MyLogin – A Guide for Parents and Carers

To make it easier for our students, in Years 1 to 6, to access school resources from home, we have linked Google Classroom and Edshed in one convenient location: MyLogin

What is MyLogin?

MyLogin is a Single Sign-On (SSO) platform, meaning your child can access more than one application using just one set of login credentials—their unique emoji password. This eliminates the need to remember multiple login details, and everything is securely organised in one place.

How to use MyLogin:

1. Log out of any existing Google or MyLogin accounts that may already be signed in on the device.

2. Click the link below to access MyLogin:

   https://bit.ly/St-Marys-Wonde

3. Sign in using your child's unique emoji password.

   Your child's emoji password can be obtained from their class teacher.

4. Once logged in, you will see the MyLogin Dashboard, which includes links to both Google Classroom and Edshed.

5. When you click on Google Classroom, it may prompt you for your child's Google username
   Class teachers will reissue these usernames alongside the emoji passwords.

Important Notes:

- Keep your child's emoji password and Google username safe to ensure secure access to their resources.
- If you encounter any issues, please contact your child's class teacher for assistance.

Thank you for helping us ensure a smooth digital learning experience for your child!
