

National Curriculum for Mathematics: 2014			
	Year 1	Year 2	Year 3
Number and Place Value	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number Count, read and write numbers to 100 in numerals, count in different multiples including ones, twos, fives and tens Given a number, identify one more and one less Identify and represent numbers using concrete objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least Read and write numbers 1 to 20 in digits and words 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Count in steps of 2, 3, and 5 from 0, and count in tens from any number, forward or backward Recognise the value of each digit in a two digit number (tens, ones) Identify, represent and estimate numbers using different representation, including the number line Compare and order numbers from 0 up to 100; use <, > and = signs Read and number facts to solve problems Read and write numbers to at least 100 in numerals and in words Use place value and number facts to solve problems 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Count from 0 in multiples of 4, 8, 50 and 100; finding 10 or 100 more than a given number Recognise the place value of each digit in a three-digit number (hundreds, tens, ones) Compare and order numbers up to 1000 Identify, represent and estimate numbers using different representations Read and write numbers to at least 1000 in numerals and in words Solve number problems and practical problems involving these ideas.
Addition and subtractions	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Read, write and interpret mathematical statements involving addition (+), subtraction (-), and equals (=) signs Represent and use number bonds and related subtraction facts within 20 Add and subtract one-digit and two-digit numbers to 20, including zero Solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Solve simple one-step problems with addition and subtraction: <ul style="list-style-type: none"> Using concrete objects and pictorial representations, including those involving numbers, quantities and measures Applying their increasing knowledge of mental and written methods Recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100 Add and subtract numbers using concrete objects, pictorial representations, and mentally, including: <ul style="list-style-type: none"> A two-digit number and ones A two-digit number and tens Two two-digit numbers Adding three one-digit numbers Show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and missing number problems 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Add and subtract numbers mentally, including: <ul style="list-style-type: none"> A three-digit number and ones A three-digit number and tens A three-digit number and hundreds Add and subtract numbers with up to three digits, using the efficient written methods of columnar addition and subtraction Estimate the answer to a calculation and use inverse operations to check answers Solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction.

Multiplication and division	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Solve simple one step problems involving multiplication and division, calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs Show that multiplications of two numbers can be done in any order (commutative and division of one number by another cannot Solve one-step problems involving multiplication and division, using materials arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including two-digit numbers times one-digit numbers, using mental and progressing to efficient written methods Solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which n objects are connected to m objects.
Fractions	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Recognise, find and name a half as one of two equal parts of an object, shape or quantity Recognise, find and name a quarter as one of four equal parts of an object, shape or quantity. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Recognise, find name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$, and $\frac{3}{4}$ of a length, shape, set of objects or quantity Write simple fractions e.g. $\frac{1}{2}$ of $6 = 3$ and recognise the equivalent of two quarters and one half 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> Count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10 Recognise, find and write fractions of a discrete set of objects; unit fractions and non-unit fractions with small denominators Recognise and use fractions as numbers; unit fractions and non-unit fractions with small denominators Recognise and show, using diagrams, equivalent fractions with small denominators Add and subtract fractions with the same denominator within one whole (e.g. $\frac{5}{7} + \frac{1}{7} = \frac{6}{7}$) Compare and order unit fractions with the same denominator Solve problems that involve all of the above

Measures	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Compare, describe and solve practical problems for: <ul style="list-style-type: none"> ▪ Lengths and heights (e.g. long/short, longer/shorter, tall/short, double/half) ▪ Mass or weight (e.g. heavy/light, heavier than, lighter than) ▪ Capacity/volume (full/empty, more than/less than, quarter) ▪ Time (quicker, slower, earlier, later) • Measure and begin to record the following: <ul style="list-style-type: none"> ▪ Lengths and heights ▪ Mass/weight ▪ Capacity and volume ▪ Time (hours, minutes, seconds) • Recognise and know the value of different denominations of coins and notes • Sequence events in chronological order using language such as: before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening • Recognise and use the language relating to dates, including days of the week, weeks, months and years • Tell the time to the hour and half past the hour and draw the hands on a clock face to show these times. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels • Compare and order lengths, mass, volume/capacity and record the results using <, > and = • Read relevant scales to the nearest numbered unit • Recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value • Find different combinations of coins that equal the same amounts of money • Solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change • Compare and sequence intervals of time • Tell and write time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times • Know the number of minutes in an hour and the number of hours in a day 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml) • Measure the perimeter of simple 2-D shapes • Add and subtract amounts of money giving change, using both £ and p in practical contexts • Tell and write the time from an analogue clock, including using Roman numerals from 1 to X11, and 12 hour and 24 hour clocks • Estimate and read time to the nearest minute; record and compare time in terms of seconds, minutes, hours and o'clock; use vocabulary such as am/pm, morning, afternoon, noon and midnight • Know the number of seconds in a minute and the number of days in each month, year and leap year • Compare durations of events, for example to calculate the time taken by particular events or tasks.
Geometry: properties of shape	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Recognise and name common 2-D and 3-D shapes, including: <ul style="list-style-type: none"> ▪ 2-D shapes (e.g. rectangles (including squares), circles and triangles) ▪ 3-D shapes (e.g. cuboids (including cubes), pyramids and spheres) 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Identify and describe the properties of 2-D shapes, including the number of sides and symmetry in a vertical line • Identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces • Identify 2-D shapes on the surface of 3-D shapes, for example a circle on a cylinder and a triangle on a pyramid • Compare and sort common 2-D and 3-D shapes and everyday objects 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations; and describe them with increasing accuracy • Recognise angles as a property of shape and associate angles with turning • Identify right angles, recognise that two right angles make a half-turn, three make three-quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle • Identify horizontal, vertical, perpendicular and parallel lines in relation to other lines.

Geometry: position, direction, motion	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Describe position, directions and movements, including half, quarter and three-quarter turns 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Order and arrange combinations of mathematical objects in patterns • Use mathematical vocabulary to describe position, direction and movement, including distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anti-clockwise) 	
Statistics		<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Interpret and construct simple pictograms, tally charts, block diagrams and simple tables • Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity • Ask and answer questions about totalling and compare categorical data. 	<p>Pupils should be taught to:</p> <ul style="list-style-type: none"> • Interpret and present data using bar charts, pictograms and tables • Solve one-step and two-step questions such as 'How many more?' and 'How many fewer?' using information presented in scaled bar charts and pictograms and tables.
