

We work collaboratively.

Our science lessons are taught indoors and outdoors.

We are curious and discover new things.

We predict what will happen before an experiment.

Practical investigations and use of equipment are regularly part of our science

We can explain what we have discovered using scientific vocabulary.

We know how science works in the real world.

Chorley St
Mary's Catholic
Primary School
& Nursery

We think of our own scientific questions to investigate.

Science Principles
