10.2.21

Can I solve 3 digit subtraction calculations?

This is Miss Brinkworth.

She is going to remind you how to do column subtraction in a video.

Click on this video link to watch her lesson.
Pause the lesson whenever you need to.

<https://classroom.thenational.academy/lessons/subtracting-3-digit-numbers-regrouping-tens-to-ones-cgwk8t?step=2&activity=video>

The activities from her lesson are on the following slides:

If you can't work the video, just do the slides without it.

You will need...

Pencil or pen

Paper

Online Dienes

ask your parent or carer to help you to use this URL
<https://mathsbot.com/manipulatives/blocks>

3

You can use online dienes using the website shown, draw them or make some using cut up bits of paper/straws/counters/money etc.

This **warm up** activity is on the video.

Warm up Decide which ones you can answer mentally and which need column subtraction

$384 - 263$	$567 - 234$
$361 - 227$	$443 - 212$
$475 - 255$	$674 - 462$

Answer on the next slide – No peeking!

Answers!

Warm up Decide which ones you can answer mentally and which need column subtraction

$384 - 263$ 121	$567 - 234$ 333
$361 - 227$ 134	$443 - 212$ 231
$475 - 255$ 220	$674 - 462$ 212

This calculation
needs regrouping.

The rest do not need you to regroup

Which of these is the odd one out and why?

Which of these is the odd one out and why?

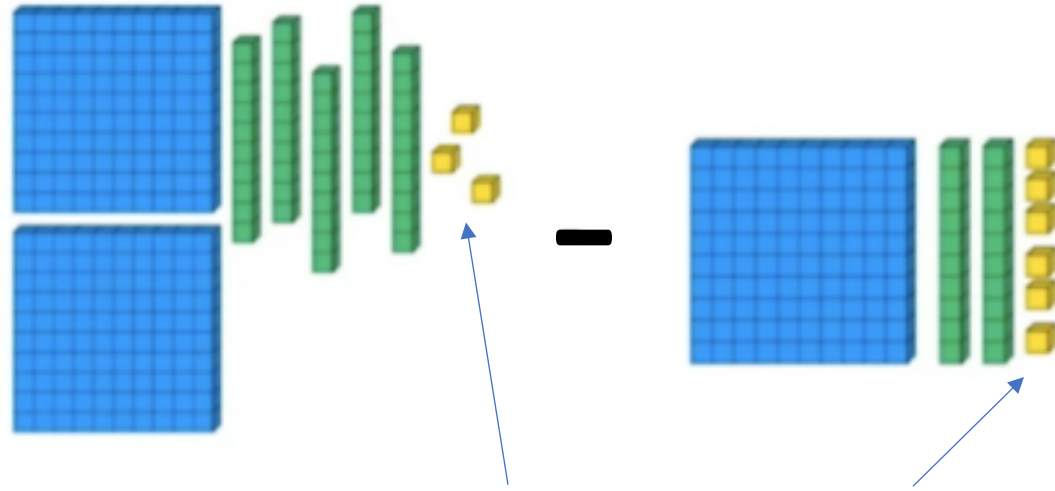

This calculation needs you to regroup.
The other calculations do not need you to regroup.

Try this!

You can use dienes to work out this calculation:

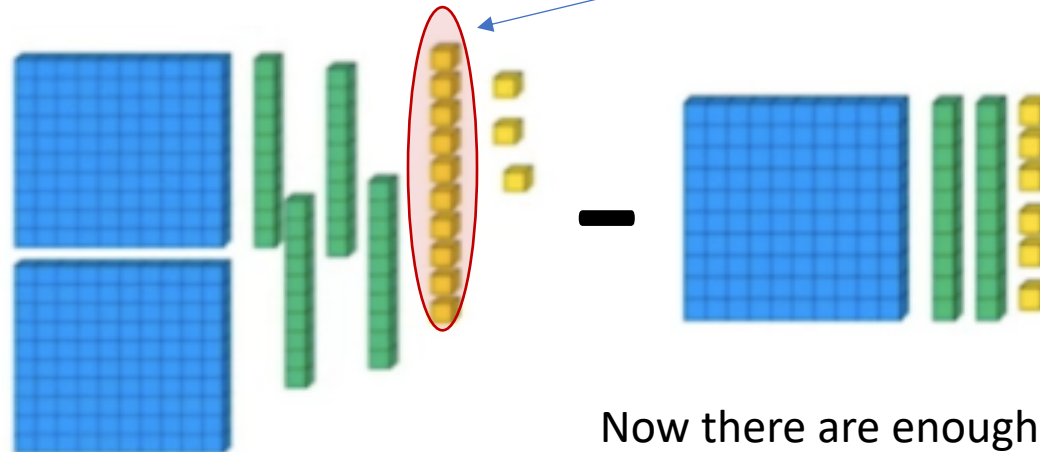

Answer on the next slide.

$$253 - \underline{126}$$

The 3 units is not enough. You can't take 6 units away from 3 units.

So... you have to exchange a ten, for ten units.

Now there are enough units to do the calculation.

Answer:

$$253 - 126 = 127$$

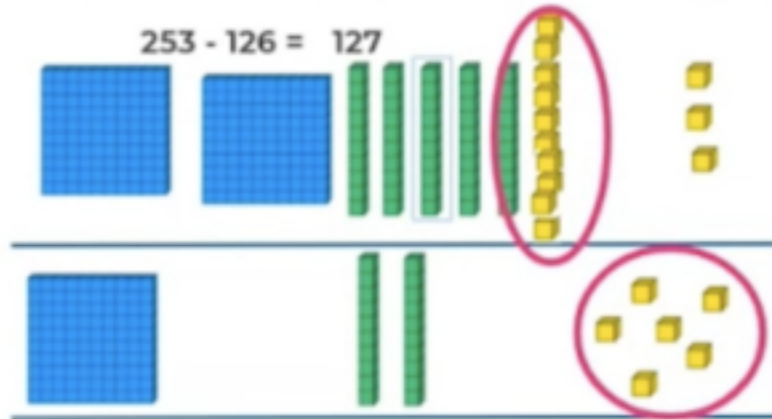

This is what this calculation looks like when using a written column method.

Answer on the next page:

Answer:

Column subtraction $253 - 126 =$

			4				
		2	5	¹ 3			
	-	<u>1</u>	<u>2</u>	<u>6</u>			
		1	2	7			

Now try this one:

Column subtraction $343 - 126 =$

-

=

?

?

			3	1				
		3	4	3				
	-	<u>1</u>	<u>2</u>	<u>6</u>				

Answer on next slide:

Answer:

Column subtraction $343 - 126 =$

			3	1				
		3	4	3				
	-	<u>1</u>	<u>2</u>	<u>6</u>				
		2	1	7				

Now try this one:

Your turn 283 - 159 =

You can use
dienes if you
want to.

		2	8	3				
	-	<u>1</u>	<u>5</u>	<u>9</u>				

Don't forget to regroup!

Answer on the next slide:

Answer:

Your turn 283 - 159 =

			7	1				
		2	8	3				
	-	<u>1</u>	<u>5</u>	<u>9</u>				
		1	2	4				

Task: Now do these subtraction calculations.

Use either dienes or do a written calculation.

Part A (Not all need column subtraction so look carefully)

452 – 236	368 – 227	553 – 235
354 – 136	572 – 324	354 – 122

Think:

How am I going to set out my work?

It should look like this:

	H	T	U
		1	
	6	2	¹ 1
-	1	1	7
	5	0	4

Answers on the next slide – no peeking!

Answers:

Part A (Not all need column subtraction so look carefully)

$452 - 236$ 216	$368 - 227$ 141	$553 - 235$ 318
$354 - 136$ 218	$572 - 324$ 248	$354 - 122$ 232

How did you do?

Now try this:

Part B -

1. What could the missing numbers here be?
2. Check this answer

		9	2	7	
	-	<u>4</u>	<u>1</u>	<u>9</u>	
		5	1	8	

$$\begin{array}{r} \square \overset{3}{\cancel{4}} \overset{1}{\square} \\ - 2 \square 6 \\ \hline 5 \ 0 \ \square \end{array}$$

Answers on the next slide – no peeking!

Answers:

Part B -

1. What could the missing numbers be in the following subtraction?

$$\begin{array}{r} \boxed{7} \ 3 \ \boxed{9} \\ - \ 2 \ \boxed{3} \ 7 \\ \hline 5 \ 0 \ \boxed{2} \end{array}$$

2. Check this answer.

$$\begin{array}{r} 9 \ 2 \ 7 \\ - \ 4 \ 1 \ 9 \\ \hline 5 \ 0 \ 8 \end{array}$$

Easier:

Column Subtraction (within 100 no regrouping) 1
