

2D Shapes

Circle

Circles only have one side.

Circles have no vertices.

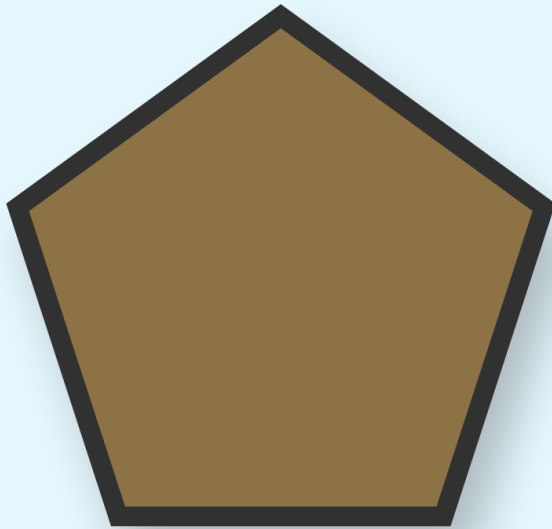

Square

Squares have 4 straight sides and
4 vertices.

All the sides are the same length.

Pentagon

A pentagon has 5 straight sides and 5 vertices.

All the sides are the same length in a regular pentagon.

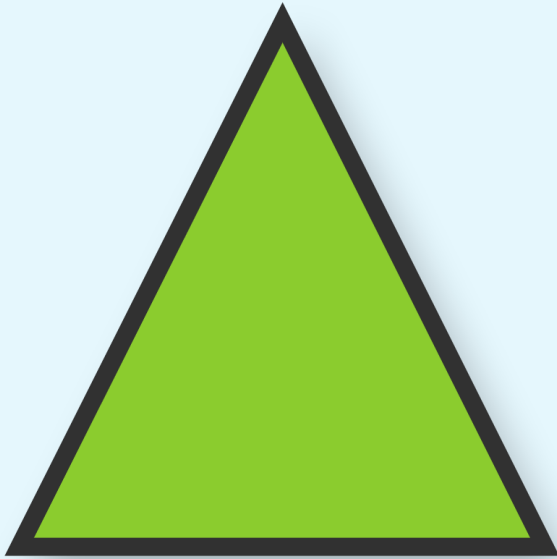

Rectangle/Oblong

Rectangles have 4 sides and 4 vertices.

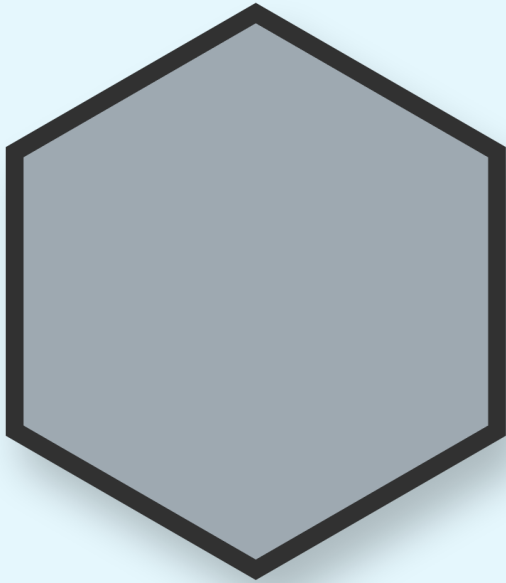

They have 2 long sides and 2 short sides.

Triangle

Triangles have 3 sides and 3 vertices.

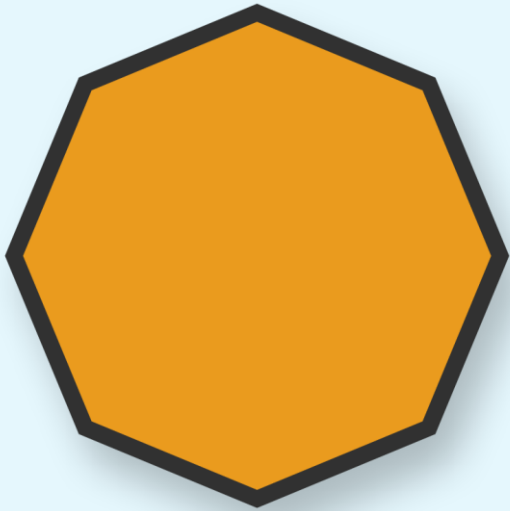

Hexagon

A hexagon has 6 sides and 6 vertices.

All the sides are the same length in a regular hexagon.

Octagon

A octagon has 8 sides and 8 vertices.

All the sides are the same length in a regular octagon.
