

Science Whole School Progression Map

	Autumn 1	Autumn 2	Spring 1	Spring 2	Summer 1	Summer 2
EYFS-Nursery	<p>Understanding the World</p> <p>0-3: Repeat actions that have an effect.</p> <ul style="list-style-type: none"> ● Explore materials with different properties. ● Explore natural materials, indoors and outside. ● Explore and respond to different natural phenomena in their setting and on trips. ● Make connections between the features of their family and other families. ● Notice differences between people. <p>3-4: Use all their senses in hands-on exploration of natural materials.</p> <ul style="list-style-type: none"> ● Explore collections of materials with similar and/or different properties. ● Talk about what they see, using a wide vocabulary. ● Explore how things work. ● Plant seeds and care for growing plants. ● Understand the key features of the life cycle of a plant and an animal. ● Begin to understand the need to respect and care for the natural environment and all living things. ● Explore and talk about different forces they can feel. ● Talk about the differences between materials and changes they notice. 					
EYFS-Reception	<p>Understanding the World</p> <ul style="list-style-type: none"> ● Recognise some similarities and differences between life in this country and life in other countries. ● Explore the natural world around them. ● Describe what they see, hear and feel whilst outside. ● Recognise some environments that are different to the one in which they live. ● Understand the effect of changing seasons on the natural world around them. <p>The Natural World</p>					

	<ul style="list-style-type: none"> • Explore the natural world around them, making observations and drawing pictures of animals and plants. • Know some similarities and differences between the natural world around them and contrasting environments, drawing on their experiences and what has been read in class. • Understand some important processes and changes in the natural world around them, including the seasons and changing states of matter 					
Year 1	Animals & Humans Including Seasonal Change	Animals & Humans Including Seasonal Change	Plants & Seasonal Change	Everyday Materials & Seasonal Change	Plants & Seasonal Change	Everyday Materials & Seasonal Change
Year 2	Uses Of Everyday Materials	Animals including humans	Living Things & Their Habitats	Animals including humans & Plants	Living Things & Their Habitats & Plants	Uses Of Everyday Materials
Year 3	Animals Including Humans	Animals Including Humans	Rocks	Forces & Magnets	Light	Plants
Year 4	Electricity	Animals Including Humans	Animals Including Humans	Sound	States of matter	Living things & their habitat
Year 5	Properties & Changes Of Materials	Properties & Changes of Materials	Earth & Space	Forces	Living Things & Their Habitats	Animals Including Humans
Year 6	Evolution & Inheritance	Light	Electricity	Animals Including Humans	Living Things & Their Habitats	Living Things & Their Habitats

The learning journey: Animals including humans

Year group	Statutory Requirements from the Programme of study
1	<ul style="list-style-type: none"> ● Identify and name a variety of common animals that are birds, fish, amphibians, reptiles and mammals ● Identify and name a variety of common animals that are carnivores, herbivores and omnivores. ● Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles and mammals, and including pets). ● Identify, <u>name draw</u> and label the basic parts of the human body and say which parts of the body <u>is associated</u> with each sense.
2	<ul style="list-style-type: none"> ● Notice that animals, including humans, have offspring which grow into adults ● Find out about and describe the basic needs of animals, including humans, for survival (water, food and air) ● Describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.
3	<ul style="list-style-type: none"> ● Identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat ● Identify that humans and some animals have skeletons and muscles for support, protection and movement.
4	<ul style="list-style-type: none"> ● Describe the simple functions of the basic parts of the digestive system in humans ● Identify the different types of teeth in humans and their simple functions ● Construct and interpret a variety of food chains, identifying producers, predators and prey.
5	<ul style="list-style-type: none"> ● Describe the changes as humans develop from birth to old age.
6	<ul style="list-style-type: none"> ● Identify and name the main parts of the human circulatory system, and explain the functions of the heart, blood vessels and blood ● Recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function ● Describe the ways in which nutrients and water are transported within animals, including humans.

The learning journey: Plants

Year group	Statutory Requirements from the Programme of Study
1	<ul style="list-style-type: none">● Identify and name a variety of common plants, including garden plants, wild plants and trees, and those classified as deciduous and evergreen● Identify and describe the basic structure of a variety of common plants including roots, stem/trunk, leaves and flowers.
2	<ul style="list-style-type: none">● Observe and describe how seeds and bulbs grow into mature plants● Find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.
3	<ul style="list-style-type: none">● Identify and describe the functions of different parts of plants; roots, stem, leaves and flowers.● Explore the requirements of plants for life and growth (air, light, water, nutrients from soil and room to grow) and how they vary from plant to plant.● Investigate the ways in which water is transported within plants.● Explore the role of flowers in the life cycle of flowering plants, including pollination, seed formation and seed dispersal

The learning journey – ‘Materials’

Year group	Statutory Requirements from the Programme of Study
1	<ul style="list-style-type: none"> ● . Distinguish between <u>an</u> object and the material from which it is made. ● Identify and name a variety of everyday materials, including wood, plastic, glass, water and rock. ● Describe the simple physical properties of a variety of everyday materials. ● Compare and group together a variety of everyday materials on the basis of their physical properties.
2	<ul style="list-style-type: none"> ● Identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses ● Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.
3	<ul style="list-style-type: none"> ● Compare and group together different kinds of rocks on the basis of their appearance and simple physical properties ● Describe in simple terms how fossils are formed when things that have lived are trapped within rock ● Recognise that soils are made from rocks and organic matter.
4	<ul style="list-style-type: none"> ● Compare and group materials together, according to whether they are solids, liquids or gases ● Observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) ● Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.
5	<ul style="list-style-type: none"> ● Compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets

	<ul style="list-style-type: none"> ● Understand that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution ● Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating ● Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic ● Demonstrate that dissolving, mixing and changes of state are reversible changes ● Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.
--	---

The learning journey: Living Things and Their Habitats

Year group	Statutory Requirements from the Programme of Study
2	<ul style="list-style-type: none">● Explore and compare the differences between things that are living, dead, and things that have never been alive● Identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.● Identify and name a variety of plants and animals in their habitats, including micro-habitats● Describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.
4	<ul style="list-style-type: none">● recognise that living things can be grouped in a variety of ways● explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment● recognise that environments can change and that this can sometimes pose dangers to living things
5	<ul style="list-style-type: none">● Describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird● Describe the life process of reproduction in some plants and animals.
6	<ul style="list-style-type: none">● Describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including <u>micro-organisms</u>, plants and animals● Give reasons for classifying plants and animals based on specific characteristics

The learning journey – ‘Forces’

Year group	Statutory Requirements from the Programme of Study
3	<ul style="list-style-type: none">● Compare how things move on different surfaces● Notice that some forces need contact between two objects, but magnetic forces can act at a distance● Observe how magnets attract or repel each other and attract some materials and not others● Compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials● Describe magnets as having two poles● Predict whether two magnets will attract or repel each other, depending on which poles are facing.
5	<ul style="list-style-type: none">● Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object● Identify the effects of air resistance, water resistance and friction, that act between moving surfaces● Recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.

The learning journey – ‘Light’

Year group	Statutory Requirements from the Programme of Study
3	<ul style="list-style-type: none">● Recognise that they need light in order to see things and that dark is the absence of light● Notice that light is reflected from surfaces● Recognise that light from the sun can be dangerous and that there are ways to protect their eyes● Recognise that shadows are formed when the light from a light source is blocked by a solid object● Find patterns in the way that the sizes of shadows change.
6	<ul style="list-style-type: none">● Recognise that light appears to travel in straight lines● Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye● Explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes● Use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them

The learning journey – ‘Electricity’

Year group	Statutory Requirements from the Programme of Study
4	<ul style="list-style-type: none">● Identify common appliances that run on electricity● Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers● Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery● Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit● Recognise some common conductors and insulators, and associate metals with being good conductors.
6	<ul style="list-style-type: none">● Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit● Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches● Use recognised symbols when representing a simple circuit in a diagram.

*There are some standalone units- Seasonal Change (Year 1), Evolution and Inheritance (Year 6), Sound (Year 4) and Earth and Space (Year 5)
