

Science

Day 3 sheet 9

Our new topic is about plant growth. We will observe and describe how seeds and bulbs grow into mature plants. We would like to know what you already know about plants and plant growth also what you want to know, if there is anything you are unsure of.

Please don't research about plants, this is just initially to see what you already know, try to allow your child to tell you what they know.

K	W
What I know	What I want to know
