

17 July 2024

Dear Parents and Carers,

### **Nrich Summer Maths Challenges**

As the summer holiday approaches, I wanted to take the opportunity to share the Nrich summer challenges with you.

While KS3 students do not have formal homework for over the summer, they may find these challenges interesting and rewarding to complete.

The challenges can be found at the link below. They cover a range of ages so older and younger children can also join in.

<https://nrich.maths.org/summer-2024>

The video below explains the importance of working with your child on these problems and how you can best support your child.

<https://youtu.be/Px5taGF1gAE>

Year 10 students will be given paper homework to keep their knowledge up to date over the summer. Little and often is the best approach in maintaining their maths knowledge.

Thank you for your on-going support.

Yours sincerely,

**Mrs Hanson**  
**Lead Practitioner**
