

Mathematics Progression Map

This progression document aims to give guidance on the progression of Mathematics knowledge and skills across St. Paul's Catholic Primary School. It can be used by teachers to differentiate work & expectations appropriately for pupils working above and below age-related expectations. Pupils should also be encouraged to access mathematical problems presented in a wide range of different, complex ways, ask their own mathematical questions and follow their own lines of enquiry when exploring an open-ended maths problem. Pupils' use of mathematical language, fluency in the fundamentals, reasoning mathematically following a line of enquiry and solving problem by applying their mathematical skills should be evident in their mathematics books.

Mathematics Pedagogical Approach

In Mathematics, we recognise the importance of pedagogy and we make use of various approaches that are backed by cutting-edge research and developments in both education (in general) and Mathematics specifically.

Behaviourism: Direct teacher instruction; explicit modelling of skills and techniques—fading and demonstration.

Constructivism: Inquiry-based learning through skill development.

Social Constructivism: Teacher modelling; variety of questioning methods; variety of independent, paired and group activities.

Liberationism: Pupil-led learning (when appropriate); opportunities to holistically develop the learner through enriching experiences.

Retrieval: Teachers identify key areas of development and misconceptions from previous lessons, topics and terms. (Daily, Weekly and Monthly review)

Diagnostic Questioning: Teachers employ diagnostic questioning throughout the lesson to gauge understanding and scale the level of challenge. (Ask questions).

High Quality Formative Assessment: Teachers check for understanding at various points of the lesson: this drives our lessons. (Ask questions, check student understanding, obtain high success rate – 80%).

Concrete/Pictorial/Abstract: Teachers use concrete concepts (manipulatives), pictorial representations (bar models etc.) and abstract concepts (symbols +, -) to structure learning. (New material in small steps, Provide models).

Reasoning, Problem Solving, Proving: Opportunities to reason, problem solve and prove answers are given in lessons.

High-Level Vocabulary: Teachers use and model high-level mathematical vocabulary in lessons and during problem-solving activities / worked examples.

Self and Peer Assessment: Pupils are equipped with the skills to assess their own and each other's work positively, respectfully but critically: they use this to provide feedback and appropriate changes.

Worked Examples: Teachers provide step by step demonstrations on how to solve a problem. This directs learners' attention to the important part of the concept and allows for a deeper conceptual understanding. (Guided student practice, scaffold for difficult tasks).

Success Criteria: Teachers use success criteria to aid cognitive development and scaffold this as appropriate.

Mastery Approach: Teachers aim for mastery by deepening understanding and giving opportunities for independent maths. (Independent practice)

	Mathematics Progression Map							
EYFS		KS1			KS2			
Number and Place Value								
	Counting							
EYFS Three and four year olds Reception ELG	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6		
Recite numbers past 5. • Say one number name for each item in order: 1, 2, 3, 4, 5. • Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle'). Count objects, actions and sounds. Count beyond ten. Verbally count beyond 20, recognising the pattern of the counting system.	with 0 or 1, or from any			count backwards through zero to include negative numbers	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	use negative numbers in context, and calculate intervals across zero		
	numbers to 100 in numerals; count in	and 5 from 0, and in tens	count from 0 in multiples of 4, 8, 50 and 100;	count in multiples of 6, 7, 9, 25 and 1 000	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000			
	given a number, identify one more and one less							

		Compar	ing Numbers			
language: 'more than', 'fewer	use the language of: equal to, more than, less than (fewer), most, least		compare and order numbers up to 1000		numbers to at least 1 000 000 and determine the value of each digit	read, write, order and compare numbers up to 10 000000 and determine the value of each digit (appears also in Reading and Writing Numbers)
				compare numbers with the same number of decimal places up to two decimal places (Also in fractions)		
	Ide	ntifying, Representii	ng and Estimating	Numbers		
them individually ('subitising'). Show 'finger numbers' up to 5. Link numerals and amounts: for	numbers using objects and pictorial representations	estimate numbers using different	identify, represent and estimate numbers using different representations	identify, represent and estimate numbers using different representations		

Subitise. Link the number symbol (numeral) with its cardinal number value. Subitise (recognising quantities without counting) up to 5.						
	Reading	and Writing Numbe	ers (including Rom	an Numerals)		
	read and write numbers from 1 to 20 in numerals and words.	to at least 100 in	numbers up to 1000 in numerals and in words tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks (Also in	numerals to 100 (I to C) and know that over time, the numeral system changed to include	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit (appears also in Comparing Numbers) read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	determine the value of each digit (appears also in Understanding Place
		Understand	ing Place Value			
Understand the 'one more than/one less than' relationship between consecutive numbers. Explore the composition of numbers to 10. Have a deep understanding of numbers to 10, including the composition of each number.		recognise the place value of each digit in a two-digit number (tens, ones)	recognise the place value of each digit in a three-digit number (hundreds, tens, ones)	in a four-digit number (thousands, hundreds, tens, and ones) find the effect of dividing a one- or	and compare numbers to at least 1	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit (appears also in Reading and Writing Numbers) <i>identify the value of</i>

				value of the digits in the answer as units, tenths and hundredths (copied from	relate them to tenths, hundredths and decimal equivalents (copied from	each digit to three decimal places and multiply and divide numbers by 10, 100 and 1 000 where the answers are up to three decimal places (copied from Fractions)
		Rou	unding			
				to the nearest 10, 100 or 1 000	round any number up to 1000000 to the nearest 10, 100, 1 000, 10000 and 100 000	round any whole number to a required degree of accuracy
				one decimal place to the nearest whole number (copied from Fractions)	the nearest whole	solve problems which require answers to be rounded to specified degrees of accuracy (copied from Fractions)
		Proble	m Solving			
Solve real world mathematical problems with numbers up to 5.	r	number facts to solve problems	problems and practical problems involving these ideas.	practical problems that involve all of the above and with	problems and	solve number and practical problems that involve all of the above

	Number: Addition and Subtraction							
	Number Bonds							
to 10.	number bonds and related subtraction facts	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100						
	Mental Calculation							
Automatically recall number	digit and two-digit numbers to 20, including zero	add and subtract numbers using concrete objects, pictorial representations, and mentally, including: * a two-digit number and ones * a two-digit number and tens * two two-digit numbers adding three one-digit numbers	add and subtract numbers mentally, including: * a three-digit number and ones * a three-digit number and tens * a three-digit number and hundreds		add and subtract numbers mentally with increasingly large numbers	perform mental calculations, including with mixed operations and large numbers		

statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Written	two numbers can be done in any order (commutative) and subtraction of one				use their knowledge of the order of operations to carry out calculations involving the four operations
	Writte	n Methods			
read, write and interpret mathematical statements involving addition (+), subtraction (-) and equals (=) signs (appears also in Mental Calculation)		numbers with up to three digits, using formal written methods of columnar addition and subtraction	numbers with up to 4 digits using the formal written methods of columnar addition and subtraction	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	
	Inverse Operations, Esti	mating and Checking A	nswers		
	inverse relationship	to a calculation and use inverse operations	inverse operations to check answers to		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy.

	Problem Solving								
Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed evenly.	and subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = -9	addition and subtraction: * using concrete			subtraction multi- step problems in contexts, deciding which operations and methods to use and why	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why Solve problems involving addition, subtraction, multiplication and division			
Number: Multiplication and Division Multiplication and Division									
	<i>twos, fives and tens</i> (copied from Number	and 5 from 0, and in tens from any number, forward or backward	and 100	<i>count in multiples oj 6, 7, 9, 25 and 1 000</i> (copied from Number and Place Value)	fcount forwards or backwards in steps of powers of 10 for any given number up to 1 000 000 (copied from Number and Place Value)				

and 10 multiplication tables, including recognising odd and even numbers	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables			
	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one- digit numbers, using mental and progressing to formal written methods (appears also in Written Methods)	facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1;	facts	perform mental calculations, including with mixed operations and large numbers
show that multiplicatio of two numbers can be done in any order (commutative) and division of one number by another cannot		recognise and use factor pairs and commutativity in mental calculations (appears also in Properties of Numbers)	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. ³ / ₈) (copied from Fractions)

Written Calculation							
	statements for multiplication and division within the multiplication tables and write them using the multiplication (×), division (÷) and equals (=) signs	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers times one- digit numbers, using mental and progressing to formal written methods (appears also in Mental Methods)	multiply two-digit and three-digit numbers by a one- digit number using formal written layout	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication		
				4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	whole number using the formal written method of short division where		

Prope	rties of numbers: prime,	square, cube, factors a	nd multiples.		use written division methods in cases where the answer has up to two decimal places (copied from Fractions (including decimals))
			commutativity in mental calculations (repeated)	finding all factor pairs of a number, and common factors of two numbers. <i>know and use the</i> <i>vocabulary of prime</i> <i>numbers, prime</i> <i>factors and</i> <i>composite (non-</i> <i>prime) numbers</i>	factors, common
				square numbers and cube numbers, and the notation for squared (²) and cubed (³)	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm3) and cubic metres (m3), and extending to other units such as mm3 and km3 (copied from Measures)

	Order of ope	rations			
					use their knowledge of the order of operations to carry out calculations involving the four operations
Inver	se Operations, Estin	nating and Checki	ng Answers		
		to a calculation and use inverse operations to check answers (copied from Addition and Subtraction)	a calculation		use estimation to check answers to calculations and determine, in the context of a problem, levels of accuracy
	Probl	em Solving			
involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher	division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence	involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder	involving multiplication and division including using their knowledge of factors and multiples, squares and cubes solve problems involving addition, subtraction, multiplication and	solve problems involving addition, subtraction, multiplication and division solve problems involving similar shapes where the scale factor is known or can be found (copied from Ratio and Proportion)

Statements only appear	in Year 6 but should	d Proportion	objects are connected to m objects arficularly fracti	combination of these, including understanding the meaning of the equals sign solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	ation and division
					solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts
					solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison
					solve problems involving similar shapes where the scale factor is known or can be found

		Mea	surement			solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.
		Comparing	and Estimating			
Make comparisons between objects relating to size, length, weight and capacity. Compare length, weight and capacity.	 compare, describe and solve practical problems for: * lengths and heights [e.g. long/short, longer/shorter, tall/short, double/half] * mass/weight [e.g. heavy/light, heavier than, lighter than] * capacity and volume [e.g. full/empty, more than, less than, half, half full, quarter] time [e.g. quicker, slower, earlier, later] 	volume/capacity and record the results using >, < and =		estimate, compare and calculate different measures, including money in pounds and pence (also included in Measuring	rectangles including using standard units, square centimetres (cm2) and square metres (m2) and	calculate, estimate and compare volume of cubes and cuboids using standard units, including centimetre cubed (cm3) and cubic metres (m3), and extending to other units such as mm3 and km3.
	sequence events in chronological order using language [e.g.	compare and sequence intervals of time	compare durations of events, for example to calculate the time			

before and after, next,		taken by particular

		Geometry- Positio	on and Direction			
		Position, direc	tion and movement			
bag is under the table," – with no pointing.	describe position, direction and movement, including half, quarter and three- quarter turns.	use mathematical vocabulary to describe position, direction and movement including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise)		on a 2-D grid as coordinates in the first quadrant describe movements between positions	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	describe positions on the full coordinate grid (all four quadrants) draw and translate simple shapes on the coordinate plane, and reflect them in the axes.
		P	attern			
Talk about and identify the patterns around them. For example, stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs', etc. Extend and create ABAB patterns – stick, leaf, stick, leaf. Notice and correct an error in a repeating pattern. Continue, copy and create repeating patterns.		order and arrange combinations of mathematical objects in patterns and sequences				

		Geometry- Pr	roperties of Shape				
	Identifying shapes and their properties						
C	common 2-D and 3-D hapes, including:			shapes presented in	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	recognise, describe and build simple 3-D shapes, including making nets (appears also in Drawing and Constructing)	
		identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces				illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius	
		identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]					

	Drawing an	d Constructing			
	draw 2-D shapes and make 3-D shapes using modelling materials;	complete a simple symmetric figure with	and measure them in degrees (°)	draw 2-D shapes using given dimensions and angles	
				recognise, describe and build simple 3-D shapes, including making nets (appears also in Identifying Shapes and Their Properties)	
	Comparing and classify	ing			
	compare and sort common 2-D and 3-D shapes and everyday objects		classify geometric shapes, including	related facts and find missing lengths and angles	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons
				distinguish between regular and irregular polygons based on reasoning about equal sides and angles	

	Angles					
		recognise angles as a property of shape or a description of a turn		know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles		
		recognise that two right angles make a	identify acute and obtuse angles and compare and order angles up to two right angles by size	 identify: angles at a point and one whole turn (total 360°) angles at a point on a straight line and ½ a turn (total 180°) other multiples of 90° 	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles	
		identify horizontal and vertical lines and pairs of perpendicular and parallel lines				
	Fractions (including de	cimals and percentages	ŝ			
Counting in fractional steps						
		count up and down in tenths	count up and down in hundredths			

	the1/2 and 2/4 equivalence on the number line (Non Statutory Guidance) Recognising fracti	ons				
name a half as one of two equal parts of an object, shape or quantity	recognise, find, name and write fractions $1/3$, 1/4, $2/4$ and $3/4$ of a length, shape, set of objects or quantity	recognise, find and write fractions of a discrete set of objects: unit fractions and non-unit fractions with small	recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents (appears also in Equivalence)		
		recognise that tenths arise from dividing an object into 10 equal parts and in dividing one – digit numbers or quantities by 10.				
recognise, find and name a quarter as one of four equal parts of an object, shape or quantity		recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators				
Comparing Fractions						
		compare and order unit fractions, and fractions with the same denominators			compare and order fractions, including fractions >1	

				multiples of the same number				
Comparing decimals								
			with the same number of decimal	and compare numbers with up to	identify the value of each digit in numbers given to three decimal places			
	Round	ding including decimals						
			one decimal place to the nearest whole number	two decimal places to the nearest whole	solve problems which require answers to be rounded to specified degrees of accuracy			
	Equivalence including	g fractions, decimals and	d percentages					
	e.g. $\frac{1}{2}$ of 6 = 3 and recognise the	using diagrams,	diagrams, families of common equivalent fractions	write equivalent fractions of a given fraction, represented	use common factors to simplify fractions; use common multiples to express fractions in the same denomination			
			recognise and write decimal equivalents of any number of tenths or hundredths	decimal numbers as fractions (e.g. 0.71 = $\frac{71}{100}$)	associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375)			

			-	for a simple fraction (e.g. ³ / ₈)
		recognise and write decimal equivalents to $1/4$; $1/2$; $3/4$	recognise the per cent symbol (%) and understand that per cent relates to "number of parts per	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.
Ado	dition and subtraction of fractions			
	add and subtract fractions with the same denominator within one whole (e.g. ${}^{5}/_{7} + {}^{1}/_{7} = {}^{6}/_{7}$)	fractions with the same denominator	fractions with the same denominator and multiples of the same number	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions
			recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number (e.g. $\frac{2}{5} + \frac{4}{5} = \frac{6}{5} = \frac{1}{5}$)	

	Multiplication an	d division of fractions				
				fractions and mixed numbers by whole numbers, supported by materials and	multiply simple pairs of proper fractions, writing the answer in its simplest form (e.g. $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$)	
					multiply one-digit numbers with up to two decimal places by whole numbers	
					divide proper fractions by whole numbers (e.g. $\frac{1}{3} \div 2 = \frac{1}{6}$)	
Multiplication and division of decimals						
					multiply one-digit numbers with up to two decimal places by whole numbers	
			find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths		multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places	

					identify the value of each digit to three decimal places and multiply and divide numbers by 10, 100 and 1000 where the answers are up to three decimal places
					associate a fraction with division and calculate decimal fraction equivalents (e.g. 0.375) for a simple fraction (e.g. ³ / ₈) use written division methods in cases where the answer has up to two decimal places
	Problem solvi		solve problems	solve problems	
		involve all of the above	involving increasingly harder	involving numbers up	
		solve simple measure and money problems involving fractions and	which require		

			decimals to two decimal places.	and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those with a denominator of a multiple of 10 or 25.		
		St	atistics			
	Interpreting	, constructing and presen	ting data			
Experiment with their own symbols and marks, as well as numerals.		simple pictograms, tally	interpret and present data using bar charts, pictograms and tables	present discrete and continuous	interpret information in tables, including timetables	interpret and construct pie charts and line graphs and use these to solve problems
		ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity				
		ask and answer questions about totalling and comparing categorical data				
		Solving Problems				

		two-step questions [e.g. 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts	sum and difference problems using information presented in bar	solve comparison, sum and difference problems using information presented in a line graph	calculate and interpret the mean as an average
	Algebra				
	Equations				
subtraction, using concrete objects and pictorial representations, and missing number problems such as 7 = -9	inverse relationship between addition and subtraction and use this to check calculations and missing number problems. (copied from Addition	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction. (copied from Addition and Subtraction)			express missing number problems algebraically
		solve problems, including missing number problems, involving multiplication and division, including integer scaling (copied from Multiplication and Division)			

	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 (copied from Addition and Subtraction)				find pairs of numbers that satisfy number sentences involving two unknowns		
represent and use number bonds and related subtraction facts within 20 (copied from Addition and Subtraction)					enumerate all possibilities of combinations of two variables		
Formulae							
			Perimeter can be expressed algebraically as 2(a + b) where a and b are the dimensions in the same unit. (Copied from NSG measurement)		use simple formulae		
					recognise when it is possible to use formulae for area and volume of shapes (copied from Measurement)		

Sequences							
chronological order using language such as:	compare and sequence intervals of time (copied from Measurement)				generate and describe linear number sequences		
	order and arrange combinations of mathematical objects in patterns (copied from Geometry: position and direction)
