

Division - 2 digit by 1 digit (no remainder)

$3 \overline{)90}$	$3 \overline{)81}$	$4 \overline{)68}$
$3 \overline{)87}$	$3 \overline{)33}$	$2 \overline{)80}$
$6 \overline{)72}$	$5 \overline{)95}$	$5 \overline{)55}$
$2 \overline{)74}$	$2 \overline{)68}$	$6 \overline{)78}$

Now practice your 6 times table

$$\underline{\quad} = 8 \times 6$$

$$3 \times 6 = \underline{\quad}$$

$$6 \times \underline{\quad} = 42$$

$$30 = \underline{\quad} \times 6$$

$$9 \times 6 = \underline{\quad}$$

$$\underline{\quad} = 2 \times 6$$

$$6 \times \underline{\quad} = 72$$
