

## Foreign Languages

### Vision and Intent Statement

At St. Peter's, our vision for Foreign Languages is to empower all language learners to embrace their identities as 'World Citizens' within a diverse, multicultural, and mutually respectful global community. We are dedicated to helping our pupils gain a deep understanding of various countries and cultures, fostering openness and adaptability to new experiences. Our goal is to equip students with language skills that will enhance their future opportunities and enrich their lives.

Our French modules are thoughtfully designed and strategically planned to align with our commitment to a broad and balanced curriculum. This ensures that students not only acquire lifelong linguistic skills but also cultivate a curiosity and interest in the world around them, with a particular emphasis on embedding new vocabulary.

Through our engaging French curriculum, students will develop their listening, speaking, reading, and writing abilities, allowing them to express themselves with increasing confidence, independence, and creativity. We aspire for our pupils to foster a genuine love for languages, achieved by nurturing their linguistic curiosity and motivating them to explore and respect diverse cultures and communities.
