Are you worried that your child may struggle with the transition to secondary school? We know this can be the case for many children for a variety of reasons. We want to help make this a smoother and happier time for them so that they look forward with confidence and have a better understanding of what to expect when they enter the next step of their schooling journey. Through providing activities and games, discussions, scenarios, role play, arts and craft activities, travel to school and homework planning, the sessions will help children to:

- Explore feelings and emotions around transition
- Prepare practically for starting high school, subject planning and homework
- Look at issues/scenarios that might come up at high school
- Build children's self-esteem and confidence
- Inform children about places to access for further support
- Be more confident with their journey to and from school
