m objects	combination of these, including understanding the meaning of the equals sign solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	
--	--	--	--	------------------------------------	--	--

Ratio and Proportion

Statements only appear in Year 6 but should be connected to previous learning, particularly fractions and multiplication and division

						solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
						solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison
						solve problems involving similar shapes where the scale factor is known or can be found

						solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.
--	--	--	--	--	--	---

Measurement

Comparing and Estimating

<p>Make comparisons between objects relating to size, length, weight and capacity.</p> <p>Compare length, weight and capacity.</p>	<p>compare, describe and solve practical problems for:</p> <ul style="list-style-type: none"> * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] <p>time [e.g. quicker, slower, earlier, later]</p>	<p>compare and order lengths, mass, volume/capacity and record the results using >, < and =</p>		<p>estimate, compare and calculate different measures, including money in pounds and pence (also included in Measuring</p>	<p>calculate and compare the area of squares and rectangles including using standard units, square centimetres (cm²) and square metres (m²) and estimate the area of irregular shapes (also included in measuring) estimate volume (e.g. using 1 cm³ blocks to build cubes and cuboids) and capacity (e.g. using water)</p>	<p>calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm³) and cubic metres (m³), and extending to other units such as mm³ and km³.</p>
--	---	---	--	--	--	--

	sequence events in chronological order using language [e.g.	compare and sequence intervals of time	compare durations of events, for example to calculate the time			
--	---	--	--	--	--	--

	before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]		taken by particular events or tasks			
			estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight (appears also in Telling the Time)			

Measuring and Calculating

	measure and begin to record the following: * lengths and heights * mass/weight * capacity and volume * time (hours, minutes, seconds)	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	estimate, compare and calculate different measures , including money in pounds and pence (appears also in Comparing)	use all four operations to solve problems involving measure (e.g. length, mass, volume, money) using decimal notation including scaling.	solve problems involving the calculation and conversion of units of measure , using decimal notation up to three decimal places where appropriate (appears also in Converting)
			measure the perimeter of simple 2-D shapes	measure and calculate the perimeter of a	measure and calculate the perimeter of	recognise that shapes with the same areas can have different

				rectilinear figure (including squares) in centimetres and metres	composite rectilinear shapes in centimetres and metres	perimeters and vice versa
--	--	--	--	--	--	----------------------------------

	recognise and know the value of different denominations of coins and notes	recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value find different combinations of coins that equal the same amounts of money solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change	add and subtract amounts of money to give change, using both £ and p in practical contexts			
				find the area of rectilinear shapes by counting squares	calculate and compare the area of squares and rectangles including using standard units, square centimetres ² (cm ²) and square metres ² (m ²) and estimate the area of irregular shapes <i>recognise and use square numbers and cube numbers, and the notation for</i>	calculate the area of parallelograms and triangles calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm ³) and cubic metres (m ³), and extending to other units [e.g. mm ³ and km ³]. recognise when it is possible to use formulae

					2 squared () 3 and cubed () (copied from Multiplication and Division)	for area and volume of shapes
--	--	--	--	--	---	-------------------------------

Telling the Time

Begin to describe a sequence of events, real or fictional, using words, such as 'first', 'then...'	tell the time to the hour and half past the hour and draw the hands on a clock face to show these times	tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times.	tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	read, write and convert time between analogue and digital 12 and 24-hour clocks (appears also in Converting)		
	recognise and use language relating to dates, including days of the week, weeks, months and years	know the number of minutes in an hour and the number of hours in a day. (appears also in Converting)	estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as a.m./p.m., morning, afternoon, noon and midnight (appears also in Comparing and Estimating)			

				solve problems involving converting from hours to minutes; minutes to seconds; years to	solve problems involving converting between units of time	
--	--	--	--	---	---	--

				months; weeks to days (appears also in Converting)		
--	--	--	--	---	--	--

Converting

		know the number of minutes in an hour and the number of hours in a day. (appears also in Telling the Time)	know the number of seconds in a minute and the number of days in each month, year and leap year	convert between different units of measure (e.g. kilometre to metre; hour to minute)	convert between different units of metric measure (e.g. kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	
--	--	---	---	--	--	--

				read, write and convert time between analogue and digital 12 and 24-hour clocks (appears also in Converting)	solve problems involving converting between units of time	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate (appears also in Measuring and Calculating)
--	--	--	--	---	---	--

				<p>solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days (appears also in Telling the Time)</p>	<p>understand and use equivalences between metric units and common imperial units such as inches, pounds and pints</p>	<p>convert between miles and kilometres</p>
--	--	--	--	---	--	---

Geometry- Position and Direction						
Position, direction and movement						
<p>Understand position through words alone – for example, “The bag is under the table,” – with no pointing. Describe a familiar route. Discuss routes and locations, using words like ‘in front of’ and ‘behind’. Draw information from a simple map.</p>	<p>describe position, direction and movement, including half, quarter and threequarter turns.</p>	<p>use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)</p>		<p>describe positions on a 2-D grid as coordinates in the first quadrant describe movements between positions as translations of a given unit to the left/right and up/down</p>	<p>identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed</p>	<p>describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.</p>
				<p>plot specified points and draw sides to complete a given polygon</p>		

Pattern

Talk about and identify the patterns around them. For example, stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs', etc. Extend and create ABAB patterns – stick, leaf, stick, leaf. Notice and correct an error in a repeating pattern.
Continue, copy and create repeating patterns.

order and arrange combinations of mathematical objects in patterns and sequences

Geometry- Properties of Shape

Identifying shapes and their properties

	<p>recognise and name common 2-D and 3-D shapes, including:</p> <ul style="list-style-type: none"> * 2-D shapes [e.g. rectangles (including squares), circles and triangles] * 3-D shapes [e.g. cuboids (including cubes), pyramids and spheres]. 	<p>identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line</p>		<p>identify lines of symmetry in 2-D shapes presented in different orientations</p>	<p>identify 3-D shapes, including cubes and other cuboids, from 2-D representations</p>	<p>recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing)</p>
		<p>identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces</p>				<p>illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius</p>
		<p>identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]</p>				

Drawing and Constructing

		draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them	complete a simple symmetric figure with respect to a specific line of symmetry	draw given angles, and measure them in degrees ($^{\circ}$)	draw 2-D shapes using given dimensions and angles	
					recognise, describe and build simple 3-D shapes, including making nets (appears also in Identifying Shapes and Their Properties)	
Comparing and classifying						
		compare and sort common 2-D and 3-D shapes and everyday objects		compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	use the properties of rectangles to deduce related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons

					distinguish between regular and irregular polygons based on reasoning about equal sides and angles	
--	--	--	--	--	--	--

Angles						
--------	--	--	--	--	--	--

			recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	
			identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle	identify acute and obtuse angles and compare and order angles up to two right angles by size	identify: <ul style="list-style-type: none"> * angles at a point and one whole $^{\circ}$ turn (total 360) * angles at a point on a straight line and $\frac{1}{2}$ a turn (total $^{\circ}$ 180) * other multiples of $^{\circ}$ 90 	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles

			identify horizontal and vertical lines and pairs of perpendicular and parallel lines			
Fractions (including decimals and percentages)						
Counting in fractional steps						
		<i>Pupils should count in fractions up to 10, starting from any number and using</i>	count up and down in tenths	count up and down in hundredths		

		<i>the $\frac{1}{2}$ and $\frac{2}{4}$ equivalence on the number line (Non Statutory Guidance)</i>				
Recognising fractions						
	recognise, find and name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a length, shape, set of objects or quantity	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small denominators	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)	

			recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.			
	recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators			
Comparing Fractions						
			compare and order unit fractions, and fractions with the same denominators		compare and order fractions whose denominators are all	compare and order fractions, including fractions >1

					multiples of the same number	
Comparing decimals						
				compare numbers with the same number of decimal places up to two decimal places	read, write, order and compare numbers with up to three decimal places	identify the value of each digit in numbers given to three decimal places

Rounding including decimals

				round decimals with one decimal place to the nearest whole number	round decimals with two decimal places to the nearest whole number and to one decimal place	solve problems which require answers to be rounded to specified degrees of accuracy
--	--	--	--	---	---	---

Equivalence including fractions, decimals and percentages

		write simple fractions e.g. $\frac{1}{2}$ of 6 = 3 and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$	recognise and show, using diagrams, equivalent fractions with small denominators	recognise and show, using diagrams, families of common equivalent fractions	identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths	use common factors to simplify fractions; use common multiples to express fractions in the same denomination
--	--	---	--	---	--	--

				recognise and write decimal equivalents of any number of tenths or hundredths	read and write decimal numbers as fractions (e.g. 0.71 = $\frac{71}{100}$)	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375)
--	--	--	--	---	---	--

					recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	for a simple fraction (e.g. $\frac{3}{8}$)
--	--	--	--	--	---	---

				recognise and write decimal equivalents to $\frac{1}{4}$; $\frac{1}{2}$; $\frac{3}{4}$	recognise the per cent symbol (%) and understand that per cent relates to “number of parts per hundred”, and write percentages as a fraction with denominator 100 as a decimal fraction	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
--	--	--	--	--	---	--

Addition and subtraction of fractions

			add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$)	add and subtract fractions with the same denominator	add and subtract fractions with the same denominator and multiples of the same number	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
					recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = 1\frac{1}{5}$)	

Multiplication and division of fractions

					multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{2} \times \frac{1}{4} = \frac{1}{8}$)
						multiply one-digit numbers with up to two decimal places by whole numbers
						divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$)

Multiplication and division of decimals

						multiply one-digit numbers with up to two decimal places by whole numbers
--	--	--	--	--	--	---

				find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
--	--	--	--	--	--	--

						identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
						associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. $\frac{3}{8}$)
						use written division methods in cases where the answer has up to two decimal places

Problem solving

			solve problems that involve all of the above	solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	solve problems involving numbers up to three decimal places	
			solve simple measure and money problems involving fractions and	solve problems which require knowing percentage		

			decimals to two decimal places.	and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{2}{5}$ and $\frac{4}{5}$ those with a denominator of a multiple of 10 or 25.		
--	--	--	---------------------------------	--	--	--

Statistics

Interpreting, constructing and presenting data

Experiment with their own symbols and marks, as well as numerals.		interpret and construct simple pictograms, tally charts, block diagrams and simple tables	interpret and present data using bar charts, pictograms and tables	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs	complete, read and interpret information in tables, including timetables	interpret and construct pie charts and line graphs and use these to solve problems
		ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity				
		ask and answer questions about totalling and comparing categorical data				

Solving Problems

			solve one-step and two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.	solve comparison, sum and difference problems using information presented in a line graph	calculate and interpret the mean as an average
--	--	--	---	---	---	--

Algebra

Equations

	<i>involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square + 9$ (copied from Addition and Subtraction)</i>	<i>recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition and Subtraction)</i>	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (copied from Addition and Subtraction)		<i>use the properties of rectangles to deduce related facts and find missing lengths and angles (copied from Geometry: Properties of Shapes)</i>	express missing number problems algebraically
--	---	--	--	--	---	---

			<p><i>solve problems, including missing number problems, involving multiplication and division, including integer scaling</i> (copied from Multiplication and Division)</p>			
--	--	--	---	--	--	--

		<p><i>recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100</i> (copied from Addition and Subtraction)</p>				<p>find pairs of numbers that satisfy number sentences involving two unknowns</p>
	<p><i>represent and use number bonds and related subtraction facts within 20</i> (copied from Addition and Subtraction)</p>					<p>enumerate all possibilities of combinations of two variables</p>

Formulae

				<p><i>Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit.</i> <i>(Copied from NSG measurement)</i></p>		<p>use simple formulae</p>
						<p><i>recognise when it is possible to use formulae for area and volume of shapes</i> <i>(copied from Measurement)</i></p>

Sequences

	<p><i>sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening</i> <i>(copied from Measurement)</i></p>	<p><i>compare and sequence intervals of time</i> (copied from Measurement)</p>				<p>generate and describe linear number sequences</p>
