

Maths Lesson

Year 3

Write your date and title in your exercise book.

24.2.21

Can I use my \times tables to work out related facts?

Don't forget to post a photo of your work on class dojo!

Warm Up

A bit like yesterday!
Learn your 8 x tables

$$\begin{array}{l} 8 \times 0 = \underline{\quad} \\ 8 \times 1 = \underline{\quad} \\ 8 \times 2 = \underline{\quad} \\ 8 \times 3 = \underline{\quad} \\ 8 \times 4 = \underline{\quad} \\ 8 \times 5 = \underline{\quad} \\ 8 \times 6 = \underline{\quad} \\ 8 \times 7 = \underline{\quad} \\ 8 \times 8 = \underline{\quad} \\ 8 \times 9 = \underline{\quad} \\ 8 \times 10 = \underline{\quad} \end{array}$$

Multiplication

$$8 \times 0 = \underline{\quad}$$

$$8 \times 1 = \underline{\quad}$$

$$8 \times 2 = \underline{\quad}$$

$$8 \times 3 = \underline{\quad}$$

$$8 \times 4 = \underline{\quad}$$

$$8 \times 5 = \underline{\quad}$$

$$8 \times 6 = \underline{\quad}$$

$$8 \times 7 = \underline{\quad}$$

$$8 \times 8 = \underline{\quad}$$

$$8 \times 9 = \underline{\quad}$$

$$8 \times 10 = \underline{\quad}$$

$$8 \times 11 = \underline{\quad}$$

$$8 \times 12 = \underline{\quad}$$

$$10 \times 8 = \underline{\quad}$$

$$9 \times 8 = \underline{\quad}$$

$$8 \times 8 = \underline{\quad}$$

$$7 \times 8 = \underline{\quad}$$

$$6 \times 8 = \underline{\quad}$$

$$5 \times 8 = \underline{\quad}$$

$$4 \times 8 = \underline{\quad}$$

Main Lesson: More solving x by 2, 4 and 8 by doubling

Try these

- $2 \times 5 = \underline{\quad}$

Double the 5.

- $4 \times 5 = \underline{\quad}$

Double the 5 then double it again.

- $8 \times 5 = \underline{\quad}$

Double the 5, double it again, then double it again.

Now try these

- $2 \times 30 = \underline{\quad}$

Double the 30.

- $4 \times 30 = \underline{\quad}$

Double the 30 then double it again.

- $8 \times 30 = \underline{\quad}$

Double the 30, double it again, then double it again.

Answers on the next page – no peeking!

Answers

Solving x by 2, 4 and 8 by doubling

Try these

- $2 \times 5 = \underline{10}$

Double the 5.

- $4 \times 5 = \underline{20}$

Double the 5 then double it again.

- $8 \times 5 = \underline{40}$

Double the 5, double it again, then double it again.

Now try these

- $2 \times 30 = \underline{60}$

Double the 30.

- $4 \times 30 = \underline{120}$

Double the 30 then double it again.

- $8 \times 30 = \underline{240}$

Double the 30, double it again, then double it again.

Solving \div by 2, 4 and 8 by halving

Try these

- $40 \div 2 = \underline{\quad}$ Halve the 40.
- $40 \div 4 = \underline{\quad}$ Halve the 40 then halve it again.
- $40 \div 8 = \underline{\quad}$ Halve the 40, halve it again, then halve it again.

Now try these

- $80 \div 2 = \underline{\quad}$ Halve the 80.
- $80 \div 4 = \underline{\quad}$ Halve the 80 then halve it again.
- $80 \div 8 = \underline{\quad}$ Halve the 80, halve it again, then halve it again.

Answers

Solving \div by 2, 4 and 8 by halving

Try these

- $40 \div 2 = \underline{20}$ Halve the 40.
- $40 \div 4 = \underline{10}$ Halve the 40 then halve it again.
- $40 \div 8 = \underline{5}$ Halve the 40, halve it again, then halve it again.

Now try these

- $80 \div 2 = \underline{40}$ Halve the 80.
- $80 \div 4 = \underline{20}$ Halve the 80 then halve it again.
- $80 \div 8 = \underline{10}$ Halve the 80, halve it again, then halve it again.

TARGET To connect the 2, 4 and 8 times tables by doubling and halving.

Example 1 30×8

Double 30, double and double again to multiply by 8.

$30 \rightarrow 60 \rightarrow 120 \rightarrow 240$

Answer 240

Example 2 $1000 \div 8$

Halve 1000, halve and halve again to divide by 8.

$1000 \rightarrow 500 \rightarrow 250 \rightarrow 125$

Answer 125

A

Double and double again to multiply each number by 4.

- | | |
|------|------|
| 1 3 | 5 12 |
| 2 40 | 6 25 |
| 3 15 | 7 90 |
| 4 7 | 8 21 |

Halve and halve again to divide each number by 4.

- | | |
|--------|-------|
| 9 40 | 13 20 |
| 10 28 | 14 44 |
| 11 120 | 15 24 |
| 12 32 | 16 60 |

Use squared paper. Draw each shape half the size of the measurements shown.

17

18

B

Double, double and double again to multiply each number by 8.

- | | |
|------|------|
| 1 8 | 5 6 |
| 2 13 | 6 20 |
| 3 25 | 7 55 |
| 4 70 | 8 18 |

Halve, halve and halve again to divide each number by 8.

- | | |
|--------|--------|
| 9 600 | 13 120 |
| 10 88 | 14 640 |
| 11 40 | 15 360 |
| 12 480 | 16 112 |

17 Use squared paper. Draw the flag half the size of the measurements shown.

18 Now draw the flag one quarter the size of the measurements shown.

C

Copy and complete.

- | |
|--|
| 1 <input type="text"/> $\times 8 = 4000$ |
| 2 <input type="text"/> $\times 8 = 248$ |
| 3 <input type="text"/> $\times 8 = 296$ |
| 4 <input type="text"/> $\times 8 = 280$ |
| 5 <input type="text"/> $\div 8 = 60$ |
| 6 <input type="text"/> $\div 8 = 23$ |
| 7 <input type="text"/> $\div 8 = 95$ |
| 8 <input type="text"/> $\div 8 = 17$ |

Double the first answer to work out the second.

- | | |
|-----------------|------------------|
| 9 20×6 | 11 7×8 |
| 20×12 | 7×16 |
| 10 5×9 | 12 11×7 |
| 5×18 | 11×14 |

13 Use squared paper. Draw the flag one quarter the size of the measurements shown.

14 Now draw the flag one eighth size.

Now have
a go at
these

A = Easiest
C = Medium
C = Hardest

If you have time...

Try a multiplication and division **game**.
