

A **working wall** showing problem solving in Class 8 at St. Teresa's.

Working Walls at St. Teresa's support children's independent learning. They evolve as a unit of work unfolds. In maths, our **working walls** are interactive displays which reinforce and consolidate children's knowledge and understanding through practical applications in order for children to learn a skill. They reference and reflect current work and individual steps being covered. The learning journey or process is shown – as the unit progresses and/or as a complete process with reference made to each step and the work on the board it refers to.
