

Numbers

Communication Activity

1

Split the class into five groups.

2

Have five sets of flashcards with the numbers 1-10 on them. Place them, shuffled, face down at the other side of the gym hall.

3

Explain that from each team, one child at a time will run up and pick up a number flashcard and bring it back.

4

Each group must gather and order the number flashcards so that they have all the numbers from 1 to 10.

5

If a child picks up a card with a number that they already have, they must place it back face down and return to their group empty handed.

6

Encourage children to communicate which cards they already have, where they have looked and where would be best to look next.

7

The winning team is the first team to order the flashcards from 1-10.
