

Using Xbox or PlayStation to access Google for remote learning

Xbox

1. Plug a keyboard in to the Xbox USB slot (less than £10 from Amazon or similar)
2. Go in to my games and apps
3. Find Microsoft Edge and select
4. Type classroom.google.com in the URL at the top and log in as you would in school
5. You can now access Google Classroom. In some cases, you might not be able to do everything you can on a laptop or PC, but you can, at the very least, access Google Classroom and see what work your teacher has assigned for you to do.
6. To move around use the Xbox controller or plug in a mouse

PlayStation

The PlayStation 4 has its own web browser that is easy to find on the PlayStation 4 (in the content menu as an icon with WWW written on it). However, it's currently a bit trickier on PS5, as there is no way to open the browser natively. Instead, you can open the System Settings, then the User Guide. This will open up an online user manual inside a web browser page so you only have to change the URL at the top. Otherwise, the rest of the steps are the same.

1. Identify the PlayStation internet browser icon (it is WWW with some dots around it)
2. Press the PlayStation logo on the controller
3. Go to the library and find options for games and applications
4. Go in to applications and you will find the browser
5. Type in classroom.google.com and log in as you would in school
6. You can now access Google Classroom. In some cases, you might not be able to do everything you can on a laptop or PC, but you can, at the very least, access Google Classroom and see what work your teacher has assigned for you to do.
